Camp Departure Follow-up Survey

Sept 2019 - 30 November 2020 | Round 29

CCCM CLUSTER | Protection Cluster | Iraq Information Centre

Overview

A Follow-Up Survey, jointly developed by the CCCM and Protection Clusters and the Iraq Information Centre (IIC), is conducted by the IIC with families leaving camps around 2 weeks after their departure, based on data provided by participating camp management agencies through the Camp Exit Survey. This dashboard presents an overview of the compiled data from all surveys conducted from their start in September 2019, to date. Data is indicative only to the number of people reached by the Iraq Information Center for follow-up calls. Needs represented are for families who have departed to out-of-camp locations.

An interactive version of this dashboard can be found here. An overview of protection concerns can be found here. All camp population trends here.

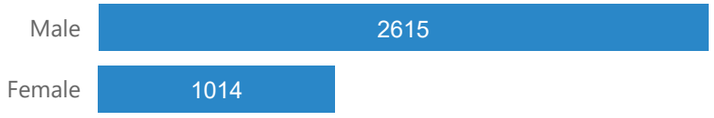
The full dataset including individual referrals can be requested by humanitarian partners from the CCCM Cluster. Contact: frahman@iom.int

Demographics

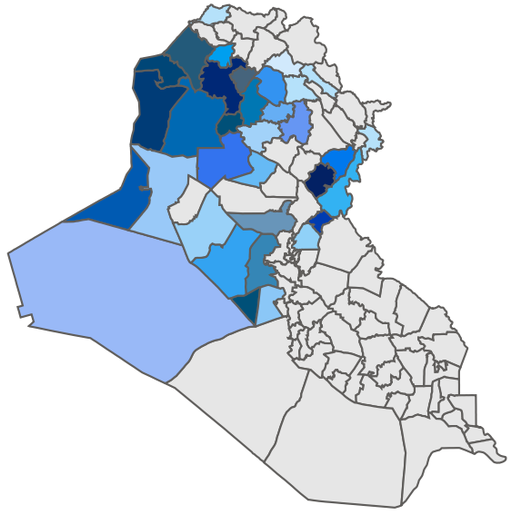
 # households called: 3,629

 # individuals: 22,348

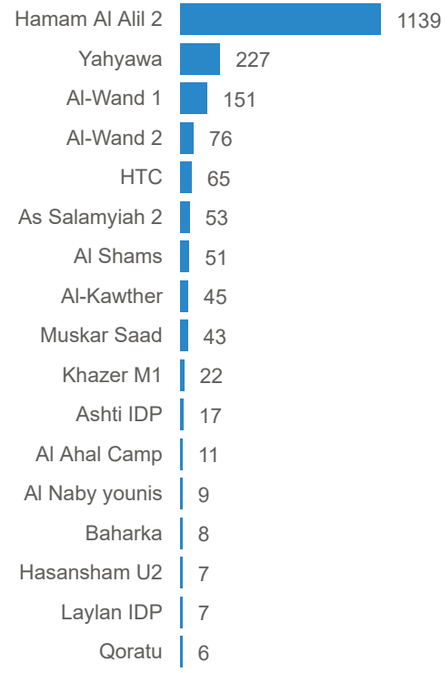
Gender of Respondent



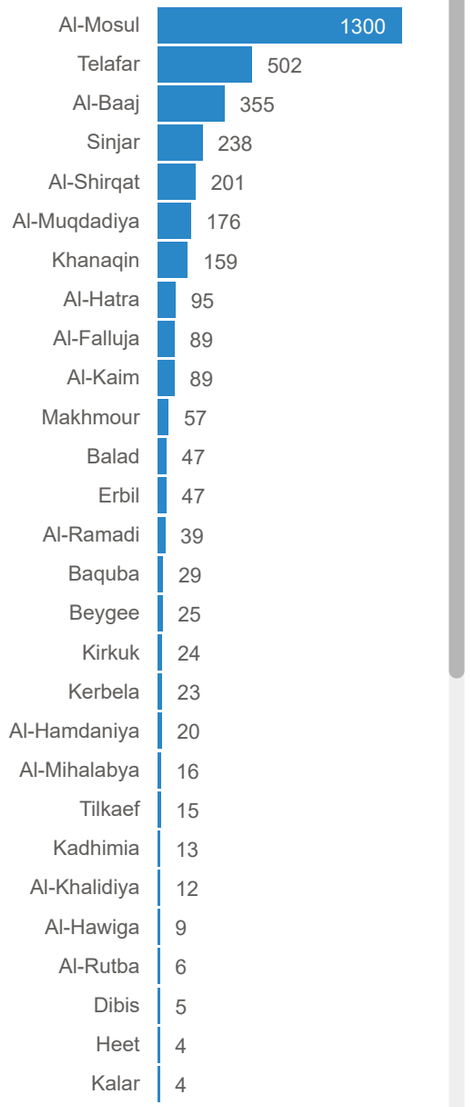
Arrival districts



HHs by camp of departure (from 22 Sept 2020)



of HHs by arrival district



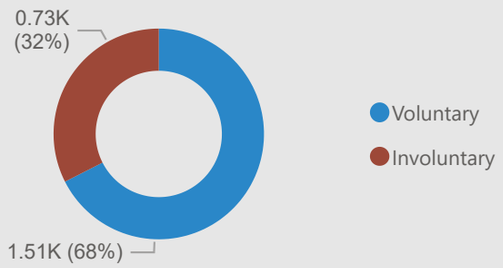
Filter by date & location

9/15/2019 | 12/12/2020

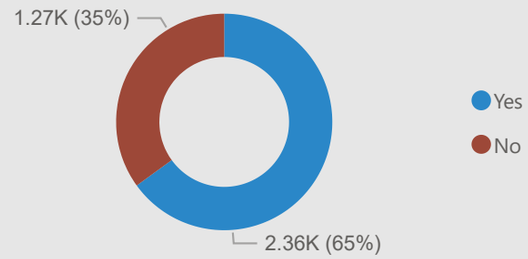
Governorate	District	Camp Name
All	All	All

Movement

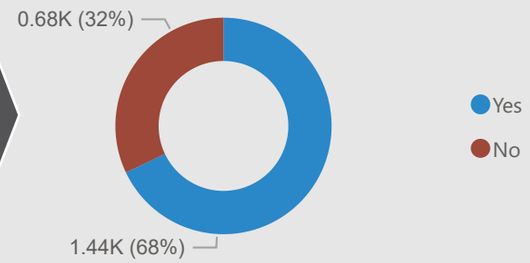
% HHs who report their departure from the camp was voluntary



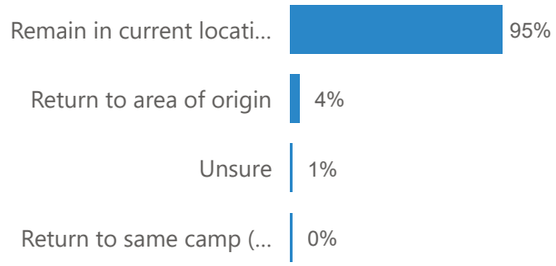
% HHs that returned to their area of origin (neighbourhood of habitual residence)



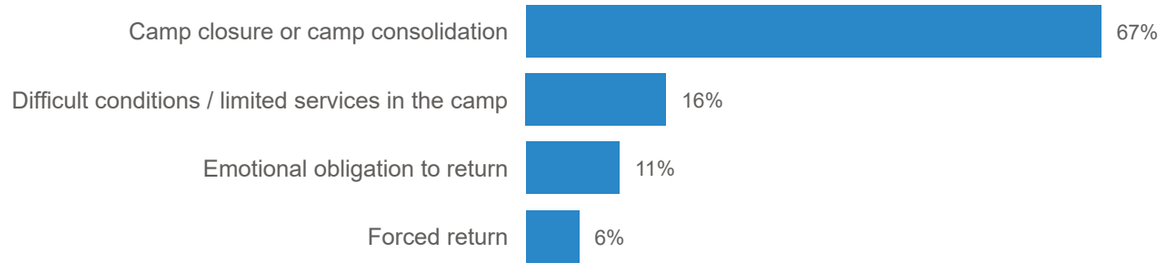
% HH that returned to their previous residence, of HH that returned to AoO



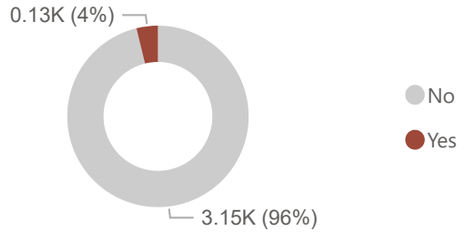
HH intentions in the next month



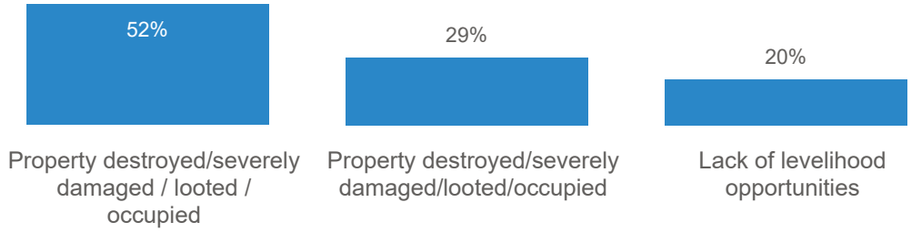
Top reported reasons for leaving the camp



% HH reporting family separation on leaving the camp



Top reported reasons why HHs did not return to area (neighbourhood) of origin



% HH returned to area of origin (neighbourhood of habitual residence), by district of arrival
