LEBANON Response Plan

Minutes of Meeting
Inter-Sector Coordination Group Meeting

Meeting Location	Hybrid: MS Teams & ESCWA 5th Floor F500 Room	**Meeting Date**	6 Dec 2024
Chairperson(s)	Dr. Ola Boutros, LRP General Supervisor (MoSA) Kristin Arthur, Senior Inter-Agency Coordinator (UNHCR) Elena Ferrari, Senior Inter-Agency Coordinator (UNDP) Kasper Engborg, Acting Deputy Head of OCHA (OCHA) Makiha Kimura, Head of Coordination (OCHA) Camilla Jelbart, Senior Response Advisor (RCO)	**Meeting Time**	10:00 a.m. 12:00 p.m.
Minutes Prepared by	Jana Nasr, Senior Inter-Agency Coordination Assistant (UNHCR)	**Meeting Duration**	2.00 hrs.
Participants	Annex 1		
Agenda	1. Opening Remarks 2. Update on Population Movements and Latest Developments • Update from the Government on Plans related to IDP/Returnees • Displacement Tracking Matrix • Analysis on Damage Assessments & Key Findings 3. 2025 Planning Process • Environment Thematic Presentation • Follow-Up to the Planning Workshop and Sector Reflections on Sector Planning Progress + PiN • Rationalization of Reporting Requirements (across LRP & FA) 4. 16 Days of Activism 5. AoB		

1. Opening Remarks

Dr. Ola Boutros, LRP General Supervisor (MoSA)
Kristin Arthur, Senior Inter-Agency Coordinator (UNHCR)
Elena Ferrari, Senior Inter-Agency Coordinator (UNDP)
Kasper Engborg, Acting Deputy Head of OCHA (OCHA)
Makiha Kimura, Head of Coordination (OCHA)
Camilla Jelbart, Senior Response Advisor (RCO)

In their opening remarks, the Inter-Sector Coordination Group (ISCG) Co-Chairs welcomed the participants, presented the meeting agenda, and reminded the sectors about the importance of collaboration among stakeholders, particularly in response to recent displacements and return movements.

2. Update on Population Movements and Latest Developments

Update from the Government on Plans related to IDP/Returnees

Dr. Ola Boutros, LRP General Supervisor (MoSA)

Dr. Ola Boutros provided an update on plans related to Internally Displaced Persons (IDPs) and returnees:

- The government has adjusted its data collection methodology post-ceasefire to better reflect the evolving situation of IDPs and returnees.
- **Phase 1:** Self-registration link has been activated through the Disaster Risk Management (DRM) to capture updated information on household locations and vulnerabilities, and data cleaning is being conducted by municipalities, DRM, and the Ministry of Social Affairs (MoSA) to eliminate duplications.

- **Phase 2:** Door-to-door household surveys will provide detailed information, including individual profiles, disabilities, and vulnerabilities.
- Memorandums of Understanding (MOUs) for data sharing with partners will be finalized following registration exercises.
- Addressing cash assistance challenges for IDPs and returnees remains a priority. MOSA is working on unified assistance criteria to avoid conflict sensitivities and overlaps.

Action Point:

1. OCHA to follow up with DRM/LRC on communication to governors and partners regarding data-sharing at Governorate level to support programmes (Phase 1), pending the finalization of the MOSA data collection (Phase 2).

Displacement Tracking Matrix

Dayane Ibrahim, DTM Operations (IOM)

Dayane Ibrahim highlighted the latest findings from the Displacement Tracking Matrix (DTM) Mobility Snapshot Round 66:

- Total IDPs have decreased by 78% compared to earlier data, attributed to ongoing return movements.
- Approximately 573 cadasters currently host displaced populations, with many IDPs returning to southern regions.
- Shelter types for the displaced population indicate that 50% are residing in host settings, 2% in their second house, 43% are renting private accommodations, 4% are in collective sites, and 1% are in other shelter types, reflecting the diverse living conditions and arrangements of those affected.
- The challenge of differentiating between "returnees" and "IDPs in areas of return" was discussed, with agreement on avoiding premature categorization to ensure appropriate support.
- The IOM DTM Mobility Snapshot Round 66 is available here.

Analysis on Damage Assessments & Key Findings

Dave Van Zoonen, Co-Chair of Assessment and Analysis Working Group (AAWG), REACH

Dave Van Zoonen presented an analysis on damage assessments and key findings:

- The variations in objective, geographic area, methodology, and key findings across the LCAT, UN Habitat, and World Bank studies, are highlighted on slide 14 here.
- The data so far indicates considerable damage has occurred in many conflict affected areas (including Marjayoun, Bint Jbeil and Tyre districts in the border area) compared to the situation pre-conflict. Over 100,000 housing units have been destroyed.
- This will have implications on the possibility for permanent returns of displaced people to their areas of origin, meaning that different types of support and services (including immediate assistance) would continue to be required where needs remain including among people in transit while early recovery efforts kickstart.
- DTM intention survey and the re-registration exercise by MoSA/LRC are among data sources to inform analysis.
- Further work to coordinate among partners leading damage assessments and ensure engagement with the government is necessary to inform sustainable returns.

Action Point:

2. ISCG Co-Chairs to provide an update on terminology for returnees.

3. 2025 Planning Process

Environment Thematic Presentation

Nour Masri, Environment Task Force Coordinator (MoE)

Nour Masri presented on environment mainstreaming including planning recommendations:

- Lebanon's environmental vulnerabilities remain critical due to systemic issues, including inadequate waste management, resource depletion, and pollution exacerbated by ongoing hostilities.
- Most wastewater treatment plants are non-operational, contributing to untreated wastewater in water systems.
- Solid waste management challenges include increased waste generation, widespread open dumping, and heightened risks of pollution, particularly in areas such as Akkar, where informal settlements discharge waste directly into watercourses.
- Planning Recommendations:
    - Partners must integrate environmental safeguards into their projects, following national legislation such as Law 444 and the Integrated Solid Waste Management Law.
    - Sector activities were categorized for environmental due diligence:
    - Category A: Neutral or low-impact projects (e.g., food assistance).
    - Category B: Medium-impact projects requiring initial environmental examination (e.g., small-scale irrigation).
    - Category C: High-impact projects requiring full Environmental Impact Assessment (e.g., large infrastructure projects).
- The Green Cash-for-Work Guidance Document was highlighted to encourage environmentally sustainable and socially impactful employment projects, emphasizing the circular economy and long-term benefits.
- For further details, please refer to slides 17 to 29 here.

Action Point:

3. Stephanie Laba to follow up with Dr. Ola Boutros on Government plans regarding both environmental impact in general and white phosphorus in particular and revert to ISCG.

Follow-Up to the Planning Workshop and Sector Reflections on Sector Planning Progress + PiN

Makiha Kimura, Head of Coordination (OCHA)

Makiha Kimura provided guidance on the Flash Appeal (FA) extension for Q1 2025 (January-March) as well as FA target:

- In the Lebanon Response Plan 2025 Planning Workshop, sectors reviewed achievements and identified gaps in the 2024 Response Plan, emphasizing integration of feedback into the 2025 planning cycle.
- The Flash Appeal (FA) is fully complementary to and supportive of the LRP, which is the primary planning framework in the country supporting an integrated humanitarian and stabilization response, co-led with the Government. The LRP remains the unified planning and coordination framework.
- Criteria for development of the Flash Appeal extension:
    - Immediate life-saving assistance1 (not all humanitarian response)2
    - Shock-based: Needs arising as a direct result of hostilities and displacement/return
    - Geographical scope: locations with displaced and returnees/returning people, covering groups below (not exclusive):

- People who remain displaced (in places of displacement)
    - People returning to their areas but not their "home" (e.g. people in temporary centers, urban areas, etc.).
    - People returning to their homes (area of origin)
    - People in conflict-affected/hard-to-reach areas (those who didn't leave their home areas during hostilities)
- Preliminary Scope: 900K (internal displacement; some of them have returned, some of them are returning, some of them remain displaced) + 80 K (people remained in hard-to-reach areas during hostilities) = 1M (people directly affected) + contingency caseload of people who could cross the border into Lebanon.
- Timebound interventions: 3 months (activities that are implementable within 3 months, immediate impact) – some examples of activities (not exhaustive)
    - Hot meals and dry parcels or RTEs
    - Emergency medical support
    - Life-saving emergency cash and in-kind
    - Access to water (distribution of bottled water/water trucking)
    - Emergency nutrition rations
    - MHPSS
    - Support to humanitarian mine actions.
- No FA-specific People in Need (PiN): The LRP PiN will be the only statement of people in need. However, distinct figures for the FA target and the FA budget. FA and LRP targets are not mutually exclusive. FA budget is a top-up.

- FA Planning Considerations:
    - FA target at the national level ONLY, no district-level breakdown (due to the fluidity of population movements).
    - No population group breakdown for the target.
    - Need for a clear strategy to ensure linkage of LRP and FA (FA exit strategy) in sector strategy.
    - Important to keep in mind that the demarcation of LRP and FA is not science (nor mathematics). We have a gray zone, and we need to have expert judgment, putting people at the center of the response.
    - This is an "extension" of FA – light touch of update/revision based on the current FA (Oct-Dec 2024).
- Further guidance and details are available on slides 33 to 36 here.

Raffi Kouzoujian, Assistant Information Management Officer (UNHCR)

Raffi Kouzoujian presented the methodology for updated PiN for 2025:

- Use the 2024 intersectoral PIN as a baseline.
- Factor in displacement data when updating figures based on the 2024 PIN baseline.
- Gather IPC findings to refine PIN calculations.
- This PIN will be shared with sector coordinators for feedback and finalization.
- The PiN discussions highlighted challenges due to limited recent surveys and emphasized reliance on disaggregated data and local assessments.

Rationalization of Reporting Requirements (across LRP & FA)

Makiha Kimura, Head of Coordination (OCHA)

Makiha Kimura presented on rationalization of reporting requirements across the LRP and FA:

- Rationalizing reporting aims to reduce duplication, improve efficiency, and align donor expectations.
- FA reporting focuses on immediate, life-saving activities that can be implemented and reported within three months (January–March 2025).

- LRP reporting focuses on broader and longer-term activities spanning stability and humanitarian objectives.
- Key Adjustments:
  - Unified terminology and frameworks to avoid duplicative reporting.
  - Encouraged clear distinctions between activities under FA and LRP to address potential concerns of overlap from donors and partners.
  - Recommendations to sectors for aligning targets and financial requirements across both frameworks.
- Further details available on slide 40 here.

Action Point:

4. ISCG Co-Chairs to produce and share a reporting and planning calendar/timeline.

4. 16 Days of Activism

Elisa Cappelletti, PSEA Network and GBV Sector Coordinator (OCHA)

Elisa Cappelletti presented on the 16 Days of Activism against Gender-Based Violence:

- The campaign highlights the global effort to combat gender-based violence (GBV) and promote women's empowerment, with specific activities tailored to Lebanon's humanitarian context.
- Thematic Focus:
  - Strengthening awareness of GBV issues in both displaced and host communities.
  - Advocacy for improved access to psychosocial support and legal services for survivors.
- Activities Undertaken:
  - Community-based workshops and awareness campaigns conducted in collective shelters and host communities.
  - Capacity-building sessions for humanitarian workers on identifying and responding to GBV cases.
  - Visibility efforts, including social media campaigns, to amplify advocacy and encourage reporting of abuse.
- Challenges Identified:
  - Limited funding for sustained GBV programming beyond the campaign period.
  - Barriers to reporting due to stigma and fear of reprisal in certain communities.
- Next Steps:
  - Strengthen inter-agency coordination to scale up successful practices from the campaign.
  - Incorporate GBV-related objectives into the 2025 planning cycle, ensuring sustained focus beyond the campaign period.
  - Advocate for increased funding for GBV prevention and response programming.
- For further details, please refer to the 16 Days of Activism against Gender-Based Violence 2024 spotlight page here.

5. AoB

No further discussions were raised under Any other Business (AoB).
