TANZANIA REFUGEE SITUATION

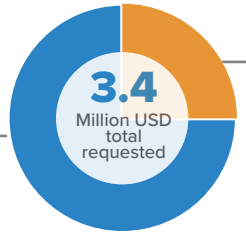
COVID-19 EMERGENCY RESPONSE DASHBOARD

(29 August - 11 September 2020)

Situation Overview

The COVID-19 situation is rapidly evolving with over 28-million confirmed cases worldwide. In Tanzania, the number of confirmed cases are 509 as of 29 April 2020, when figures were last updated. A serious risk exists for spread within the country, as well as in the three refugee camp locations. To forestall such an event which would have dire consequences on refugees and host communities, UNHCR and partners have initiated preparedness plans across all locations. The Regional Administration and Local Government, Kigoma Region COVID-19 Contingency Plan of March 2020 integrates refugees hosted in the region into the region's primary strategy for COVID-19. Within the umbrella of this plan and in close cooperation with the Refugee Services Department within the Ministry of Home Affairs and the Regional Authorities, in particular the Regional Medical Officer, UNHCR is coordinating and working closely with partners for camp level preparedness and response aiming to preclude contagion in the refugee camps and to minimize the risk of importation from those seeking refuge. The situation in the camps remains calm, with both police and community watch teams maintaining order. This dashboard summarizes the key highlights of UNHCR's enhanced measures for COVID-19.

Additional Funding Required*



25% Gap

75% Funded

*These funds will cover activities that UNHCR has already embarked upon

Affected Population

242,000 refugees and asylum seekers targeted

1,000,000 host community living in Kakonko, Kibondo and Kasulu, the three districts adjoining the refugee camps

National COVID-19 Statistics

509 confirmed cases

183 discharged cases

21 deaths

00 infected among UNHCR PoC

Coordination

National response coordinated by Ministry of Health/WHO

UNHCR Crisis Management team set up to coordinate response

Three level coordination for refugee response. National, for strategic direction & policy; Regional, for operational needs & implementation; & camp level for identification of needs
