Participatory Assessment 2024_Urban Adults

Introductory Notes

Hello, my name is (Enumerator) and I am working for UNHCR as a data collector for this assessment. UNHCR is talking to randomly selected people from different nationality and groups – older people, young people, men, and women, adolescents, and children – to understand the types of problems people in your community face. As you are selected for this interview, I would like to ask you a few questions. Your participation is voluntary, and you can choose not to answer any of the questions. The interview is planned to take around 45 minutes or an hour. The results of the participatory assessment will provide inputs for 2024 and 2025 Planning based on the identified priority needs of refugees and asylum seekers. All that you will say during this interview will stay completely confidential, and your name will not appear. We will share the report prepared from it with partners, both governmental and non-governmental to better address the community concerns.
