KEY HIGHLIGHTS ON REFUGEE RETURNS

The return of **31,739** South Sudanese was verified and reported in April 2024. There is a decrease (**43.2%**) as compared to the returns recorded in the month of March 2024.

The decrease is due to economic hardship in South Sudan and dry spell in some parts of the Country which impacted the spontaneous refugee returns to South Sudan during the reporting month.

Most of the returns in April 2024 were from Sudan through Wunthou (Joda) while returns from Ethiopia were through Jekow and Pagak in Upper Nile State.

This information on returnees was validated through UNHCR - IOM, RRC joint border monitoring on Sudan, Ethiopian and UNHCR Spontaneous Refugee border monitoring interviews for Uganda, Kenya, Democratic Republic of Congo, Ethiopia and Central Africa Republic during month of April 2024 in areas of return in the following **10** states; Upper Nile, Central Equatoria, Northern Bahr el Ghazal, Western Bahr El Ghazal, Unity, Jonglei, Warrap, Eastern Equatoria, Western Equatoria and Lakes. Most of the verified returnees States were from Sudan (**60%**) while (**33%**) were from Ethiopia and less than **10%** were from Uganda, Kenya, Democratic Republic of Congo and Central Africa Republic.

- I- Loss of Belongings, Exploitation (Corruption, Extortion) (**14%**)
- II- Physical violence (**9%**)
- III- Psychological / Emotional Abuse (**7%**)
- IV- Medical emergency (**4%**)

METHODOLOGY

UNHCR in collaboration with Relief and Rehabilitation Commission (RRC) and partners monitors cross-border movements in areas of high return and at 42 border entry points with Sudan recording the highest border entry points. Information is collected regularly at border points and in areas of high returns through KII and FGD. The information was then triangulated with data collected during physical observations, and meetings with local authorities, faith-based leaders, law enforcement agents, and immigration officers at border entry points and areas of returns.

Disclaimer: The number recorded is only indicative, and it covers the borders where UNHCR and partners currently have presence. It is most likely that more returnees are arriving to South Sudan than recorded due to using unofficial border points and/or travelling at night.
