Hassansham U2 - December 2024

CAMP BACKGROUND INFORMATION

As one of the East Mosul Camps (EMCs), Hassansham U2 opened on 9 May 2017, in response to the escalating military offensive conducted to reclaim Mosul. Most of its residents originate from the western districts of Mosul City and primarily include Female Headed Households, whose husbands are incarcerated, missing or deceased. They face numerous challenges, including lack of core civil documentation, dire living conditions, and - due to their perceived affiliation with Da'esh - severe restrictions on their freedom of movement, high risks of harassment, abuse and safety concerns. IDPs in Hassansham have limited access to basic services in the camp. In particular, electricity, water, sanitation and hygiene services are inadequate, posing significant protection risks and public health challenges. In Hassansham U2, UNHCR provides IDPS with civil documentation support through its partner INTERSOS.

HOST COMMUNITY

Hassansham village
Host community area name

1.6 km
Distance to host community area

Iraqi / Arab
Host community profile

KEY MESSAGES

- Advocate with the Government of Iraq (GoI) and the Kurdistan Regional Government (KRG) to ensure that the provision of services, including quality education and in-kind (food, fuel, generator maintenance, kerosene) support, is maintained until all residents have achieved a durable solution.
- The Federal Ministry of Interior (MoI) and KRG MoI should facilitate access to civil documentation (including through the newly established Unified National ID office in Erbil) facilitating return to their areas of origin or relocation to other locations of their choice in Iraq.
- Advocacy with GoI MoI and MoMD for the elimination of the Tabri'a requirement (whether formal or informal), which will help families to have freedom of movement, access to settlement grant, access to education, renting houses in the area of origin, livelihoods, and access to the Social Safety Net.
- About the consolidation of the EMCs: i) living conditions and access to services should remain at least at current levels, ii) camp consolidation should not further restrict the already limited freedom of movement in the camps and iii) the IDP community should be consulted in this process, and their intentions and preferences should support and influence the decision-making process.
