Sheikhan IDP Camp - December 2024

CAMP BACKGROUND INFORMATION

Sheikhan camp was established in April 2015, and hosts predominantly Ezidi Internally Displaced People (IDPs) who fled Sinjar in August 2014. UNHCR advocates for durable solutions for those in the camp, given the unsustainable living conditions. UNHCR's advocacy to the Government resulted in IDPs being allowed to self-upgrade 140 shelters in the camp. IDPs in the camp indicate that to be able to return to their area of origin, security and law enforcement must be fully restored through institutions they trust, and they must have access to quality public services, adequate shelter, and livelihood opportunities. In addition, some indicate that they would prefer other durable solutions such as relocation in areas of displacement. As such, UNHCR is advocating for all durable solutions to be made available to the IDP population and that they have equal access to assistance packages available.

Sheikhan IDP Camp - December 2024

POPULATION DEPARTURE TREND

Since January 2024, 181 families (813 individuals) departed the camp, mainly through the International Organization of Migration (IOM) and Ministry of Migration and Displacement (MoMD) programmes on organized returns. This figure represents approximately 25% of the population registered as living in the camp as of January 2024. IDPs primarily departed to Ninewa.
