Agenda

- Background
- Risks
- Solution
- Process

Background

- Winterization targets earthquake-impacted population
- No systematic tool for deduplication
- UNHCR Audit recommendation to avoid duplication
- UNHCR had meetings with cash workgroup members
- The outcome was 4 different modalities for running the cross-check

Challenges

- **Data Protection:** No data-sharing agreements with all cash workgroup members.
- **SOP Activation:** Some members view the winterization SOPs as an encouragement rather than a commitment.
- **Scope and Mandate:** Certain members believe that establishing cross- check mechanisms is beyond the mandate of the cash workgroup.
- **Trust and Targeting Pool**: Organizations protect their target list

Solution

- Creation of a Trusted Cross-Checking Platform.
- (Blind cross-check): Store values using SHA-2 cryptographic
  - Stored data can not be reversed by platform operators
  - Data verification is scoped to a project
- Project is a space designated for organizations
  - User can only verify what he knows
  - Only involved organizations can access
