Winterisation Task Force Meeting Minutes

Time& Location:	28 November 2023, Microsoft Teams
Chaired by:	IOM
Agenda:	1. Welcome & Introductions 2. Updates in Current Response Capacity 3. Winterisation Task Force-Targeting Tool 4. Winterisation Program Update by Partners 5. AoB

1.Welcome & Introductions

The Winterisation meeting commenced with a recap of the previous session, encompassing the MEAL team's presentation on the slightly adjusted PDM tool. This tool will serve as guidance for sector partners in their respective activities.

2. Updates on Current Response Capacity

With GIZ joining, a total of nine partners are currently implementing Winterisation assistance, targeting 65,000 vulnerable households. These partners are operating in Adiyaman, Gaziantep, Hatay, Kahramanmaraş, Malatya, and Kilis, providing cash assistance ranging from 4,000 TRY to 11,900 TRY.

3.Operational Planning:

3.1. Winterisation Program Updates by Partners

UNCHR: Concluded the caseload for the Winterisation project, transferring it to the service provider (PTT) for 16,941 households, equivalent to 73,640 individuals across Turkey. Follow-ups regarding the transfer are ongoing.

IOM: Expects to receive the final beneficiary list in mid-January, which will be uploaded to ICCP for cross-checking to avoid duplication.

STL has two ongoing Winterisation projects. The first project has reached 100 beneficiaries and is expected to reach 200 in Adiyaman. In the second project, the initial distribution is complete with 600 families, and data collection continues for the second distribution.

Concern Worldwide aims to target 2,000 households across Malatya, Adiyaman, and Hatay under the Winterisation project, procuring a stock of tarpaulins, heaters, and blankets in case of additional support needs for those locations.

Save The Children has transferred cash assistance to approximately 2,300 households in Gaziantep, Kahramanmaras, Adiyaman, and Hatay. Follow-up continues with families to confirm the delivery of assistance, and the final numbers will be received within the next week.

3.2 Post-Distribution Monitoring Tool

The Winterisation Post-Distribution Monitoring Tool was summarized, highlighting crucial aspects to enhance project implementation.

4.AOB

It was suggested to include Turkish ID on the ICCP platform to ease crosschecking, as the project targets both refugees and host communities by partners.

The next Winterisation meeting is scheduled for the 6th of February 2024.
