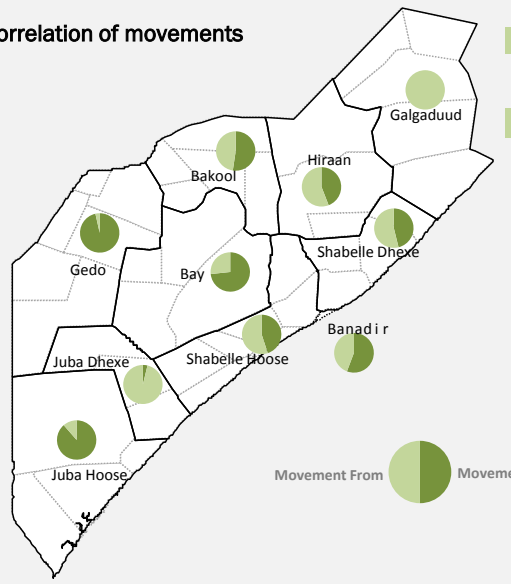
Correlation of movements

SL 500

PL 500



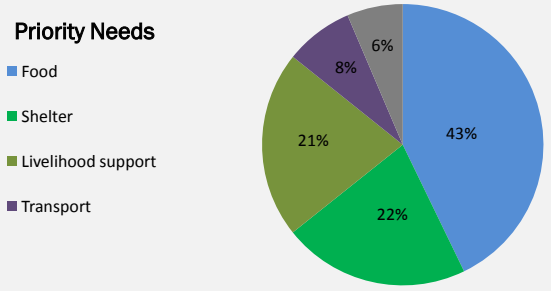
Between 1st Jan 2013 and 15th Mar 2013, displacements were mainly recorded in South Central with approximately 20,000 out of a total 21,000 displacements recorded in all three zones. 12,400 displaced people reported cross border movement, as the major cause of displacement in South Central followed by eviction(3,200), insecurity (2,000), IDP temporary return (1,000), lack of livelihood (1,000). The movements originated mainly from Banadir (3,000), Hiraan (1,500), Juba Hoose (1,300), Shabelle Hoose (1,200) and Juba Dhexe (510) regions. The top three regions people moved to were, Juba Hoose (10,000), Banadir (3,800), Gedo (2,800) among other regions.

Top 5 Reasons for movement

	People
Cross border movement	12,400
Eviction	3,200
Insecurity	2,000
IDP Temporary Return	1,000
Lack of livelihood	1,000

01-Jan-13 By Week 15-Mar-13

Priority Needs



This data has been collected through the Population Movement Tracking (PMT) system. PMT is designed to capture population movement trends, not cumulative population data. Due to the fluid nature of displacement in Somalia and in order to avoid capturing multiple displacements, UNHCR limits the reporting range to a period of three months - these figures should therefore not be added and used cumulatively.

** Please note* figures have been rounded using a three tier method as follows. Figures below 100 were not rounded at all. Figures between 100 and 1,000 were rounded off to the nearest tenth, figures between 1,000 and 10,000 were rounded off to the nearest hundreth andall figures above 10,000 were rounded off to a thousandth.This rounding rule was applied to the final result after all computations were undertaken.

The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations.
