Uganda Refugee Response Plan (RRP) 2022-2023

Quarter: Q3 2023

The sector's main objective is to ensure full integration of comprehensive primary health care services for refugees into national and local government systems, in line with the Health Sector Integrated Refugee Response Plan (2019-2024), launched in January 2019.

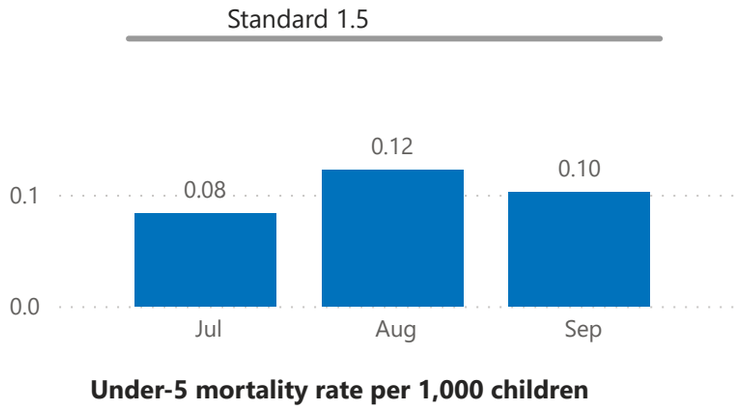
Achievements

During reporting period, the under-five and crude mortality rates were kept low at 0.09 and 0.05 per 1000 per month respectively (standard is below 1.5 and 0.75 deaths per 1000 per month). The leading cause of mortality are Malaria (16%), Neonatal deaths (11%), Lower respiratory tract infection (10%), cardiovascular diseases (8%), Anemia (7%) and Liver diseases (5%) among the general population.

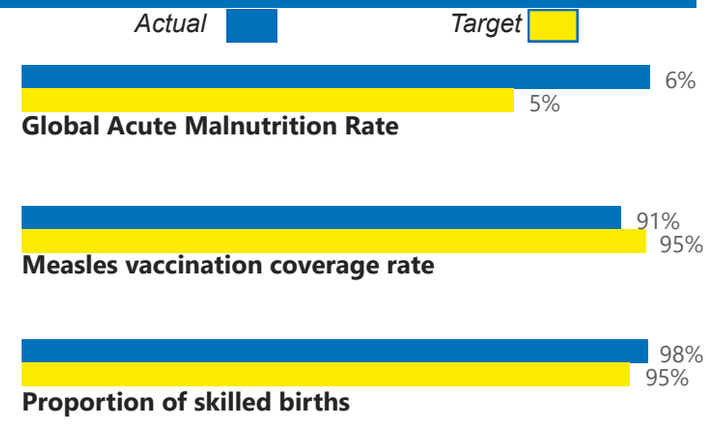
A total of 659,220 consultations were made during the quarter of which 27% were by the host population. There was an increase in the health staff workload with each Clinician seeing 52 patients per day of which 40% of these were malaria cases, 21% were respiratory tract infections, 5% due to skin disease and 4% due to Urinary tract infection. 24,259of these consultations were due to chronic non-communicable disease conditions including mental health. Community health preventive strategies have been scaled up in all settlements with emphasis on childhood illness prevention to ensure early diagnosis and treatment of cases. Over 2,700 VHTs across the settlements have been engaged.

15,620 first antenatal care visits were made by pregnant women of which only 49% were made within the first trimester of the pregnancy. Out of 12,402 live

Key performance indicators



Under-5 mortality rate per 1,000 children



OUTCOME 1: Improved access to adequate preventive, promotive and curative services for communicable and non communicable diseases

Indicator	Actual	Target/Standard
Under-5 mortality rate per 1,000 children per month		
- Congolese Refugees	0.05	2
- South Sudanese Refugees	0.15	2
- Other refugees	0.02	2
Global Acute Malnutrition rate		
- Congolese Refugees	2%	5%
- South Sudanese Refugees	9%	5%
- Other refugees	3%	5%
Consultations per clinician per day		
- Congolese Refugees	49	50
- South Sudanese Refugees	51	50
- Other refugees	60	50

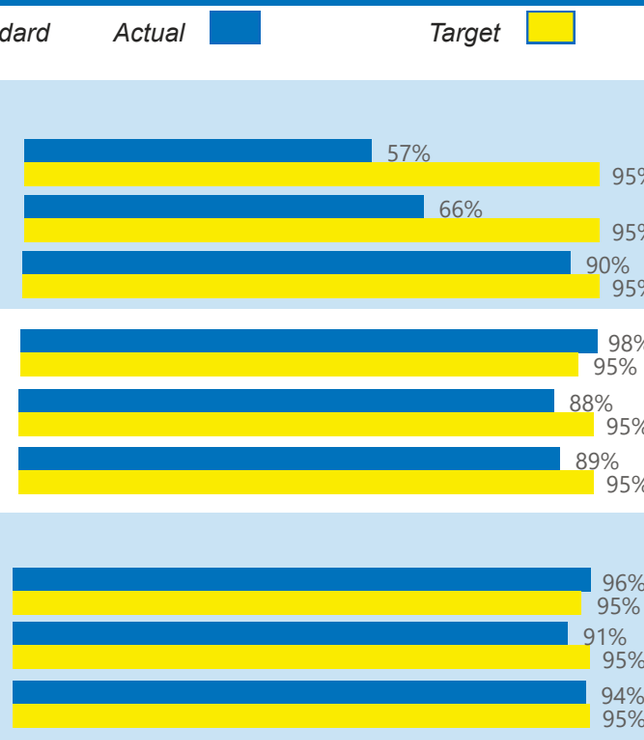
OUTCOME 2: Improved HIV-TB prevention, care and treatment services

Indicator	Actual	Target/Standard
ART retention rate		
- Congolese Refugees	57%	95%
- South Sudanese Refugees	66%	95%
- Other refugees	90%	95%
TB treatment success rate		
- Congolese Refugees	98%	100%
- South Sudanese Refugees	88%	100%
- Other refugees	89%	100%
Viral load suppression rate		
- Congolese Refugees	96%	100%
- South Sudanese Refugees	91%	100%
- Other refugees	94%	100%



OUTCOME 3: Strengthening the national health care system capacity to cope with the increasing demand for health services by refugees and host population.

Indicator	Actual	Target/Standard
Health facility accreditation rate		
- Congolese Refugees	72%	100%
- South Sudanese Refugees	78%	100%
- Other refugees	100%	100%
Health Center IV and District referral hospitals supported		
- Congolese Refugees	80%	100%
- South Sudanese Refugees	83%	100%
- Other refugees	50%	100%
Monthly health & nutrition coordination meetings		
- Congolese Refugees	100%	100%
- South Sudanese Refugees	100%	100%
- Other refugees	100%	100%
