OPERATIONAL CONTEXT

UNHCR DRC uses Cash Based Interventions (CBI), a delivery modality, to cover a wide range of multisectoral needs. In the second quarter of 2024, more than half of UNHCR's CBI portfolio was provided through multi-purpose cash (MPC) grants, reaching 12,736 IDPs and refugees from Central African Republic, Rwanda, Sudan, Burundi, as well as returnees from Zambia, Angola, South Africa, Namibia, Eswatini.

In Aru, Goma and Kananga, UNHCR sub and field offices used CBI to help some IDPs and returnees to build their shelters. In Masisi, despite the suspension of banks and the ongoing armed conflict, UNHCR still managed to provide cash to 4,360 IDPs Households. In Gbadolite, Kalemie and Kinshasa, refugees and returnees were given cash to purchase school fees and hygienic items, as well for livelihood activities and reintegration purposes.
