## Inter-Sector Service Mapping

Deployment of an **inter-sectoral tool** to map and share information on available services for refugees and host communities.

Service providers have access to the tool to add and update information.

Target users are refugees and members of host communities, volunteers, as well as service providers to enhance referrals in the context of case management.

Rollout **during June** with Protection Sector based on service mapping exercise already developed. Other sectors are also invited to join the rollout process.
