SOUTH SUDAN EMERGENCY RESPONSE - ETHIOPIA
HEALTH FACTSHEET

18 October 2025

Highlights

Primary healthcare services remained operational across all sites. In the reporting period, 1,285 consultations were conducted by CUAMM's new mobile clinics, bringing the total to 10,466 consultations by DPO and CUAMM since July. Cholera cases reached 471, with 30 new case reported last two weeks. Partners scaled up cholera prevention through the Regional Health Bureau's Emergency Operations Cell, while vaccination and supplementation for new arrivals continued. Flooding in Luakdong and overcrowding in Tormorok continue to heighten health and sanitation risks.

Response & Challenges

Health partners continued providing essential care across Luakdong, Matar, and Muon, despite operational challenges from heavy rains and flooding. DPO and CUAMM conducted 4,656 outpatient consultations during the last two weeks, with 134 emergency referrals to Nyinyang Hospital. While vaccination and supplementation activities are ongoing, a recent rise in cholera cases (30 new) highlights the urgent need to intensify prevention and treatment measures. CUAMM startded mobile clinic operations, which expanded coverage in Muon and Matar. The risk of a malaria outbreak remains high, compounded by poor drainage and limited mosquito control. Flooding at Luakduang continues to disrupt service delivery and, in particular, access to the site for ambulances dealing with emergency referrals to Nyinyang. The lack of dedicated Mentalhealth and Psycosocial Support (MHPSS) services and limited resources for emergency disease response remain key gaps requiring immediate partner engagement and support.

Achievements

- **22,073** Children 0-15 Years Vaccinated with OPV
- **19,217** Children 6 Months to 15 Years Vaccinated with Measles
- **35,266** People More Than 1 Year of Age Vaccinated with OCV
- **16,173** Children 6-59 Months Supplemented with Vitamin A
- **9,750** Children 24-59 Months Dewormed with Albendazole
- **471** Cholera Cases Identified and Received Appropriate Treatment
- **39.5%** Proportional Morbidity Attributed to Malaria
- **256** Emergency Medical Cases Referred to Secondary Health Facilities
- **18 of 23 (78%)** Proportion of Deliveries Attended by Skilled Health Worker
- **9** People Receiving Clinical Mentalhealth Treatment (New + Repeat)
- **16** People Receiving Individual Level Focused Psychosocial Support (New + Repeat)

Key Figures

50K* Population Planning Figure

430K Refugees from South Sudan in Ethiopia (prior Feb 2025)

17 Response Partners Under Emergency Response Plan

29,651 Total Individuals Registered Refugees Level 1 (Since 22 July 2025)

Demographic (Registered Refugees Level 1)

	Female (56%)	Male (44%)
Adults	23%	10%
Children	33%	34%

20,999 Refugees Medically Screened Before Departure/Relocation

10,466 Health Consultations (started 22 July 2025)

Crude Mortality Rate*	0.19	Within Sphere Standards
Under 5 Crude Mortality Rate*	0.05	Within Sphere Standards

* Lasst 7 days
