Media Guidelines

Note NRC implementation checklist operates as a guidance note. Informed consent needs to be incorporated into the current draft. Suggestion to provide MoI with guidelines to distribute at the point of authorization. Guidelines require strict implementation and enforcement. Suggestion to discuss in CMC so all agencies are aware of guidelines and are only allowing in journalists who have received authorizations. Enforcement is more likely to have more impact through the police or the SRAD. Protection group will wait for the inter-agency guidelines to be shared and provide inputs on that. How to deal with unauthorized journalists.
