Population Movement From Ethiopia to South Sudan

Interview Date

8/1/2023

8/31/2023

Total Arrivals

21,814

 # Individuals

Age and Gender Breakdown

Female		Male
11,528		10K
5,640	0-17 yrs	4,342
5,888	18 or Above	5,944

Methodology

This dashboard is developed by UNHCR and endorsed by RRC. UNHCR has scaled up monitoring and collect data at various official points of entry where South Sudanese are arriving to South Sudan from Ethiopia.

**The number of new arrivals is indicative and it covers the borders in which UNHCR and its partners currently has a presence.*

** It is likely that more people are arriving than recorded by the border monitoring tool due to using unofficial border points and/or travelling at night.*

Context

Since 1 August 2023, South Sudanese refugees from Ethiopia have been recorded returning to South Sudan as a result of both the suspension of food assistance in refugee camps, and a deteriorating security situation in Gambella, Ethiopia hampering access to services.

Arrivals at Border Points

Border Crossing Point	# Individuals
Burebiey	12,631
Pagak	3,625
Akobo	3,129
Pochalla	1,364
