1. Context and Reasoning

To ensure that the humanitarian assistance is coordinated in a coherent and complementary way amongst the different humanitarian actors, UNHCR leads the development of Refugee Response Plans (RRPs). These plans support host governments to protect refugees in large and complex refugee situations through international solidarity. Refugee Response Plans (RRP) are developed to respond to the needs of a specific refugee population. In 2012 the first RRP was developed, the Syria RRP, which addressed the needs of Syrian refugees in Lebanon, Jordan, Turkey, Iraq, and later Egypt was added.

Refugee Response Plans serve as the base from which to implement a strategy and activities as well as advocate for refugee situations in close collaboration with host governments and other partners. A Refugee Response Plan:

- Provides a platform and tools to properly plan and coordinate an inter-agency response
- Raises the profile of refugee assistance
- Raises funds for partners
- And provides an overarching vision and coherent engagement in refugee responses in alignment with host government strategies.

While the Government has the primary responsibility to protect refugees, partners of the 2023 RRP will continue to coordinate with authorities under the Refugee Coordination Model (RCM) in a complementary and cohesive manner, ensuring that multisectoral activities are in line with Government priorities, are impactful and address refugee needs.

i. Why should I report activities and funding to UNHCR?

Each partner has submitted two types of information to the Refugee Response Plan for Poland, (1) planned activities and targets, (2) budgetary needs.

This information expressed the objectives of your organisations and what you are planning to achieve (targets), as well as the financial needs you have to achieve these goals.

Reporting will therefore also focus on both dimensions: on the achievement of your targets, meaning how many people have been reached, as well as how many funds have been received, have the financial needs been covered or do any major gaps exist.

According to the Refugee coordination Model¹ UNHCR, jointly with the Government of Poland, is leading the coordination of the humanitarian response in Poland and by that acts as coordinating agency. Recent UN General Assembly Resolutions have confirmed the RCM and UNHCR's mandate to lead and coordinate the refugee response². In its function as coordinating agency UNHCR ensures the functioning of the sector and intersector coordination and develops the regional refugee response plan to highlight the needs of the people of concern towards the public. The role of advocate for the humanitarian community and as coordinating agencies necessitates a high level of information that can be used to underline the needs but also highlight the results achieved. For this reason, UNHCR asks agencies to report.

This reporting serves the following goals:

1. Accountability, towards the People of Concern, the public and governments
2. Coordination at intersector and sector level, including identification of gaps in response
3. For each agency, who may use the data to better cooperate with other agencies in their areas of intervention

¹ <https://emergency.unhcr.org/entry/38270/refugee-coordination-model-rcm>

² [A/RES/69/152](#), [A/RES/70/135](#)

The key product of the reporting is the data and dashboard informing about active partners, progress on indicators and the distribution of agencies among voivodeships and powiats as well as the number of people of concern supported.

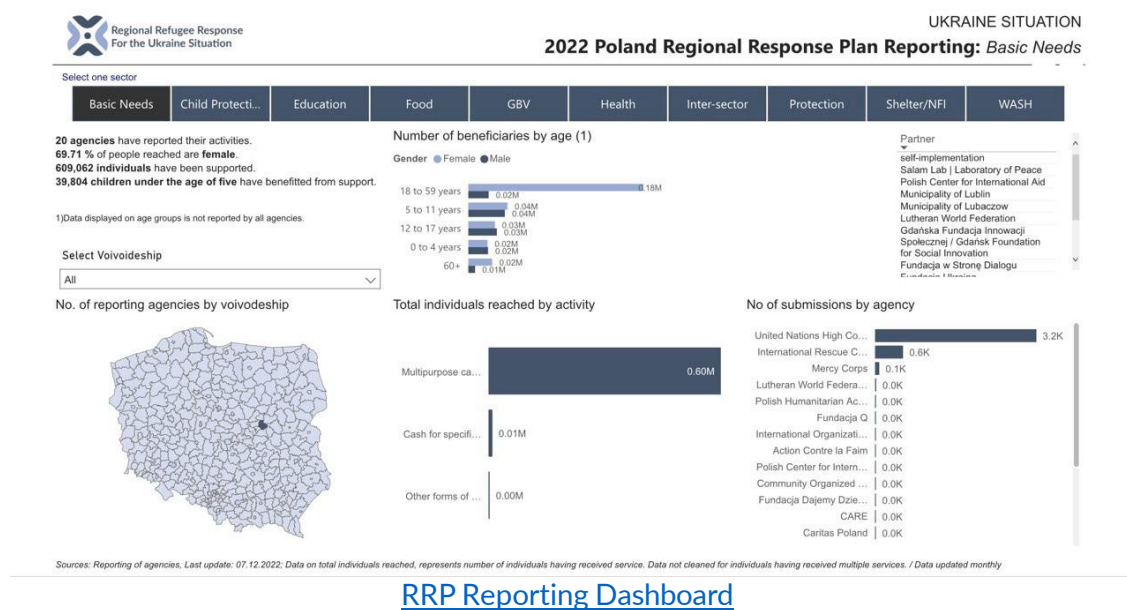

Additionally, to the dashboard the information collected via reporting is used for factsheets and funding information's for donors and the government of Poland.

The coordination of international protection, assistance and solutions is central to UNHCR's refugee mandate and derives from the High Commissioner's responsibility to ensure international protection for persons of concern to UNHCR from the time they become a refugee or internally displaced person (IDP) until they find a solution, whether they live in urban or rural host communities or in camps, with other refugees and internally displaced people, with other populations affected by humanitarian crises, or in non-emergency settings.

ii. What happens to the data submitted

The data submitted is used for coordination, accountability, and increased transparency among agencies as well as towards the public.

Two key products are:

Sector	Requirements (US\$)	Funded (US\$)	Coverage	Gap (US\$)
Basic Needs & Livelihoods	419,894,464	316,825,115	75%	103,069,349

2. Funding and RRRP

The Regional Refugee Response Plan is a document that is developed to

- 1) Outline the priorities of the humanitarian response and by that allow for a well-coordinated intervention
- 2) Inform the public and donors about the financial needs of agencies so that the needs of the People of concern can be addressed.

Being mentioned in the RRP as a partner does not mean that the organisation will automatically receive funding from UNHCR or any other agency or donors. Being a RRP partner indicates that an organisation supports a joint response, integrates into an existing coordination structure, information is shared, priorities followed, Core Humanitarian Standards (CHS)³ applied, and a transparent response carried out, so to ensure the maximum level of accountability.

By committing to the above-mentioned approach, agencies highlight these quality criteria also towards donors increasing their potential for attracting additional funding. Nevertheless, agencies will have to apply for funding individually.

Having expressed a financial need in the RRP, partners are requested to also inform to which degree they have been able to cover these needs over the year. This is done either via [financial tracking service](#) or via the reporting form for funding received, made available in Activity Info.

³ [Home Page - CHS \(corehumanitarianstandard.org\)](https://www.corehumanitarianstandard.org/)

3. Results framework

All reporting builds around the results framework⁴ that defines the priorities agreed upon by humanitarian agencies and the government of Poland and is rooted in assessments of the needs of the people of concern. Activities that are not covered by the results framework are not considered priorities.

This results framework was also the basis of the RRP 2023 development process and each organisation that is a partner of the RRP has submitted targets for at least one of the indicators. These targets are now to be achieved. To follow up on how successful the targets are achieved reporting is to be carried out. Sectors and the intersector coordination group use the reported data to ensure informed decisions in coordination and reprioritization, if necessary.

The complete results framework is attached to this document.

To ensure the correct data collection and a harmonized information tracking across all agencies, the results framework informs about units and means of measurement as well as the minimum standards to be fulfilled. As such the result framework should be a standard document used by all Project Management, M&E, and MEAL Officers of organisations intervening in the humanitarian response in Poland.

⁴ See Annex III. *Indicator Guidance*

4. Reporting on Activity Info

Activity Info is an online tool for reporting of activities and results, which is used by UNHCR and its partners in over 30 countries. It allows to report as well as analyse data and replaces 5W reporting in Excel format. In Poland Activity Info was used in 2022 already for reporting on RRP as well as for submission of RRP 2023 contributions by the humanitarian agencies.

The process of reporting as well as the reporting calendar with is available at the end of this document.

I. Getting a User Account

To get access to Activity Info please write an email to polwarrpsupport@unhcr.org.

In your mail, please provide the following information:

Name of Organization, Acronym, National or International Organization

List of Users for Activity Info:

For each person: Name, Email, Position, Role of User

Available Roles for users are:

Reporting: Right to enter and edit data, Analysis (M&E)

Information Managers: no writing rights, Analysis (Project/Program Managers, IM)

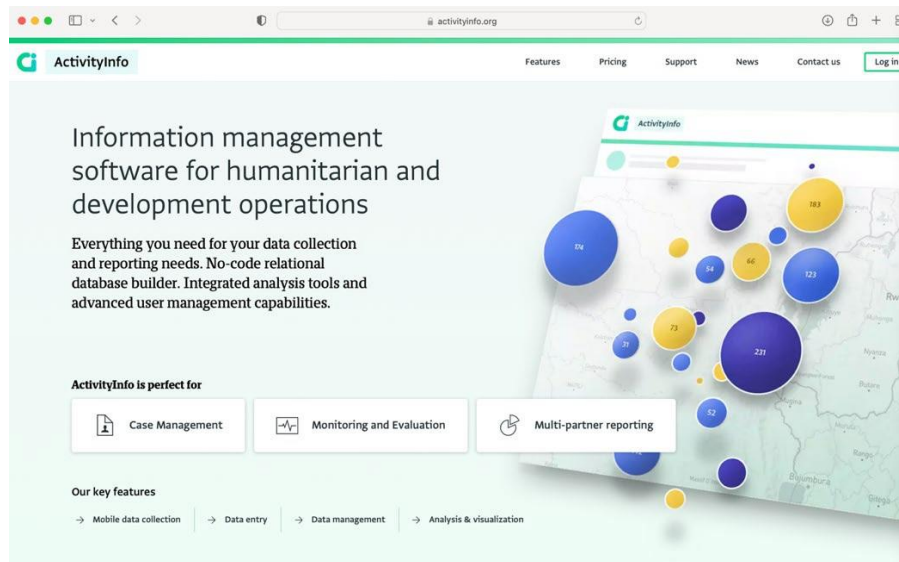

Agencies that had access to Activity Info for the development of the RRP 2023 will receive an invitation to the Reporting Database automatically.

Please keep track of the individuals of your organisation who have access to the database and inform us in case of staff changes, by sending an email to polwarrpsupport@unhcr.org.

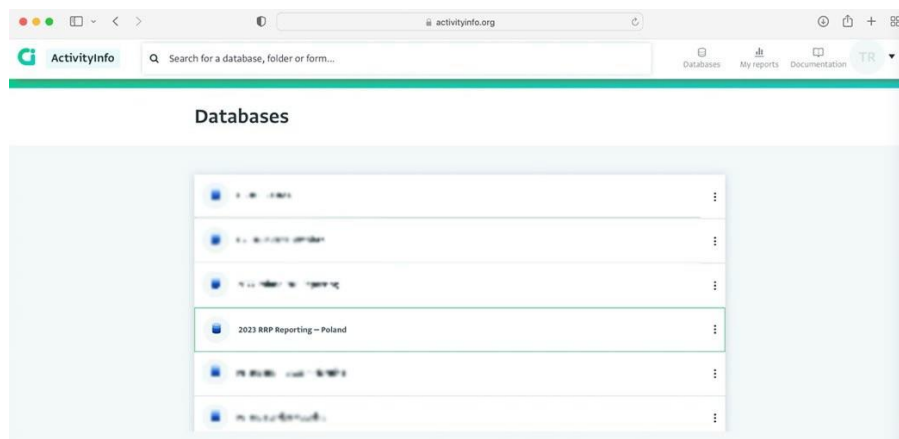

i. Logging In

After your request for accounts in Activity Info you will receive an email from Activity Info with an invitation link. Follow the information in this link.

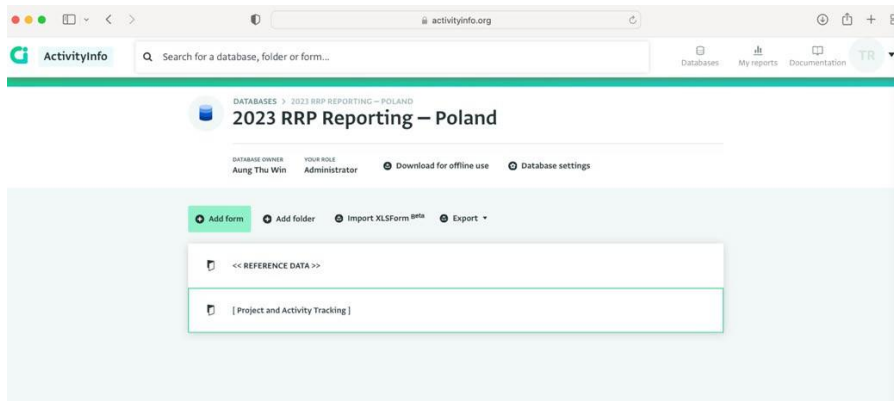

Once your account has been activated and you have entered a password you can log in via the homepage of Activity Info.

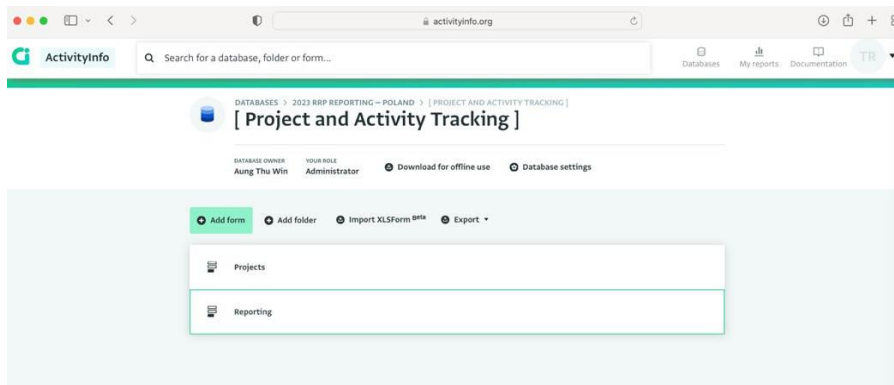

Please go to www.activityinfo.org and click on “Login” at the upper right side of the screen.

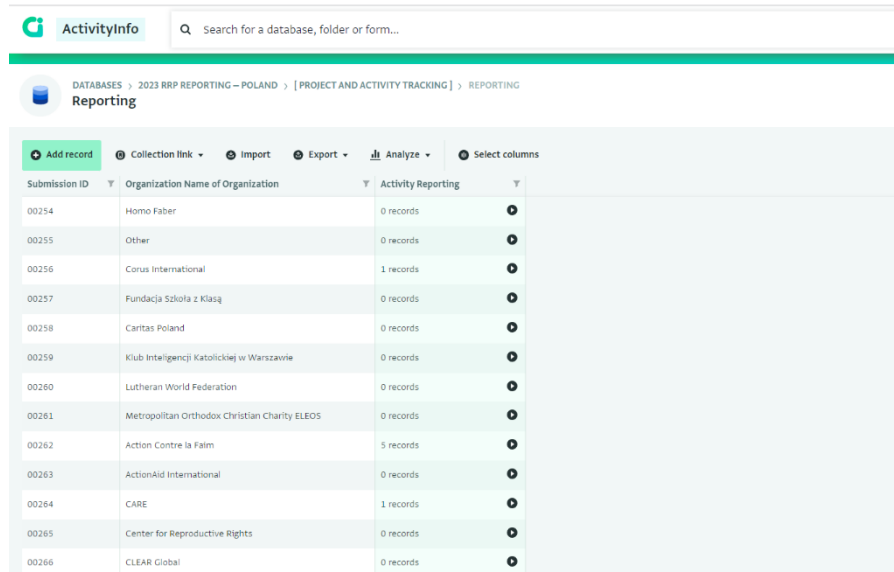

Once logged in you see a list of databases to which you have access. Please select **2023 RRP Reporting - Poland** (IMG_Login_2)

On the next screen select Project and Activity Tracking

Now click on **Reporting**

Comments

This field is available for any comment you might have regarding the record.

After you click on “Save Record” the data you filled in will be stored and the first reporting record will show up in the list for Activity Reporting:

iii. Editing a Record

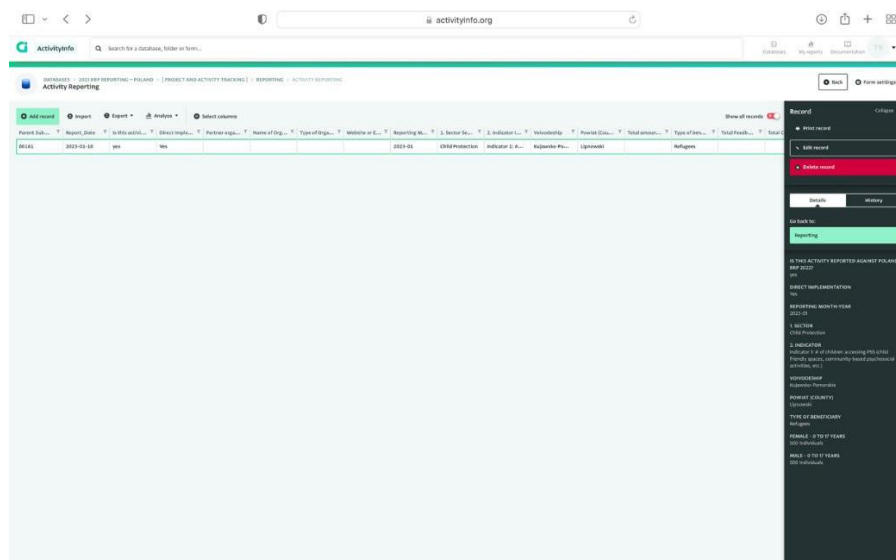

The record you have submitted can be edited later. To edit a record, go to the list of records of your organisation, either financial reporting or activity reporting.

Select the record you want to edit.

On the right side of the screen a window opens. This window allows to scroll through the details of the selected record.

You can choose “Delete record” to completely erase this record.

Clicking on “Edit record” allows you to open the form where you can adjust all elements of the record.

iv. Batch Upload via Excel Template

Activity Info allows to upload multiple records without filling out a form for each of the records. This system is based on the structure of the form and follows the following steps:

Enter Data in Excel Table, ensure that names of voivodships, powiats, indicators are exactly the same like in Activity Info

- All required fields **MUST** be filled out (age groups and gender must be filled out for all indicators that require such data. If one age group was not addressed, please insert "0".)
- Make sure to put quantities in the exact type of unit that corresponds to the indicator selected.

Select all entries in the excel table that you want to upload (Ensure that the headers of the columns are also selected)
