Agenda	Choosing a topic for the next meeting of Working Group (7th of July at 11:00).
Analysis on main challenges	UNHCR and IRC have very limited timeframe to decide on the topic and invite panelists.
Introduction	UNHCR and IRC are working together on the topic for the next meeting. The previous idea of working with ZUS was unsuccessful due to the limited capacity and lack of response from the institution.
Overview of the situation	UNHCR and IC discussed possible agendas: 1. Inviting Tech for the Rescue, which is a Polish-based Foundation connecting big IT companies to non-profits and NGOs. IRC will further research the criteria for selection. 2. Job activation (from collective shelter to livelihood) is considered as the potential agenda for the next meeting in July. Potential panelists for the meeting ae Amnesty International, which released a report on the living situation of Ukrainian refugees (Anna Mikulska), Habitat for Humanity or Casitas. In the upcoming days UNHCR and IRC will try to reach those potential partners. 3. UNHCR has a meeting with European Bank on Reconstruction and Development in near future, and there is potential for the future cooperation on agenda for the Work Group meeting. 4. UNHCR will consult its partner IFC if they could provide us with a snapshot of the presentation or possibly present the finding from survey. 5. Another possible topic is about the motivation behind staying in the collective shelters. 6. The last discussed potential agenda was referrals of the agencies or NGO to the institution who can provide the training for free. However, it is to be noted that it

	must be linked to the market demand. This topic will be further discussed in the next meeting.
Way forward	UNHCR and IRC will prepare detailed agenda proposal for the future meetings.
Next meeting	▪ 27th of June 2023 at 8:00
