

International Organization for Migration Role in vaccination area

Problem statement

Ukraine

Lowest vaccination coverage in Europe

Measles and Polio Outbreaks

War

Problem statement

Hesitancy and mistrust

**Difficulties in reading foreign
vaccination records**

Access barriers

**Need for catch-up schedules and
multiple vaccinations**

**Disruption of services and population
movement**

**Chronic conditions that might seem
like contraindications**

**MISSED
OPPORTUNITY**

IOM role

Provision of direct vaccinations and referrals within migration health programming

IOM role

Outreach trainings for health providers to address common misperceptions (IOM programming and beyond)

In coordination with relevant Ministries of Health, UN agencies, national and international partners

Understanding and addressing hesitancy in refugee and migrant populations

**Post-refusal counselling
Vaccine Demand and Confidence project with CDC (CDC methodology)**

Work on additional innovative solutions (contact center for both refugees and health providers)

To address access and misperception issues, as well as to provide vaccine records translation services
