

Lebanese Communities in Focus

Supporting Communities Protecting Refugees

UNHCR's community support programme since 2011 has been funded by the generous contributions of the European Union, France, Germany, Italy, Kuwait, Mexico, the Russian Federation, the Saïd and Asfari Foundations, Saudi Arabia, the Swiss Agency for Development and Cooperation and the United States of America.

Lebanese Communities in Focus

Supporting Communities Protecting Refugees

UNHCR

United Nations High Commissioner for Refugees

Haut Commissariat des Nations Unies pour les réfugiés

Foreword

I met the mayor of Machta Hamoud in the hot August of 2011. Machta Hamoud was one of several villages in Wadi Khaled that had recently taken in 2,000 Syrian refugees. The mayor wanted to discuss water. With so many people to assist, the town was running dry and he needed help.

Three years later, the war in Syria shows no sign of ending and there is little hope for a speedy return to Syria. Wadi Khaled now hosts 16,000 refugees. Machta Hamoud still needs more water.

This year, Lebanon marked a grim milestone: more than one million refugees now live here.

How best to convey the weight of a million? No country in recent memory has taken in more refugees proportional to its size. Refugees live in more than 1,700 communities in Lebanon, some of which host more refugees than nationals. And while international humanitarian funding has been considerable, it does not cover all of the needs of refugees or of the Lebanese communities who have reached out and provided protection and assistance even when it has meant sharing their often already strained public services.

Yet, in the midst of this bleak picture, there are signs of hope. Support to communities hosting refugees has begun, with hundreds of community support projects initiated in areas where poverty levels, refugee numbers and tensions are high. Across Lebanon, villages are benefiting from: new wells; water, sanitation and waste management facilities; community centres; improved medical facilities; youth education and sport activities; rehabilitation works; and livelihood projects. This publication focuses on 278 projects that UNHCR has initiated, generously supported by donors and implemented by partners under the guidance of government authorities.

Machta Hamoud is one of the many communities profiled here. It now pumps water regularly into hundreds of homes previously suffering from intermittent supply. The community is grateful for this modest but high impact investment. But it is only a start.

Projects alone will not solve Lebanon's problems, but helping Lebanese communities can mitigate tensions and help lift the weight of a million.

A handwritten signature in blue ink, appearing to read 'N. Kelley'.

Ninette Kelley
UNHCR Representative in Lebanon

Foreword

By mid-February 2014, a new Lebanese Council of Ministers was formed, at a point when Lebanon was already struggling to cope with over 1,000,000 displaced Syrian citizens on its territory. Nearly eight months into our tenure, the Syrian population in Lebanon has further expanded and thousands of communities across the country are still carrying burdens too great for them to bear.

From Akkar all the way to the South, our towns and villages have been at the forefront of the humanitarian response to an incessantly escalating crisis. The inhabitants of these communities have opened their hearts and homes to the refugees. They have shared their food, their water, their electricity, their schools, and their clinics – resources and services that were barely adequate to cover the local needs prior to the crisis.

The Syrian crisis has had an enormous impact on Lebanon including at the local level. The presence of over a 1.5 million Syrians across Lebanon has directly affected the public and service sectors at the national scale. It has become very difficult for the Lebanese people, the Government and all other stakeholders to keep up with the sheer pace of this crisis and the resultant surge of needs in terms of sufficiently expanding and maintaining public services and infrastructure. This difficulty came at a time when the impact of the crisis on Lebanon was not yet evident to the world.

This has led the Government of Lebanon, in close collaboration with the international organization, to work on setting national needs and priorities that focus on strengthening the capacity of Lebanon to cope with the increasing numbers of Syrians and to be able to tend to their humanitarian and protection needs. Therefore, we are currently working on directing available resources to where they can generate the greatest impact: local communities. While not close to being enough, considerable investments have been made in support of these communities in various sectors. Any support to the hosting communities, which lies within the priorities and needs set by the Government, is always a welcome initiative. The UN system has always been one step ahead of everyone in this domain, which lies at the heart of the mandate of the Ministry of Social Affairs (MoSA). The special relation between MoSA and UNHCR, strengthened, by the close collaboration on the response to the Syrian emergency in Lebanon, since May 2011, has resulted in a commendable effort put into the support of the local community.

The numerous projects highlighted in this publication have brought much needed breathing space to our communities and improved our lives and the lives of our Syrian kin. Yet these projects should be perceived as but the beginning of an intervention much larger in scale and scope.

Among its neighbors, Lebanon has welcomed the largest number of Syrian refugees and borne the heaviest burden as a result. In order for Lebanon to continue affecting its humanitarian role, much more needs to be done by way of economic and social development.

A handwritten signature in black ink, appearing to read 'Rachid Derbas', with a stylized flourish at the end.

Rachid Derbas
Minister of Social Affairs

When refugees flee across borders, it is often local communities that are the first to respond. Nowhere has this been more the case than in Lebanon.

For more than three years, Lebanese communities have received refugees in record numbers. Refugees are now present in at least 1,700 communities across this small country, with the largest concentration of refugees found in areas that are marked with the highest levels of poverty among Lebanese people. Many towns have more refugees than resident Lebanese.

Substantial and prolonged refugee influxes invariably place increased political, social, economic and environmental pressures on hosting communities. This is the case in Lebanon, where infrastructure that was fragile prior to the Syria crisis is now under severe strain.

The effects are visible across the country. Waste and sanitation facilities are insufficient for the swelling population; water supplied by leaky pipes cannot meet increased demand. Subsidised public goods (such as electricity and flour) are being consumed in greater numbers, with consequent pressure on the public purse; increased demand for health services is leading to longer waiting periods for Lebanese and is costing Lebanon's Ministry of Public Health more; and greater competition for jobs is driving down wages.

Responding to a refugee influx requires more than simply meeting refugees' needs. Institutions, municipalities and hosting communities need support to cope with new arrivals, including help to strengthen relevant capacities and to mitigate some of the negative effects of refugees' presence. This is always a vital component of UNHCR's refugee response and has been since the outset of the crisis in Lebanon. The pace of this part of the agency's programme has matched the pace of the arrival of refugees: support was initially provided to Lebanese households sheltering refugees when the numbers were relatively small, and as the numbers of refugees grew that support was extended to line ministries and communities.

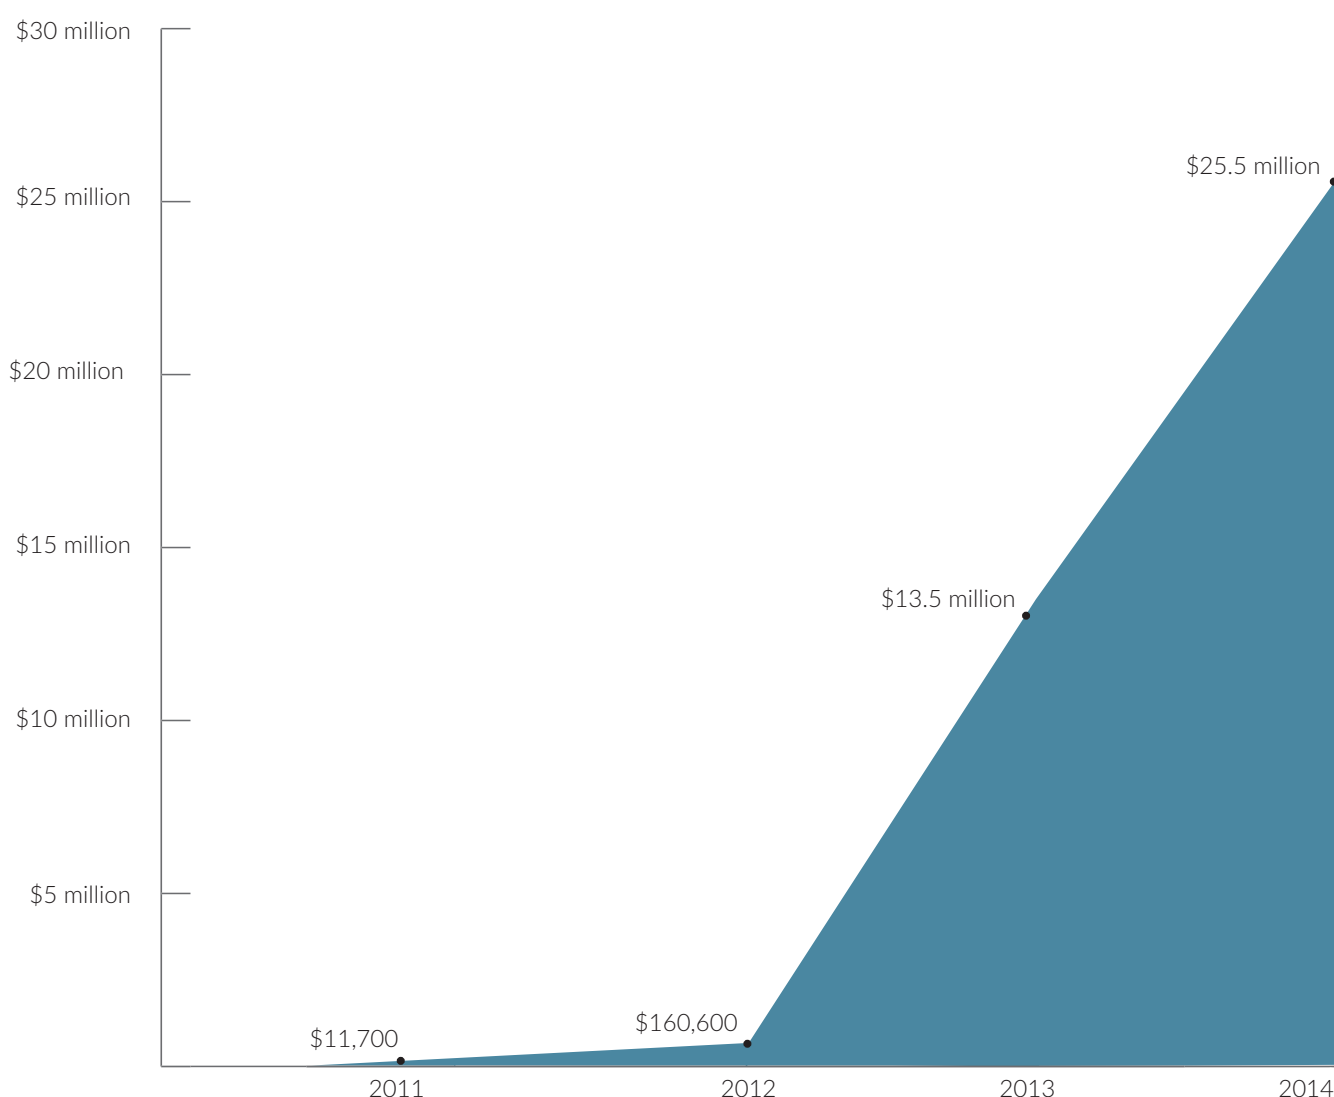

Photos clockwise from top-right: 1. Syrian refugee children in front of a collective centre in Northern Lebanon. UNHCR/S. Malkawi/2012; 2. Sisters wait to cross the border as their parents fill forms in the northern Lebanon border town of Aboudiyeh. Their bags are all they have left. UNHCR/L. Addario/2014; 3. Under a striking, overcast sky, a long line of women wait to register with UNHCR in the town of Arsal. UNHCR/M. Hofer/2013; 4. Syrian refugees await registration at the UNHCR compound in Tripoli. UNHCR/L. Addario/2014; 5. Syrian refugees at a collective shelter in the Bekaa Valley. UNHCR/S. Malkawi/2012; 6. A family crosses the border into Arsal, relieved to have completed the terrifying journey from Yabrud, Syria. UNHCR/A. McConnell/2014; 7. Saada Al Jomaa, 102, in her son's rented home in the Bekaa Valley. UNHCR/A. McConnell/2014.

In 2014, UNHCR reserved 15 percent of its humanitarian budget in Lebanon for support to public institutions and local communities that provide protection and assistance to refugees. This publication focuses on the latter and demonstrates the investments that bring needed services and relief to communities who shoulder a heavy load.

UNHCR's community support projects (CSPs) are quick, focused projects producing rapid results. These projects not only help communities mitigate the impact of refugees' presence, but many bring services which had been required by villages prior to the crisis. These included electric generators; boreholes, waste treatment facilities, vehicles for garbage collection and snow removal, public libraries and community centres.

In total, since 2011 UNHCR has implemented 278 community support projects in Lebanon, allocating USD 25.5 million to these projects so far. In 2014, more than USD 12 million have been allocated to these projects.

Cumulative Funding Allocation for Community Support Projects 2011-2014, USD

Project Sectors

Education

INTERVENTIONS

- Rehabilitating schools, particularly toilets and water systems
- Providing new classrooms
- Providing school supplies and equipment
- Training teachers and school administrators

IMPACT

More Lebanese and Syrian students have access to formal learning and are better equipped to learn, using new equipment, supplies and facilities.

Health

INTERVENTIONS

- Providing new equipment, such as respirators and incubators
- Installing generators
- Training medical staff
- Promoting health and hygiene in host communities

IMPACT

More Lebanese and Syrians have access to medical care, including emergency care and safe deliveries.

Livelihoods and Self-Reliance

INTERVENTIONS

- Creating and rehabilitating markets
- Providing equipment to cooperatives
- Rehabilitating roads
- Providing training to farmers, artisans and other workers

IMPACT

The Lebanese workforce is larger and better equipped; farmers, cooperatives and small-scale producers are selling to more consumers, more families have a reliable source of income, and Lebanese have access to a wider range of goods and services.

Public Services

INTERVENTIONS

- Rehabilitating and expanding water networks
- Providing equipment for waste removal
- Rehabilitating and expanding sewage networks
- Providing generators
- Providing equipment to clear winter roads

IMPACT

More Lebanese and Syrians have access to running water, electricity, garbage and sanitation services. Municipalities are better equipped to maintain public services.

Social Cohesion

INTERVENTIONS

- Rehabilitating community centres
- Providing sporting equipment, computers, and other resources to public facilities
- Hosting activities for youth and families
- Ensuring that community spaces are accessible for all residents

IMPACT

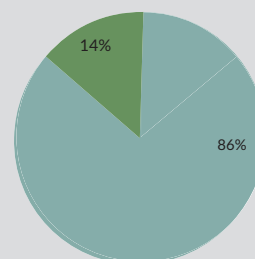

Lebanese and Syrians build positive relationships, reducing the likelihood of tension between Lebanese and Syrian communities.

Sectoral Breakdown by Year

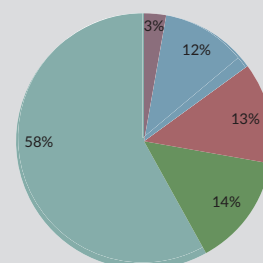

Percentage of total community support budget

Since 2011, UNHCR has been working with community leaders to identify solutions to urgent needs. CSP budget priorities continually respond to the changing needs of host communities.

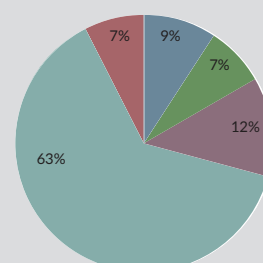

2011

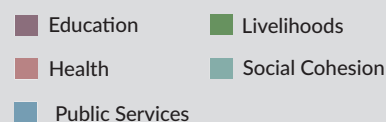

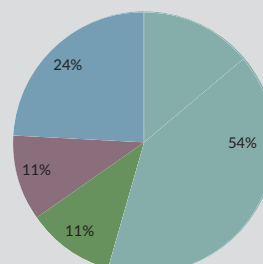

2012

2013

2014*

*Expected breakdown; project selection ongoing

Selection Process

Community support projects focus on the nearly 250 localities where the largest number of vulnerable Lebanese and refugees live. In each of UNHCR's five field offices, selection committees have been established, comprising technical specialists and representatives of Lebanon's Ministry of Social Affairs, United Nations Development Programme (UNDP) and specialized non-governmental organisations. Other ministries are consulted in respect to projects that fall within their areas of concern, such as education, environment, public health and water. Overall, the committees must ensure that projects:

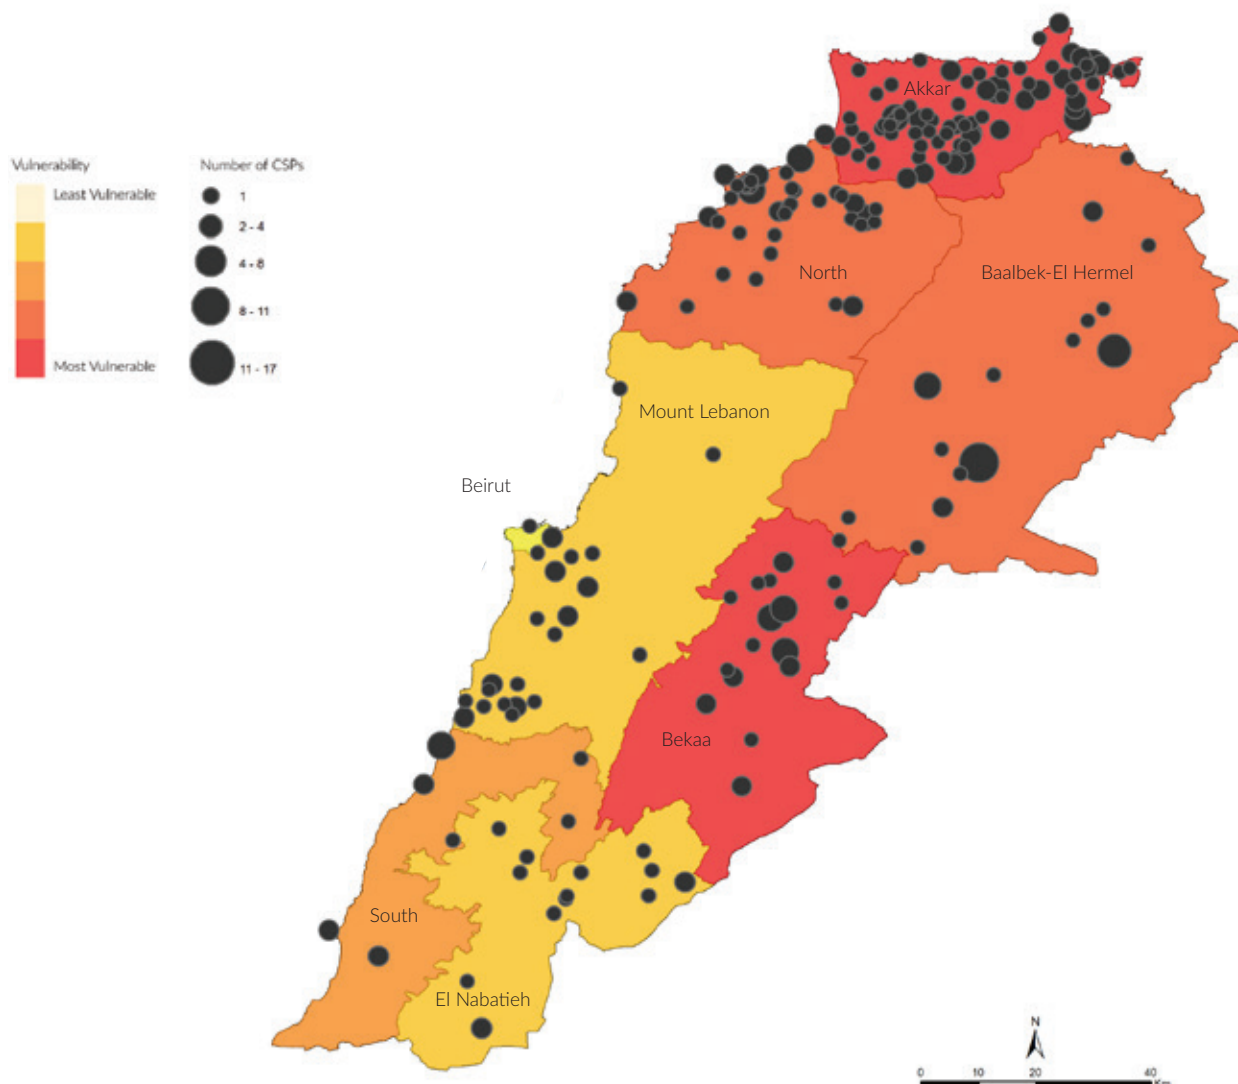

- meet local needs;
- are sustainable;
- involve the community;
- benefit both host and refugee communities in areas with a high refugee presence, or where tensions are potentially arising;
- are consistent with municipal priorities and planning; and
- are environmentally neutral or positive.

“Our strong partnership with municipalities and MOSA is essential to the CSP programme's achievements. My hope is that these partnerships will continue to grow as communities feel increasingly supported in this time of crisis.”

-Lynne Miller
Deputy Representative for Operations,
UNHCR Beirut

Reaching the Most Vulnerable

CSP projects are implemented in the most vulnerable Lebanese communities.

Moving Forward

As important as these projects are, they are just the start. Support to public institutions, municipalities and hosting communities requires more robust engagement by a wider array of actors. To encourage that, since 2012 UNHCR and UNDP have chaired a working group on social cohesion and livelihoods, which brings humanitarian agencies together to focus on and coordinate efforts to respond to community needs. This working group also benefits from the guidance of the Ministry of Social Affairs and the Prime Minister's office.

In parallel, beginning in 2012, funding appeals for institutional and community support were also captured in the Syria Regional Response Plan. By 2013, 25 per cent of the funding appeal for Lebanon under the Plan was allocated for institutional and community support. These efforts will receive an added boost with the introduction of a resilience plan that, together with the refugee plan, will make up the comprehensive 2015/16 Plan.

“We have built strong links with development partners, including UNDP and donors, through our work to support host communities in Lebanon from the very early stage of the response. This is quite unique, and I am convinced that this paves the way for increased development-focused support to Lebanon.”

-Jean-Nicolas Beuze,
Assistant Representative for Coordination,
UNHCR Beirut

Education Projects

Providing support to Lebanese schools and students

During the 2013-14 school year, Lebanese schools enrolled more than 90,000 Syrian refugee children. Education CSPs have increased the capacity of the education system, enabling public schools to accept more students and improve the quality of education offered. Today, more students—both Lebanese and Syrian—are learning in child-friendly classrooms and have access to toilets, school supplies and new equipment.

In Brief

30
projects

\$2,840,000
investment

402,000
beneficiaries*

Need

Many Lebanese schools do not have enough desks, school supplies or equipment for all students. Many schools are in need of structural or civil repairs.

Interventions

- Rehabilitating classrooms and toilets
- Expanding schools
- Providing desks, school supplies and equipment
- Providing training for teachers and school administrators

Impact

More Lebanese and Syrian students have access to:

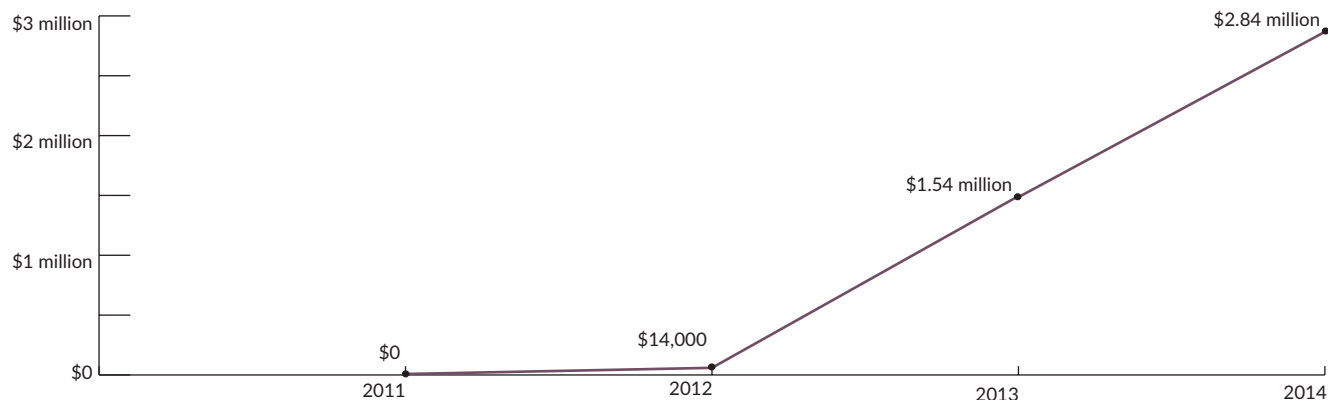

- Child-friendly classrooms
- Functioning toilets
- School supplies
- New facilities, including science and computer labs

Completed and Ongoing Projects

Governorate	# Projects	Investment
Akkar	5	\$269,000
North	8	\$250,000
Beirut & Mount Lebanon	4	\$727,000
Bekaa	9	\$260,000
Baalbek-El Hermel	3	\$35,000
South	-	-
El Nabatieh	1	\$28,000
Total	30	\$1,569,000

Cumulative Investment in Education CSPs (USD)

Bekaa • Support to Public Schools

2013

Project budget: \$200,000

Total beneficiaries: 35,000

Completed

In 2012, the Qab Elias public elementary school in the Bekaa Valley was in need of equipment and repair. With only 400 desks, the school was forced to turn away students in the area, referring children to schools further away from their homes. Without enough heaters, students were often cold during the winter months.

A year later, the school joined 20 others in the Bekaa Valley to launch a second shift of afternoon classes for Syrian refugee children. To support Qab Elias and other schools running double shifts, UNHCR, in partnership with UNDP, rehabilitated classrooms and bathroom facilities, and performed electrical work. Broken doors and windows were repaired, and new desks and heaters were delivered. This project has benefited students across classes and Qab Elias has been able to enrol more Lebanese and Syrian students.

“The support received from UNHCR allowed the school to operate at its full capacity,” said Mr. Hicham Qamar, the school’s principal. “The equipment we had, previously, could only cater for 400 students. Now, with the support we received, we’ve been able to enrol over 1,000 students.”

“The support received from UNHCR allowed the school to operate at its full capacity... with the support we received, we’ve been able to enrol over 1,000 students.”

-Mr. Hicham Qamar, principal
of the Qab Elias public
elementary school

Implemented by the United Nations Development Programme (UNDP)

Akkar Atika, El Arida, Henayder and Jdaidet El Joumeh • Science Labs

2013

Project budget: \$38,490

Total beneficiaries: 1,900

Completed

Students now have access to science labs and safety equipment. New chemistry and biology lab equipment and sinks allow students to complete their secondary curriculum in these subjects while learning in a hands-on environment.

Implemented by the United Nations Development Programme (UNDP)

Photo: New chemistry sinks, equipment and chemicals in the Hrar school in Mount Lebanon. D. Khamissy/2014.

Bazbina, Fnaydek, Hrar and Mishmish • School Rehabilitation

2013

Project budget: \$140,529

Total beneficiaries: 2,000

Completed

More children in Hrar, Mishmish, Fnaydek and Bazbina are now enrolled in school, thanks to rehabilitation provided by UNHCR, in partnership with UNDP. Schools received new classrooms and significant rehabilitation; broken windows were fixed, floors were paved, electrical work was performed and support structures were repaired. Students now learn in child-friendly classrooms and have access to working toilets.

Implemented by the United Nations Development Programme (UNDP)

Photos: Repaired support structures at the Fnaydek school in Mount Lebanon; Lebanese children study French in a Hrar public school. D. Khamissy/2014.

Fnaydek, Hrar and Kawace • Winterization Assistance

2013

Project budget: \$27,387

Total beneficiaries: 1,000

Completed

Four schools in the Akkar area received gas heaters, gas cylinders and generators. Lebanese and Syrian children at these schools now stay warm throughout the winter.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Qobayyat • Rehabilitation and Equipment

2013	Project budget: \$41,174	Total beneficiaries: 37,000	Completed
------	--------------------------	-----------------------------	-----------

Students in Qobayyat now have access to a science lab and a playground. The public school bathrooms and water systems were renovated, ensuring that students have access to working toilets and running water. Stoves were also repaired to ensure that classrooms stay warm throughout the winter.

Implemented by the Danish Refugee Council (DRC)

Wadi Khaled • Biology and Chemistry Equipment

2013	Project budget: \$21,700	Total beneficiaries: 36,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian students in three public schools in Wadi Khaled now have access to new biology and chemistry lab equipment, which they are using to complete their secondary school curriculum.

Implemented by the United Nations Development Programme (UNDP)

El Kobbah, North • University Study Centre

2013

Project budget: \$22,850

Total beneficiaries: 800

Completed

At the Lebanese University in Tripoli, students often had difficulty completing their studies because they did not have easy access to computers, printers or academic support. The University's Study Centre did not have enough equipment, and students were forced to rely on private computer centres at considerable cost.

In 2013, UNHCR, in partnership with DRC, supported the University's Study Centre by providing an academic assistant, free photocopy services, a computer lab, Wi-Fi, and free workshops with professional trainers. Now, Lebanese and Syrian students can use these resources to complete their studies without financial burden.

"I used to spend around 20,000 Lebanese pounds (USD 15) per day on photocopying, doing research on the internet, and printing materials," says Aysha, an 18-year-old Lebanese student. "That is the equivalent of 400,000 Lebanese pounds (USD 265) per month."

Her father is retired and struggles to cover living expenses and tuition for Aysha and her four siblings. Now she can access these services for free.

"I can use the money I save on transportation instead," she said. "It is now a lesser burden on my parents, who are able to pay for my siblings' education expenses."

"Now that these services are provided to me for free ... I can use the money I save on transportation instead, and it is now a lesser burden on my parents who are able to pay for my siblings' education expenses."

-Aysha, student

Implemented by the Danish Refugee Council (DRC)

Photo: Ayasha at the Lebanese University Study Centre.

D. Khamissy/2014

Students copy from the blackboard during a French class in Hrar, Northern Lebanon. For project details, see page 12.

El Beddaoui • Support for an Educational Centre

2013

Project budget: \$5,500

Total beneficiaries: 95,000

Completed

Students in El Beddaoui now have access to a new vocational training and education centre, where they can use computers, printers, and the internet. At the centre, Lebanese and Syrians study, work, and develop new skills in free vocational and educational workshops.

Implemented by International Relief and Development (IRD)

El Minnie-Dennie • Rehabilitation and Equipment for Public Schools

2013

Project budget: \$114,934

Total beneficiaries: 18,000

Completed

Lebanese and Syrian students in eleven public schools in the El Minnie-Dennie district now have access to rehabilitated classrooms, functioning toilets, and new chemistry and biology lab equipment.

Implemented by the United Nations Development Programme (UNDP)

Kfar Hazir • Educational Support for Vulnerable Lebanese Students

2014

Project budget: \$15,856

Total beneficiaries: 2,000

Ongoing

Vulnerable children in Kfar Hazir are receiving educational support, including textbooks, school supplies and equipment.

Implemented by Cooperazione Internazionale (COOPI)

Kfar Habou • Public School Bus

2013	Project budget: \$18,000	Total beneficiaries: 970	Completed
------	--------------------------	--------------------------	-----------

The Kfar Habou school received two school buses, each with the capacity of twelve seats. Now, more Lebanese and Syrian students are able to attend school every day.

Implemented by International Relief and Development (IRD)

Mrah Sraj • School Rehabilitation

2013	Project budget: \$40,250	Total new students: 280	Completed
------	--------------------------	-------------------------	-----------

More Lebanese and Syrian children now attend school in rehabilitated classrooms at the Mrah Sraj Secondary School.

Implemented by the United Nations Development Programme (UNDP)

Qalamoun • School Expansion

2013	Project budget: \$19,852	Total beneficiaries: 1,100	Completed
------	--------------------------	----------------------------	-----------

More Lebanese and Syrian students now have access to formal education, learning in a new classroom at the Qalamoun.

Implemented by International Relief and Development (IRD)

Tripoli • Science Laboratory

2014	Project budget: \$12,500	Total beneficiaries: 2,100	Ongoing
------	--------------------------	----------------------------	---------

Lebanese students now have access to a scientific research lab at the Youth Development Organization's Tripoli premises.

Implemented by the Danish Refugee Council (DRC)

Mount Lebanon

“In the year I have been in Lebanon, I have seen the positive impact CSPs can have on relations between communities. Although we have seen tensions rise at times, our strong partnership with local authorities and communities have allowed us to manage these.”

-Sara Baschetti, Head of Office, UNHCR Mount Lebanon

Aanout and Chhime • School Rehabilitation

2013	Project budget: \$277,788	Total beneficiaries: 600	Completed
------	---------------------------	--------------------------	-----------

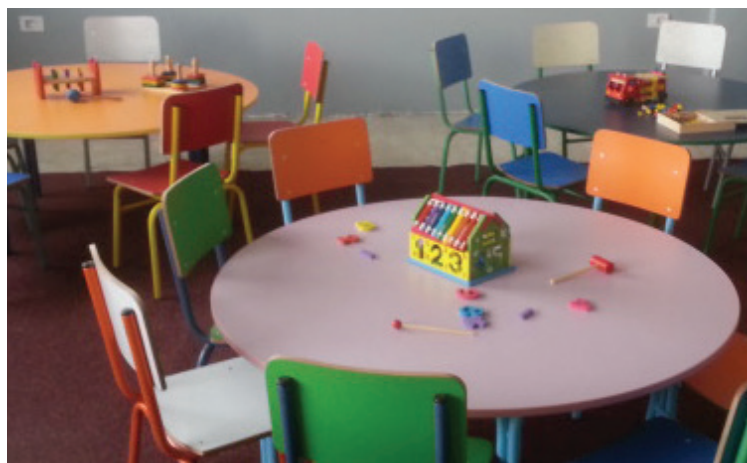

More Lebanese and Syrian students now have access to functioning toilets. School water and electrical systems were rehabilitated, ensuring that schools have running water and that classrooms are not further damaged by flooding and leaks.

Implemented by Global Communities Partners for Good (formerly CHF-Lebanon)

Ainbal, Aramoun, Barouk, Baysour, Beit Meri, Hrajel, Khraybeh and Mansourieh • School Rehabilitation

2013	Project budget: \$85,000	Total beneficiaries: 5,100	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian students at eight schools now have access to new equipment, including desks, chairs, cupboards, electric heaters, whiteboards, lockers, and computers. The Baysour school also received a generator. This equipment is expanding school capacity and improving the quality of education in Mount Lebanon schools.

Implemented by Terre des Hommes

Multiple Locations in Mount Lebanon and Beirut • Computers and Equipment

2013	Project budget: \$117,000	Total beneficiaries: 9,500	Completed
------	---------------------------	----------------------------	-----------

Lebanese and Syrian youth in nine communities have access to new educational equipment at their local Social Development Centre. UNHCR, in partnership with WCH, provided new computers, furniture, fax machines, photocopiers and other equipment. Young Lebanese and Syrians use this new equipment to study and develop new skills.

Implemented by War Child Holland (WCH)

Mount Lebanon • School Rehabilitation

2013

Project budget: \$247,000

Total beneficiaries: 3,400

Completed

In Mount Lebanon, twelve schools were in need of repair. Many students could not access toilets, and classrooms were not well-equipped for the students, missing desks, chairs, and other classroom essentials.

In 2013, twelve schools received significant repairs; damaged windows, doors, and electrical sockets were repaired, and leaks in the roof were fixed. UNHCR, in partnership with WCH, installed new toilets and washing facilities, and repaired water tanks. Schools also received new tables, chairs, and heating systems. Now Lebanese and Syrian students have access to functioning bathrooms and well-equipped classrooms.

“One single piece of equipment can facilitate running an activity and can ease the daily life of the teachers and assistants who were already struggling with the burdens of this emergency,” says Ms. Zeina Dib, Education Associate at UNHCR

“Schools had been waiting for years...Now both Lebanese and Syrian students enjoy a safe learning and child friendly environment.”

-Ms. Zeina Dib, Education Associate
UNHCR Beirut/Mount Lebanon

Implemented by War Child Holland (WCH)

Bekaa

Bar Elias • Computer Centre

2013

Project budget: \$6,340

Total beneficiaries: 510

Completed

Syrian and Lebanese resident build professional skills and study using new equipment provided to the local computer lab.

Implemented by the Danish Refugee Council (DRC)

Bar Elias • Computer Centre

2013

Project budget: \$5,000

Total beneficiaries: 1,500

Completed

Lebanese and Syrian youth are building professional skills at the public library's new computer centre. The library received fifteen computers and is now offering free courses on information and communications technology.

Implemented by the United Nations Development Programme (UNDP)

El Marj • Youth Computer Centre Equipment

2013

Project budget: \$9,950

Total beneficiaries: 16,000

Completed

Lebanese and Syrian students are now able to access computers and free internet at the public library. The library is offering professional skill-building courses free of charge to students.

Implemented by the United Nations Development Programme (UNDP)

Bekaa

El Marj • Technology Course for Youth

2013	Project budget: \$2,000	Total beneficiaries: 27,000	Completed
------	-------------------------	-----------------------------	-----------

Lebanese and Syrian students are developing new computer skills through information and communication technologies courses at the public library. Many young adults from the Bekaa struggle to find jobs because they lack computer skills; these courses equip Lebanese and Syrian youth with new, marketable skills.

Implemented by the United Nations Development Programme (UNDP)

El Souwairi • Public Library Computers

2013	Project budget: \$9,950	Total beneficiaries: 18,000	Completed
------	-------------------------	-----------------------------	-----------

Lebanese and Syrian students are using new computers and free internet access to study and work at the public library. The library is now offering professional skill-building courses free of charge to students.

Implemented by the United Nations Development Programme (UNDP)

Majdel Anjar • New Elementary School Classrooms

2012	Project budget: \$1,197	Total beneficiaries: 36,000	Completed
------	-------------------------	-----------------------------	-----------

More Lebanese and Syrian children are now enrolled in school, learning in rehabilitated classrooms at Al Manahel School. The school received new desks and the water system was rehabilitated, ensuring that students have access to functioning toilets and running water.

Implemented by the Danish Refugee Council (DRC)

Rawda • School Rehabilitation and Maintenance

2012	Project budget: \$6,420	Total beneficiaries: 12,000	Completed
------	-------------------------	-----------------------------	-----------

More Lebanese and Syrian students are enrolled in classes at Rawda Elementary School, learning in two new classrooms.

Implemented by the Danish Refugee Council (DRC)

Multiple Locations in Bekaa • Peace-Building Activities

2013	Project budget: \$19,620	Total beneficiaries: 1,000	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian children in twenty-two schools attended educational programmes on peace-building. These programmes provide students with an opportunity to practice responding to conflict and building healthy relationships.

Implemented by the United Nations Development Programme (UNDP)

Multiple Locations in Bekaa • Support to Public Schools

2013	Project budget: \$200,000	Total beneficiaries: 35,000	Completed
------	---------------------------	-----------------------------	-----------

See page 13 for project details.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Baalbek • Extracurricular Program for Children

2013	Project budget: \$5,000	Total beneficiaries: 130	Completed
------	-------------------------	--------------------------	-----------

Children enjoy music, drawing, theatre and crafts at a new after school programme in Baalbek. This programme is targeted towards vulnerable Lebanese and Syrian refugee children.

Implemented by the Danish Refugee Council (DRC)

Arsal • School Buses for Summer Educational Activities

2013	Project budget: \$20,000	Total beneficiaries: 68,000	Completed
------	--------------------------	-----------------------------	-----------

The municipality received a new school bus and can now provide transportation to more students. Lebanese and Syrian refugee students in Arsal are now able to attend summer educational activities.

Implemented by the United Nations Development Programme (UNDP)

Brital • Computer Centre for Youth

2013	Project budget: \$10,000	Total beneficiaries: 25,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian youth in Brital now have free access to computers and wireless internet at a new computer centre. Students use the centre to study, work and develop new skills.

Implemented by the United Nations Development Programme (UNDP)

El Nabatieh

Bent Jbeil • Three New Classrooms

2013	Project budget: \$30,800	Municipal funding: \$2,800	Total beneficiaries: 21,200	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

More Lebanese and students now have access to formal education, learning in three new classrooms provided to Tebnine Municipality.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Health Projects

Providing support to Lebanese health facilities

Lebanese public hospitals, medical dispensaries and emergency centres are responding to the needs of both Lebanese and Syrian populations. Through health CSPs, UNHCR and partners are working to ensure that medical facilities can provide quality medical care to all patients.

In Brief

24
projects

\$905,000
investment

500,000
beneficiaries*

Need

Many Lebanese public hospitals, medical dispensaries, and emergency centres are at maximum capacity and do not have enough equipment or supplies to treat Lebanese and Syrians who are in need of medical care.

Interventions

- Providing new equipment, such as respirators and incubators
- Installing generators
- Training medical staff
- Promoting health and hygiene in host communities

Impact

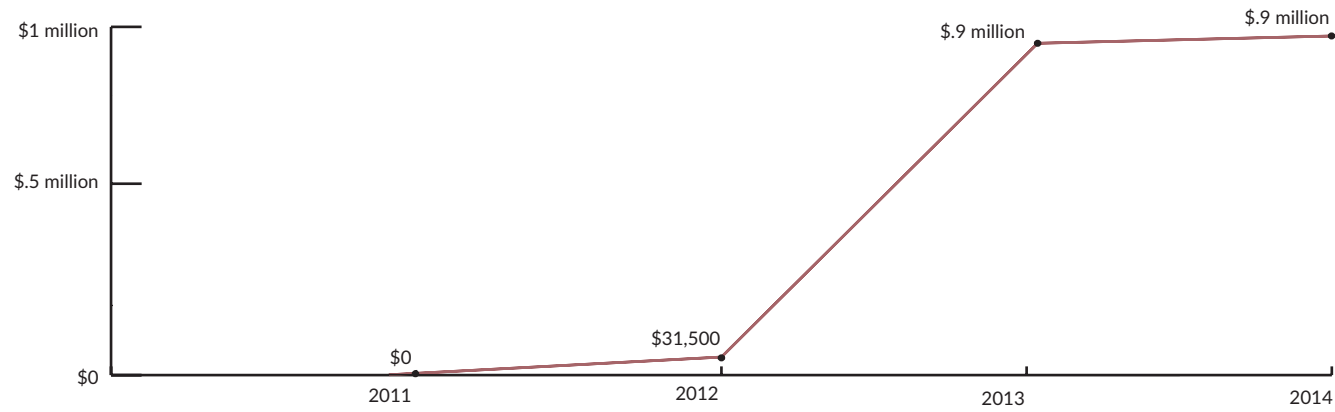

More Lebanese and Syrians have access to medical care, including emergency care and safe deliveries.

Completed and Ongoing Projects

Governorate	# Projects	Investment
Akkar	7	\$86,000
North	3	\$72,000
Beirut & Mount Lebanon	3	\$270,000

*Some locations and, within these, some individuals, have benefited from more than one CSP. Consequently, the beneficiary total may count some individuals more than once.

Chtaura, Bekaa • Medical Equipment

2013

Project budget: \$171,500

Total beneficiaries: 400,000

Completed

The Taanayel General Hospital receives one of the highest numbers of Syrian refugees in the Bekaa.

Its general director, Dr. Chadi Bader, says that over 450 deliveries occur on a monthly basis, over 50% of which are Syrian refugees. “The medical equipment and rehabilitation works provided were urgently needed, and without these, we wouldn’t have been able to receive and treat all Lebanese and Syrian patients who approach our hospital. With the tremendous rise of patients since the onset of the Syrian refugee crisis, our medical equipment was deteriorating fast. However, now, and thanks to enhanced and additional equipment and facilities, we are able to cope.”

“The medical equipment and rehabilitation works provided were urgently needed.”

-Dr. Chadi Bader, General Director of Taanayel General Hospital

Implemented by the International Orthodox Christian Charities (IOCC)

Halba • Laboratory Equipment

2013	Project budget: \$10,700	Total beneficiaries: 25,000	Completed
------	--------------------------	-----------------------------	-----------

Secours Populaire Libanais in Halba now offers medical care to more patients, using new blood testing machines provided by UNHCR in partnership with UNDP.

Implemented by the United Nations Development Programme (UNDP)

Halba • Dental Equipment for a Social Development Centre

2013	Project budget: \$12,500	Total beneficiaries: 25,000	Completed
------	--------------------------	-----------------------------	-----------

Both Lebanese residents and Syrian refugees now have access to low-cost, quality dental care at the Dental Care Clinic in Halba, which received dental and other medical equipment.

Implemented by the United Nations Development Programme (UNDP)

Machha • Dental Equipment for a Medical Dispensary

2012	Project budget: \$10,620	Total beneficiaries: 7,500	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrians now have access to quality dental care at the Machha medical dispensary. For many vulnerable Lebanese and Syrians, poor oral health contributes to other illnesses. With a new generator and dental chair, the Machha medical dispensary can now treat more patients.

Implemented by the Danish Refugee Council (DRC)

Qarha • Medical Dispensary Generator

2012	Project budget: \$9,400	Total beneficiaries: 2,000	Completed
------	-------------------------	----------------------------	-----------

More Lebanese and Syrians receive medical care from the dispensary, which now has a reliable source of electricity and can safely store medicine.

Implemented by the Danish Refugee Council (DRC)

Qobayyat • Equipment for a Blood Bank

2013	Project budget: \$24,830	Total beneficiaries: 81,200	Completed
------	--------------------------	-----------------------------	-----------

The Qobayyat blood bank received new laboratory equipment and is now able to operate more efficiently and treat more Lebanese and Syrian patients.

Implemented by the United Nations Development Programme (UNDP)

Qobayyat • Laboratory Equipment

2013	Project budget: \$11,300	Total beneficiaries: 8,000	Completed
------	--------------------------	----------------------------	-----------

The public hospital in Qobayyat is now able to offer patients life-saving blood transfusions during surgeries. The hospital received a plasma freezer, a blood centrifuge, and a blood group machine, as well as a urine testing machine.

Implemented by the United Nations Development Programme (UNDP)

Wadi Khaled • Medical Centre Generator

2012	Project budget: \$6,500	Total beneficiaries: 25,000	Completed
------	-------------------------	-----------------------------	-----------

More Lebanese and Syrians now receive medical treatment at the Social Development Centre, which now has a reliable source of electricity and can safely store medicine.

Implemented by the Danish Refugee Council (DRC)

“I cannot help but be inspired by the generosity of the people of Lebanon and am privileged to have the opportunity to work with communities and local authorities to address urgent needs of Lebanese and Syrians alike.”

-Monica Noro, Head of Office, UNHCR Tripoli

El Minnie • Medical Equipment

2013	Project budget: \$39,683	Total beneficiaries: 40,000	Completed
------	--------------------------	-----------------------------	-----------

Using new equipment, the primary health care centre in El Minnie now provides medical care to more Lebanese and Syrian patients.

Implemented by the United Nations Development Programme (UNDP)

Maloule • Repair of a Medical Clinic Electrical System

2013	Project budget: \$16,500	Total beneficiaries: 70,000	Completed
------	--------------------------	-----------------------------	-----------

The emergency clinic in Maloule now has a reliable source of power and is better able to treat patients. The electrical system was repaired, ensuring that the clinic can offer continuous care to patients.

Implemented by the Danish Refugee Council (DRC)

Tebbaneh • Women's Health Awareness

2013	Project budget: \$15,950	Total beneficiaries: 2,150	Completed
------	--------------------------	----------------------------	-----------

Vulnerable Lebanese and Syrian refugee women benefited from health-awareness activities and received hygiene kits.

Implemented by the United Nations Development Programme (UNDP)

Mount Lebanon and Beirut

El Mreyjeh, Bourj El Barajneh, Chiyah, Furn El Chebbak, Ghobeiry and Haret Hreik • Oral Health Promotion

2013	Project budget: \$81,500	Total beneficiaries: 6,000	Completed
------	--------------------------	----------------------------	-----------

Students in twenty-one public primary schools received oral hygiene kits. For many vulnerable Lebanese and Syrians, poor oral health contributes to other illnesses.

Implemented by the United Nations Development Programme (UNDP)

Bourj Hammoud and Baabda • Hygiene Kits

2013	Project budget: \$38,500	Total beneficiaries: 3,000	Completed
------	--------------------------	----------------------------	-----------

In three public schools and four private schools, students received hygiene kits.

Implemented by the United Nations Development Programme (UNDP)

Chiyah • Medical Equipment to a Public Health Clinic

2013	Project budget: \$150,000	Total beneficiaries: 20,000	Completed
------	---------------------------	-----------------------------	-----------

Now equipped with a generator, new examination tables, and medical supplies, the Chiyah medical centre is providing medical care to more Lebanese and Syrian patients.

Implemented by the United Nations Development Programme (UNDP)

Bekaa

Chtaura • Medical Equipment

2013	Project budget: \$171,500	Total beneficiaries: 400,000	Completed
------	---------------------------	------------------------------	-----------

For project details, see page 25.

Implemented by the International Orthodox Christian Charities (IOCC)

El Souwairi • Medical Equipment

2012	Project budget: \$5,000	Total beneficiaries: 1,600	Completed
------	-------------------------	----------------------------	-----------

More patients now receive medical care at the El Souwairi Medical Dispensary, which received a heart machine, computers and an aluminum door partition.

Implemented by the Danish Refugee Council (DRC)

Zahle • Equipment for a Physical Therapy Centre

2013	Project budget: \$15,000	Total beneficiaries: 100	Completed
------	--------------------------	--------------------------	-----------

More Lebanese residents and Syrian refugees are now treated at the physical therapy centre, which received two new machines for wax casting.

Implemented by the Danish Refugee Council (DRC)

Rashaya • Medical Equipment

2013	Project budget: \$98,000	Total beneficiaries: 75,000	Completed
------	--------------------------	-----------------------------	-----------

The Rashaya public hospital is the only governmental hospital serving both Rashaya and West Bekaa communities. The hospital was in need of equipment and was provided with new incubators, a respirator, a generator and a cooling system for the operation room. With this equipment, the hospital is able to offer medical care to more patients.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Arsal • Ambulance and Medical Equipment

2013	Project budget: \$37,000
Completed	Total beneficiaries: 85,000

Using a new ambulance and medical equipment, the medical centre now provides emergency medical care to more Lebanese and Syrian patients.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Baalbek • Ambulance Equipment

2013	Project budget: \$10,000	Total beneficiaries: 54,000	Completed
------	--------------------------	-----------------------------	-----------

The medical team in Dar El Fatwa can now offer emergency medical care to more Baalbek residents using new equipment supplied for the ambulance.

Implemented by the Danish Refugee Council (DRC)

Deir El Ahmar • Medical Equipment and Rehabilitation of Hospital Floor

2013	Project budget: \$70,000	Municipal funding: \$10,000	Total beneficiaries: 36,000	Completed
------	--------------------------	-----------------------------	-----------------------------	-----------

The Deir El Ahmar public hospital can now treat more Lebanese and Syrian patients. The hospital received new lead shields for x-ray rooms and the radiology floor was rehabilitated, opening up space in other areas where patients can now receive care.

Implemented by the United Nations Development Programme (UNDP)

El Qasr • Establishment of a Medical Laboratory

2013	Project budget: \$14,217	Total beneficiaries: 10,000	Completed
------	--------------------------	-----------------------------	-----------

The Public Health Centre in El Qasr now provided medical testing for Lebanese and Syrian patients using a medical laboratory established by UNHCR in partnership with UNDP.

Implemented by the United Nations Development Programme (UNDP)

Qaa • Ambulance and Medical Equipment

2013	Project budget: \$30,000	Total beneficiaries: 50,400	Completed
------	--------------------------	-----------------------------	-----------

Using a new ambulance and medical equipment, the facility now provides needed medical care to more Lebanese and Syrian patients.

Implemented by the United Nations Development Programme (UNDP)

El Nabatieh

El Nabatieh • Medical Equipment

2013	Project budget: \$30,000	Total beneficiaries: 60,500	Completed
------	--------------------------	-----------------------------	-----------

More Lebanese and Syrian patients now receive medical care at the El Nabatieh public hospital, which received needed equipment and supplies.

Implemented by the International Medical Corps (IMC)

South

Saida • Hospital Staff Training

2013	Project budget: \$6,400	Total beneficiaries: 296,000	Completed
------	-------------------------	------------------------------	-----------

Hospital staff at the Saida public hospital are now better equipped to care for patients, thanks to medical training provided by UNHCR in partnership with Caritas.

Implemented by Caritas

Livelihood and Self-Reliance Projects

Providing support to individuals, cooperatives and small-scale producers

UNHCR and partners are providing direct support to cooperatives, small-scale producers and individuals through livelihood and self-reliance projects. These projects provide equipment to farmers and agricultural cooperatives, connect small-scale producers to larger markets, and help Lebanese and Syrians develop professional skills, promoting the self-reliance of Lebanese and Syrian families.

In Brief

16
projects

\$2,397,000
investment

342,000
beneficiaries*

Need

Many skilled Lebanese and Syrians do not have a reliable source of income because they lack equipment, training or access to markets.

Interventions

- Creating and rehabilitating markets
- Providing equipment to agricultural cooperatives and small-scale producers
- Rehabilitating roads
- Providing training

Impact

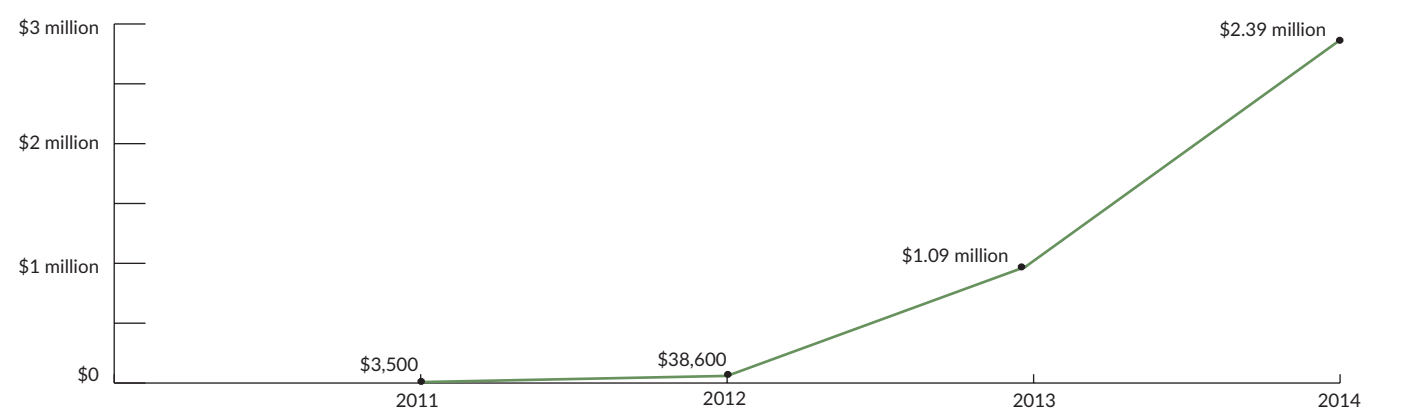

- Farmers and small-scale producers selling to more consumers
- Larger, better-equipped workforce
- More families with a source of income

Completed and Ongoing Projects

Governorate	# Projects	Investment
Akkar	7	\$139,000
North	-	-
Beirut & Mount Lebanon	2	\$40,000
Bekaa	1	\$250,000
Baalbek-El Hermel	5	\$579,000
South	-	-
El Nabatieh	1	\$80,000
Total	16	\$1,088,000

Cumulative Investment in Livelihood and Self-Reliance CSPs (USD)

El Marj, Bekaa • Rehabilitation of Market

2013

Project budget: \$250,000

Total beneficiaries: 105,000

Completed

At the El Marj market, shoppers buy produce for the evening meal, families take an afternoon stroll and friends meet over coffee in the cafeteria. The market is bustling.

In 2013, UNHCR partnered with UNDP and the municipality to rehabilitate the public market, performing groundwork to prevent flooding and expanding the area for stalls. Profit has increased by 150 per cent – a significant boost for local farmers and producers.

“This market is an important element of our town – it gives it character,” says Mr. Nazem Saleh, mayor of El-Marj. “It has been here for over 100 years and is cherished by all the citizens of our town. Thanks to these improvements, everyone can enjoy its assets... The rehabilitation works helped us get rid of the flooding and mud during rainy days.”

“This market is an important element of our town... Thanks to these improvements, everyone can enjoy its assets.”

-Mr. Nazem Saleh, mayor of El-Marj

Implemented by the United Nations Development Programme (UNDP)

Akroum • Generator and Equipment for a Cooperative

2011	Project budget: \$3,500	Total beneficiaries: 1,800	Completed
------	-------------------------	----------------------------	-----------

The Akroum agricultural cooperative received a new generator and equipment, enabling farmers to store, process and package their produce quickly and efficiently.

Implemented by the Danish Refugee Council (DRC)

Akroum • Empowering Potato Farmers

2013	Project budget: \$30,000	Total beneficiaries: 1,000	Completed
------	--------------------------	----------------------------	-----------

Potato farmers are expanding production and hiring more workers in North Lebanon. A new agreement between the European Union and Lebanon will allow potato farmers access to the European market. To ensure that farmers produce a high-quality crop, UNHCR, in partnership with DRC, provided certified seeds, technical training and crop testing. This initiative is providing new jobs for agricultural workers and is paving the way for new agricultural agreements.

Implemented by the Danish Refugee Council (DRC)

Akroum, Kfartoun, Mwanshe and Sehleh • Construction of Agricultural Roads

2013	Project budget: \$64,814	Municipal funding: \$7,501	Total beneficiaries: 14,500	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Farmers are using a new agricultural road in Akroum to easily access their fields. Uneven and eroded roads previously prevented farmers from transporting heavy equipment to their land. Today, farmers are using the new road to bring in equipment and supplies to rehabilitate their land.

Implemented by the Danish Refugee Council (DRC)

Bebnine • Rehabilitation of a Fish Market

2012	Project budget: \$18,600	Total beneficiaries: 20,000	Completed
------	--------------------------	-----------------------------	-----------

Fishermen once struggled to keep fish fresh at the Bebnine market, purchasing expensive bags of ice every day to preserve their catch. Fish stands were in need of repair, and melting ice dripped from stands, flooding the market. In 2012, UNHCR, in partnership with DRC, installed a protective glass wall around the fish market, rehabilitated fish stands, and built a new cooling room. These improvements have allowed the fishermen to sell to more fresh fish to Bebnine residents.

Implemented by the Danish Refugee Council (DRC)

El Fared • Construction of Agricultural Roads

2013	Project budget: \$12,790	Total beneficiaries: 1,700	Completed
------	--------------------------	----------------------------	-----------

Farmers in east El Fared can now easily access their land using agricultural roads built by UNHCR in partnership with DRC. Farmers are using the road to transport equipment to their fields.

Implemented by the Danish Refugee Council (DRC)

Qobayyat • Agriculture Tools for a Cooperative

2012	Project budget: \$4,600	Total beneficiaries: 10,000	Completed
------	-------------------------	-----------------------------	-----------

Farmers at the Qobayyat cooperative expanded agricultural production using seeds, fertilizer and equipment provided by UNHCR in partnership with DRC. Thanks to this support, Qobayyat farmers are selling higher-quality crops to more consumers.

Implemented by the Danish Refugee Council (DRC)

Tal Abbas • Generator, Fertilizer and Seeds for Farmers

2012	Project budget: \$11,900	Total beneficiaries: 1,350	Completed
------	--------------------------	----------------------------	-----------

Farmers at the Tal Abbas cooperative expanded agricultural production using seeds and fertilizer provided by UNHCR in partnership with DRC. The cooperative received a new generator, which provides power to the climate-controlled nursery. With these supplies and equipment, Tal Abbas farmers are producing high-quality crops and are selling to more consumers.

Implemented by the Danish Refugee Council (DRC)

Beirut and Mount Lebanon

Bourj Hammoud • Catering Programme for Women

2013

Completed

Project budget: \$20,000

Total beneficiaries: 20,000

Ten Lebanese and Syrian women are now employed by Mommy Made, a catering company. This programme provides women with the opportunity to support their families by cooking traditional Lebanese and Syrian meals.

Implemented by Première Urgence - Aide Médicale Internationale (PU-AMI)

Bourj Hammoud • Basic Skills Workshops

2013

Project budget: \$20,000

Total beneficiaries: 200

Completed

Lebanese and Syrian families benefit from workshops, including remedial classes for children and skill-building courses for women. Children receive educational opportunities, and women are given the tools to become more financially independent.

Implemented by Première Urgence - Aide Médicale Internationale (PU-AMI)

Bekaa

El Marj • Rehabilitation of a Market

2013

Project budget: \$250,000

Total beneficiaries: 105,000

Completed

For project details, see page 37.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Al Ain • Prevention of Flooding and Improvements to Water Supply

2013

Project budget: \$12,500

Total beneficiaries: 20,000

Completed

Local farmers now easily irrigate their fields using a rehabilitated natural spring site and irrigation water canals. These improvements have allowed farmers to increase production and decrease their reliance on expensive private sources of water.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Arsal • Cash for Work Programme

2013	Project budget: \$23,000	Total beneficiaries: 5,000	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian women are now employed through a cash for work project and are benefiting from management training. Five centres for bread production were created and provided with equipment; each now produces 50 kg of wheat every day to be sold locally.

Implemented by the United Nations Development Programme (UNDP)

Arsal, Deir El Ahmar, Dar El Wesaa, Taraya, Jdita, Sohmar and Mhaydthe • Equipment For Women's Agricultural Cooperative

2013	Project budget: \$43,000	Total beneficiaries: 500	Completed
------	--------------------------	--------------------------	-----------

Three hundred women at seven cooperatives received new equipment, allowing the cooperatives to expand production and hire more workers. The all-women food processing cooperatives manufacture a variety of high-quality niche products using Bekaa agricultural products.

Implemented by the United Nations Development Programme (UNDP)

Deir El Ahmar • Support for Wine Industry

2013	Project budget: \$450,000	Municipal funding: \$200,000	Total beneficiaries: 3,500	Completed
------	---------------------------	------------------------------	----------------------------	-----------

The wine industry provides a crucial source of income for Deir El Ahmar residents. The seven Deir El Ahmar villages received 10,000 certified grafted vine plants (five varieties). With these additional plants, the wine industry is expanding production, hiring 3,500 more workers, and contributing to the local economy.

Implemented by the United Nations Development Programme (UNDP)

Deir El Ahmar • Equipping a Packaging Centre

2013	Project budget: \$300,000
Completed	Municipal funding: \$50,000
	Total beneficiaries: 3,500

Eight hundred farmers in the Deir El Ahmar area are now able to store and package their produce in one central location. The packaging centre, established at the Deir El Ahmar agricultural cooperative, is equipped with roller elevators, washing equipment, exit belts and packing machines. Farmers are able to quickly package produce and move goods to market before they spoil, reducing waste and enabling farmers to sell to more customers.

Implemented by the United Nations Development Programme (UNDP)

South

“The team has done great work so far to respond to the needs of local authorities and populations. We are also committed to assisting municipalities and community organisations in preparing and proposing projects. No one knows better what their needs are and how to address them.”

-Marcel van Maastrigt, Senior Field Coordinator, UNHCR Tyre

Saida • Support for Jam Production

2013

Project budget: \$80,000

Total beneficiaries: 135,000

Completed

The jam factory in Saida was provided with new equipment and was able to reopen and hire new workers. Syrian refugees and Lebanese are benefiting from new jobs, and the factory is expanding production and contributing to the local economy.

Public Services Projects

Expanding the capacity of public services to bring services to more households

Communities have grown considerably, and municipalities in many areas need extra support to bring electricity, potable water, sanitation, and trash removal services to residents. UNHCR and partners are expanding existing systems, delivering equipment and providing training to local authorities to ensure that Lebanese and Syrians have access to basic services.

In Brief

144
projects

\$10,886,000
investment

5,960,000
beneficiaries*

THE NEED

Lebanese and Syrians need access to electricity, potable water, and sanitation and waste removal services.

INTERVENTIONS

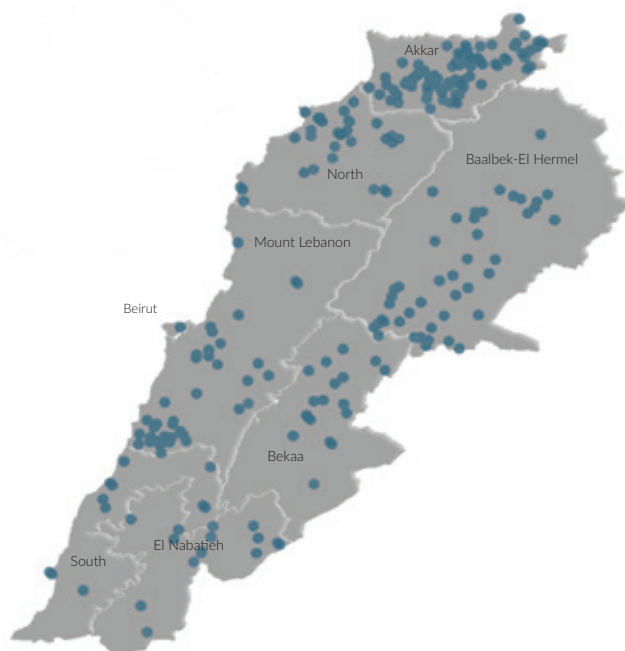

- Rehabilitating and expanding water networks
- Providing equipment for waste removal
- Rehabilitating and expanding sewage networks
- Providing generators to power homes and public buildings
- Installing public lighting

IMPACT

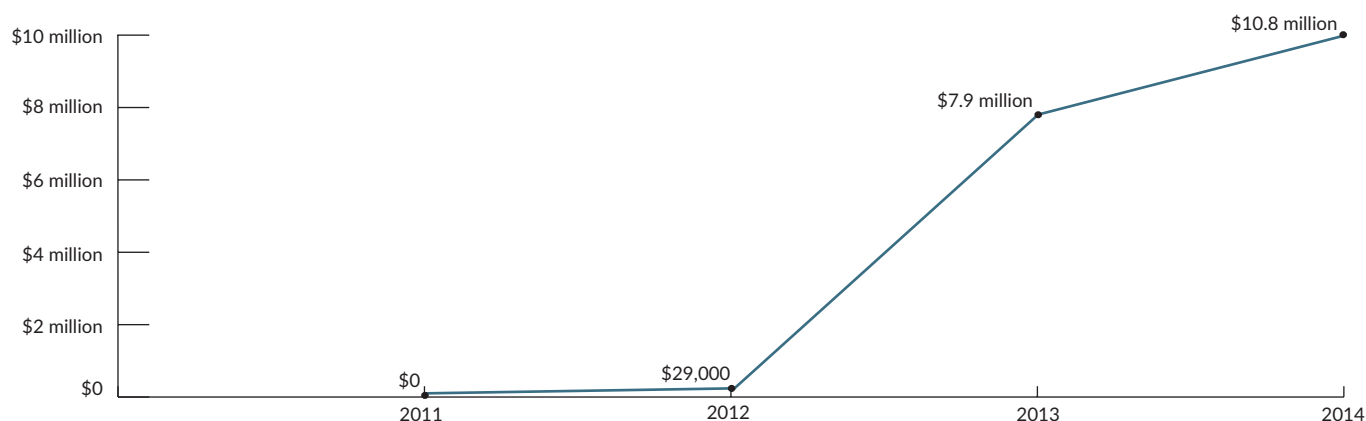

More Lebanese and Syrians have access to running water, electricity and sanitation services. Municipalities are better equipped to maintain public services.

Completed and Ongoing Projects

Governorate	# Projects	Investment
Akkar	35	\$2,235,000
North	28	\$1,198,000
Beirut & Mount Lebanon	17	\$2,714,000

*Some locations and, within these, some individuals, have benefited from more than one CSP. Consequently, the beneficiary total may count some individuals more than once.

Qab Elias, Bekaa • Garbage Collection

2013

Project budget: \$115,163

Total beneficiaries: 25,000

Completed

Qab Elias, a municipality which hosts 35,000 Lebanese residents in addition to over 25,000 registered Syrian refugees, needed more equipment to better manage the garbage accumulating in the region. As the population increased, random dumping sites appeared, and garbage was burned in the streets, posing a health risk to residents.

In 2013, Qab Elias received a garbage compactor for garbage collection. The garbage truck collects over 12 tons of garbage a day, and now a Lebanese citizen has a job as the truck's driver, providing additional income for him and his family. Sanitation conditions in the area have improved significantly.

“Out of the Qab Elias projects, this garbage compactor truck is one which has significantly benefited the municipality.”

-Mr. Maher Nader,
Qab Elias Municipality board member

Implemented by the United Nations Development Programme (UNDP)

Photo: Mr. Maher Nader with the garbage compactor

Akkar

“Akkar being the poorest governorate of Lebanon, many of the services provided by the CSPs were unavailable to the host community even before the arrival of the refugees. Knowing these projects make a difference in people’s lives and will remain for the Lebanese population once the refugees have returned home is a great motivator for us all.”

- Frederic Cussigh, Senior Field Coordinator, UNHCR Akkar

Abdeh, Bebnine, Berej El Arab, El Qarqaf, Majdala, Mar Touma, Mhamra and Qobbet Shamra • Waste Collection and Water Supply Improvements

2013	Project budget:	\$358,590
Completed	Total beneficiaries:	81,900

The Al Qayta Union received bobcat mini excavators, trucks with collapsible bins, large garbage truck, generator and water cisterns. The union is using these tools to make improvements to the water supply and collect waste from residents.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Adnket, Akroum, Bire, Chiklar, Deir Jannine, Monjex, Qobayyat and Wadi Khaled • Fire Brigade Training and Equipment

2013	Project budget: \$37,000	Municipal funding: \$7,000	Firefighters trained: 120	Completed
------	--------------------------	----------------------------	---------------------------	-----------

Previously the fire brigades in Qobayyat had little to no training and limited equipment. UNHCR, in partnership with ACTED, provided fire hoses, fire-proof vests, gloves, masks and boots, and trained twenty-five volunteer fire fighters. The residents of Qobayyat are now better protected from fire and volunteer fire fighters are less likely to suffer injuries while fighting fires.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Ain Yaaqoub • Generator for Public Lighting

2013	Project budget:	\$27,500
Completed	Total beneficiaries:	3,300

Streets stay lit at night in Ain Yaaqoub Municipality, powered by a new generator provided by UNHCR in partnership with ACTED. Safety conditions have improved for all residents, particularly women.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Ain Yaaqoub, Akkar El Atika, Ayyat, Bayno, Bazbina, Beit Mellet, Dasher El Lisina, El Borj, El Dawra, El Ouyoun, Illat, Jebrayel, Memne, Rahbeh, Tashe and Tekrit • Garbage Truck

2013	Project budget: \$107,800	Total beneficiaries: 70,000	Completed
------	---------------------------	-----------------------------	-----------

Al Joume Municipality received a waste compression truck and is now able to collect solid waste from more residents. Sanitation conditions in the area have improved.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Akkar • Borehole Rehabilitation

2013	Project budget: \$25,000	Total beneficiaries: 5,500	Completed
------	--------------------------	----------------------------	-----------

More Lebanese and Syrian families now have access to clean drinking water. UNHCR, in partnership with Concern Worldwide, rehabilitated an existing borehole, installing a metallic casing, one submersible water pump and a generator. The borehole was connected to a water tank and households in the community.

Implemented by Concern Worldwide

Akkar • Creation of a Borehole

2013	Project budget: \$40,000	Total beneficiaries: 9,500	Completed
------	--------------------------	----------------------------	-----------

The municipality now has access to underground sources of water, thanks to the creation of a new borehole. More Lebanese and Syrian residents now have access to a low-cost source of potable water.

Implemented by Concern Worldwide

Akkar

Akkar • Creation of a Borehole

2013

Project budget: \$97,500

Total beneficiaries: 8,500

Completed

The municipality now has access to underground sources of water, thanks to the creation of a new borehole. More Lebanese and Syrian residents now have access to a low-cost source of potable water.

Implemented by Concern Worldwide

Bebnine • Truck and Bobcat for Solid Waste Management and Road Maintenance

2013

Project budget: \$34,950

Total beneficiaries: 13,000

Completed

More Syrian refugees and Lebanese residents now have access to sanitation services and clean water. The municipality is using a bobcat and pick-up truck to maintain roads, collect solid waste, and improve water and sewage systems in the municipality.

Implemented by the United Nations Development Programme (UNDP)

Bsatine • Borehole Rehabilitation

2013

Project budget: \$51,000

Total beneficiaries: 5,500

Completed

Bsatine's borehole was rehabilitated, and the municipality now has improved access to underground sources of water. More residents now have access to clean drinking water.

Implemented by Concern Worldwide

Bzal, El Houwesh, El Qayte, El Qrayat, Fnaydek, Hrar, Mishmish and Shan • Bobcat and Bulldozer

2013	Project budget:	\$143,000
Completed	Total beneficiaries:	125,000

Residents are now able to reach roads more easily during the winter. The Jered Al Qayteh Union of Municipalities is using a new bobcat and bulldozer to clear snow from roadways, ensuring the public safety.

Implemented by the United Nations Development Programme (UNDP)

Daousse and Wadi Khaled • Three Generators

2013	Project budget: \$94,050	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

The municipality received three new generators and is able to provide more households in the Daousse area with a low-cost source of electricity.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

El Amayer • Rehabilitation of Sewage Pipeline

2013	Project budget: \$83,720	Total beneficiaries: 6,000	Completed
------	--------------------------	----------------------------	-----------

Al Almayer residents now have reliable access to sanitation services. UNHCR, in partnership with UNDP, installed 930 metres of sewage pipeline and 33 manholes, ensuring that the municipality is able to safely dispose of sewage. Sewage lines clog less frequently, and water sources are now protected from contamination.

Implemented by the United Nations Development Programme (UNDP)

El Amayer • Road Rehabilitation

2013	Project budget: \$35,231	Total beneficiaries: 6,500	Completed
------	--------------------------	----------------------------	-----------

A frequently-travelled road in Wadi Khaled was asphalted with 2,500 metres of water deflectors, ensuring that the road remains safe for all residents at all times.

Implemented by the Danish Refugee Council (DRC)

El Bire • Garbage Bins

2013	Project budget: \$34,000	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

Residents in a highly-littered area received garbage collection barrels. The municipality is now able to ensure that solid waste is collected from public areas in a timely manner.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

El Bire • Two Mini Excavators

2013	Project budget: \$86,660
Completed	Total beneficiaries: 1,600

El Bire Municipality is using two new mini-excavators to clear mud, snow and waste from roads, ensuring the safety of Lebanese and Syrian residents during the winter.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

El Fared • Public Lighting and Household Electricity

2013	Project budget: \$51,480	Total beneficiaries: 2,700	Completed
------	--------------------------	----------------------------	-----------

More Syrian refugee and Lebanese families have access to household electricity and no longer need to rely on expensive private sources of electricity. New public lighting has improved the safety of all residents in Fared Municipality.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

El Hissa • Rehabilitation of Sewage Canal

2013	Project budget: \$1,500
Completed	Total beneficiaries: 2,800

As the population in the area increased, the need for sanitation services quickly outpaced municipal capacity, and sewage and solid waste began to pollute the local river. UNHCR, in partnership with DRC, built a sewage canal, installing 1,500 metres of pipeline, 22 manholes, and a filtration system. This initiative is improving sanitation and ensuring the preservation of local resources.

Implemented by the Danish Refugee Council (DRC)

El Qantra, El Hakkour, El Nafisa, El Zawarib, Cheikh Mhamad, Cheikh Taba, Halba, Hayzouk, Jdaydet El Jouma, Minyara and Machha • Garbage Truck

2013	Project budget: \$213,950	Total beneficiaries: 40,000	Completed
------	---------------------------	-----------------------------	-----------

The municipality received garbage trucks and is now able to collect and dispose of solid waste from more residents in a timely manner. Garbage no longer blocks narrow streets and public spaces.

Implemented by the Agency for Technical Cooperation and Develop-

El Rama • New Drainage Channels

2013	Project budget: \$19,000	Municipal funding: \$5,200	Total beneficiaries: 3,300	Completed
------	--------------------------	----------------------------	----------------------------	-----------

New drainage channels were constructed in Al Rama Municipality, improving rain-water management.

Implemented by the Danish Refugee Council (DRC)

El Sindiyne • Two Generators

2013	Project budget: \$102,960	Total beneficiaries: 1,500	Completed
------	---------------------------	----------------------------	-----------

More households have access to electricity, provided by two new generators in Al Sindiyne Municipality. Fewer families need to rely on expensive private sources of fuel.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Fnaydek • Expansion of Water Network

2013	Project budget: \$45,000	Total beneficiaries: 10,000	Ongoing
------	--------------------------	-----------------------------	---------

More households in the Fnaydek area now have access to a low-cost source of potable water. UNHCR, in partnership with DRC, built a water pipeline and concrete water tank to connect houses to a local safe spring; residents are now less reliant on expensive private sources of water.

Implemented by the Danish Refugee Council (DRC)

Halba • Garbage Barrels

2013	Project budget: \$22,500	Total beneficiaries: 6,000	Completed
------	--------------------------	----------------------------	-----------

Residents in a highly-littered area received 200-litre garbage collection bins. The municipality is now able to collect solid waste from more residents and sanitation in the area has improved.

Implemented by the United Nations Development Programme (UNDP)

Kfartoun • Bobcat Equipment

2012	Project budget: \$18,700	Total beneficiaries: 1,500	Completed
------	--------------------------	----------------------------	-----------

Kfartoun Municipality is using a new bobcat with a hydraulic breaker, a pallet fork and broom to ensure the safety of residents during the winter.

Implemented by the Danish Refugee Council (DRC)

Khatt El Petrol • Garbage Barrels

2013	Project budget: \$4,938	Total beneficiaries: 2,400	Completed
------	-------------------------	----------------------------	-----------

Residents in a highly-littered area of Khatt El Petrol Municipality received 200-litre garbage collection bins. The municipality is able to safely store and dispose of more solid waste, and sanitation in the area has improved.

Implemented by the Danish Refugee Council (DRC)

Khatt El Petrol • Garbage Truck

2013	Project budget: \$34,950	Total beneficiaries: 1,900	Completed
------	--------------------------	----------------------------	-----------

Previously, the municipality did not have enough garbage trucks to collect solid waste, and garbage collected on public streets, blocking walkways and posing a safety hazard. UNHCR, in partnership with UNDP, provided the municipality with two solid waste trucks, enabling the municipality to collect solid waste from more residents in a timely manner.

Implemented by the United Nations Development Programme (UNDP)

Kherbet Daoud • Road Rehabilitation

2013	Project budget: \$24,642	Total beneficiaries: 18,000	Completed
------	--------------------------	-----------------------------	-----------

The expansion of a road in Kherbet Daoud has decreased traffic in the area and has allowed farmers to access their land more easily.

Implemented by the Danish Refugee Council (DRC)

Kherbet Daoud • Generator

2013	Project budget: \$51,480	Total beneficiaries: 1,300	Completed
------	--------------------------	----------------------------	-----------

A new generator in Kherbet Daoud Municipality is providing more Lebanese and Syrian households with a reliable, low-cost source of electricity.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Kousha • Mini Excavator

2013	Project budget: \$38,500	Total beneficiaries: 1,400	Completed
------	--------------------------	----------------------------	-----------

Kousha Municipality received a mini excavator, which is used to transport solid waste from the streets. Garbage no longer collects in public areas, and sanitation conditions in the area have improved.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Machta Hamoud • Borehole Rehabilitation

2013	Project budget: \$85,000
Completed	Total beneficiaries: 13,000

More Lebanese and Syrian families now have access to clean drinking water. UNHCR, in partnership with PU-AMI, rehabilitated an existing borehole, installing a metallic casing, one submersible water pump and a generator, and connecting the borehole to a water tank.

Implemented by Première Urgence - Aide Médicale Internationale (PU-AMI)

Mqaible • Retaining Wall for Road Safety

2013	Project budget: \$23,891	Total beneficiaries: 4,100	Completed
------	--------------------------	----------------------------	-----------

A newly-constructed retaining wall in Mqaible is preventing erosion and ensuring the safety of all who travel on the adjacent highway.

Implemented by the Danish Refugee Council (DRC)

Qobayyat • Garbage Truck

2013	Project budget: \$107,000	Total beneficiaries: 5,800	Completed
------	---------------------------	----------------------------	-----------

Previously, the municipality did not have enough garbage trucks to collect solid waste, and garbage collected on public streets, blocking walkways and posing a safety hazard. UNHCR, in partnership with Concern Worldwide, provided the municipality with two solid waste trucks, enabling the municipality to collect solid waste from more residents in a timely manner.

Implemented by Concern Worldwide

Qwueshra • Three Generators

2013	Project budget: \$94,050	Total beneficiaries: 1,200	Completed
------	--------------------------	----------------------------	-----------

Three new generators in the Qwueshra Municipality provide more families with reliable access to electricity.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Wadi Khaled • Public Street Lighting

2013	Project budget: \$16,550	Municipal funding: \$2,000	Total beneficiaries: 15,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

New public street lighting in Wadi Khaled has made the area safer for all residents.

Implemented by the Danish Refugee Council (DRC)

Wadi Khaled • Truck and Cistern for Water Disbursement

2013	Project budget: \$27,500	Total beneficiaries: 3,000	Completed
------	--------------------------	----------------------------	-----------

The municipality now collects and distributes water to residents using a cistern and truck, providing Lebanese and Syrian residents with a low-cost source of potable water.

Implemented by the United Nations Development Programme (UNDP)

North

Abou Samra • Plumbing and Construction Works

2013	Project budget: \$17,000	Total beneficiaries: 1,750	Completed
------	--------------------------	----------------------------	-----------

Previously, some public streets in Abou Samra did not drain properly and water and debris accumulated, posing a health and safety hazard to residents. In partnership with DRC and UTOPIA, UNHCR completed construction and plumbing works and refurbished street walls.

Implemented by the Danish Refugee Council (DRC)

Aito • Snow Removal Machine and Bulldozer

2013	Project budget: \$75,000	Total beneficiaries: 8,000	Completed
------	--------------------------	----------------------------	-----------

The municipality uses a bulldozer and a snowplough to clear the streets of snow during the winter, ensuring that Syrian refugees and Lebanese residents are not isolated after heavy snowfall.

Implemented by the United Nations Development Programme (UNDP)

North

Amioun, Batroun, Bcharre and Qalamoun • Garbage Barrels

2013	Project budget: \$19,800	Total beneficiaries: 100,000	Completed
------	--------------------------	------------------------------	-----------

Previously, there were not enough garbage bins to accommodate the population's trash. Garbage bins were often overflowing, and solid waste collected in public areas. Residents in these areas received new garbage barrels, and the municipalities of Koura, Batroun, Qalamoun and Bcharre can now more easily dispose of solid waste.

Implemented by International Relief and Development (IRD)

Ardeh, Beit Awkar, Beit Obeid and Harf Ardeh • Solid Waste Management

2014	Project budget: \$50,000	Total beneficiaries: 4,000	Ongoing
------	--------------------------	----------------------------	---------

Previously, Ardeh Municipality used one garbage collection truck to collect solid waste. As population increased, the single truck was unable to service all residents, and garbage piled up in the streets, posing a health threat. UNHCR, in partnership with CISP, provided a garbage compactor truck, as well as 300 plastic garbage containers for the main roads. More residents now have access to garbage collection services.

Implemented by Comitato Internazionale per lo Sviluppo dei Popoli (CISP)

Arjas • Installation of Public Lighting

2014	Project budget: \$44,000	Total beneficiaries: 50,000	Ongoing
------	--------------------------	-----------------------------	---------

New public lighting in Jdaideh, Arjas Highway and Zgharta has improved the safety of all residents.

Implemented by the United Nations Development Programme (UNDP)

Assoun • Garbage Truck

2013	Project budget: \$17,750	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

Previously, the municipality did not have the capacity to collect solid waste from all residents in a timely manner. The municipality is now using a new truck to remove solid waste from the streets.

Implemented by the United Nations Development Programme (UNDP)

Batroun • Improving Access to Safe Drinking Water

2014	Project budget: \$46,000	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

More Batroun residents now have access to safe drinking water. The North Lebanon Water Establishment is using a new booster pump, motor, and spare parts to repair the existing system and bring water to more residents.

Implemented by Comitato Internazionale per lo Sviluppo dei Popoli (CISP)

Batroun, Bcharre, Kkfar and Ras Masqua, • Solar Streetlight Systems

2014	Project budget: \$96,520	Total beneficiaries: 11,000	Ongoing
------	--------------------------	-----------------------------	---------

Residents are now able to travel safely on public streets at night, which are lit by new solar-powered lights. Local workers received training to install and maintain the system.

Implemented by Cooperazione Internazionale (COOPI)

Becharre • Snowplough

2013	Project budget: \$120,000	Total beneficiaries: 25,000	Completed
------	---------------------------	-----------------------------	-----------

Becharre is 1,500 metres above sea level and receives heavy snowfall during the winter. The town has 68 narrow streets, which during past winters were blocked by snow. An additional snowplough is helping the municipality ensure the safety of all residents during winter months.

Implemented by the United Nations Development Programme (UNDP)

Bkaa Safrine • Garbage Truck

2013	Project budget: \$27,100	Total beneficiaries: 20,000	Completed
------	--------------------------	-----------------------------	-----------

Previously, Bkaa Safrine did not have the capacity to collect waste from all residents, creating a health hazard. UNHCR, in partnership with UNDP, provided a garbage truck and bins, which the municipality now uses to collect waste from residents.

Implemented by the United Nations Development Programme (UNDP)

Bkarsouna • Solid Waste Truck

2013	Project budget: \$18,000	Total beneficiaries: 12,000	Completed
------	--------------------------	-----------------------------	-----------

The municipality is using a new solid waste truck to collect garbage from more residents. Previously, the municipality's single truck was unable to collect trash from all residents, and garbage burned on the streets and was left for many days before being collected. Sanitation and health in the area has improved.

Implemented by International Relief and Development (IRD)

Deir El Amar • Garbage Truck

2013	Project budget: \$55,000	Total beneficiaries: 20,000	Completed
------	--------------------------	-----------------------------	-----------

Deir El Amar Municipality is able to clear garbage from the streets using a new pickup truck. Sanitation in the area has improved.

Implemented by the United Nations Development Programme (UNDP)

North

Deir Nbouh • Truck With Cistern

2014	Project budget: \$42,000	Total beneficiaries: 1,300	Ongoing
------	--------------------------	----------------------------	---------

The municipality is delivering potable water to more residents using a truck equipped with a cistern. Syrian refugee and Lebanese residents now have a reliable, low-cost source of drinking water.

Implemented by the United Nations Development Programme (UNDP)

El Dennie • Bobcat and Backhoe Loader

2013	Project budget: \$138,820	Total beneficiaries: 60,000	Completed
------	---------------------------	-----------------------------	-----------

Previously, during the winter, streets flooded, snow blocked main roads, and internal roads eroded, preventing residents from reaching schools, work and basic services. Two new bobcat machines provided to the Federation of Dennie Municipalities allow residents to access roads and basic services despite heavy snowfall, ensuring that residents stay safe during the winter months.

Implemented by the United Nations Development Programme (UNDP)

El Minnie • Garbage Truck

2013	Project budget: \$23,800	Total beneficiaries: 90,000	Completed
------	--------------------------	-----------------------------	-----------

More residents now have access to garbage removal services. The municipality received two garbage trucks, and is able to remove waste from public areas in a timely manner.

Implemented by International Relief and Development (IRD)

El Minnie • Garbage Barrels

2013	Project budget: \$19,800	Total beneficiaries: 137,000	Completed
------	--------------------------	------------------------------	-----------

Residents in a highly-littered area received 295 heavy duty garbage containers, which are used to collect solid waste. The municipalities are now able to safely store and collect solid waste from residents. Health and sanitation conditions have improved.

Implemented by International Relief and Development (IRD)

El Minnie • Pickup Truck and Garbage Barrels

2013	Project budget: \$42,750	Total beneficiaries: 16,000	Completed
------	--------------------------	-----------------------------	-----------

Residents in a highly-littered area received garbage barrels, and the municipality received a pickup truck, which is used to collect garbage. More residents can now safely dispose of solid waste; health and sanitation have improved.

Implemented by the United Nations Development Programme (UNDP)

Hadchit-Becharre • Truck

2013	Project budget: \$18,000	Total beneficiaries: 2,000	Completed
------	--------------------------	----------------------------	-----------

Hadchit-Becharre is using a new truck to collect waste and make improvements to public services.

Implemented by International Relief and Development (IRD)

Hay El Tanak • Latrine Maintenance

2013	Project budget: \$10,000	Total beneficiaries: 2,000	Completed
------	--------------------------	----------------------------	-----------

Latrines in the Hay El Tanak informal settlement were drained and rehabilitated to ensure that residents have access to clean latrines. This initiative has improved health and sanitation conditions in the area.

Implemented by Comitato Internazionale per lo Sviluppo dei Popoli (CISP)

Kfar Chillane • Water Truck

2013	Project budget: \$11,322	Total beneficiaries: 5,000	Completed
------	--------------------------	----------------------------	-----------

More Syrian refugees and Lebanese residents now have access to potable water. The municipality is distributing water to residents using a new water truck.

Implemented by International Relief and Development (IRD)

Kfaraabida • Garbage Truck

2014	Project budget: \$24,000	Total beneficiaries: 2,000	Completed
------	--------------------------	----------------------------	-----------

Previously, Kfaraabida Municipality did not have the capacity to consistently collect waste from all residents, and garbage collected in public spaces, creating a public health risk. The municipality received a garbage truck and is now able to collect solid waste from more residents, ensuring that public spaces stay safe and clean for all residents.

Implemented by International Relief and Development (IRD)

Kfarledos • Solid Waste Truck

2014	Project budget: \$34,000	Total beneficiaries: 2,900	Ongoing
------	--------------------------	----------------------------	---------

Kfarledos Municipality now collects solid waste from more residents using a new solid waste truck, ensuring that trash does not collect in public areas. Health and sanitation conditions in the area have improved.

Implemented by the United Nations Development Programme (UNDP)

Qalamoun • Water Truck

2014	Project budget: \$26,000	Total beneficiaries: 20,000	Completed
------	--------------------------	-----------------------------	-----------

Deir El Amar Municipality is able to clear garbage from the streets using a new pickup truck.. Sanitation in the area has improved.

Implemented by International Relief and Development (IRD)

Syr • Solid Waste Compactor Truck

2014	Project budget: \$30,800	Total beneficiaries: 4,000	Ongoing
------	--------------------------	----------------------------	---------

Syr Municipality is using a new solid waste compactor truck to collect garbage from more residents. Sanitation in the municipality has improved.

Implemented by the United Nations Development Programme (UNDP)

North

Tabbaneh • Road Rehabilitation

2013	Project budget: \$5,800	Total beneficiaries: 15,000	Completed
------	-------------------------	-----------------------------	-----------

A frequently-trafficked road in Tabbaneh was rehabilitated, ensuring that the road remains usable for all residents. UNHCR, in partnership with DRC, completed sewage and plumbing works, painted walls and installed new lighting.

Implemented by the Danish Refugee Council (DRC)

Tripoli • Bobcat

2013	Project budget: \$64,000	Total beneficiaries: 7,000	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian residents are now less vulnerable during the winter months. The municipality received a bobcat, which is used to clear roads during the winter and to make other improvements to public services.

Implemented by the United Nations Development Programme (UNDP)

Tripoli • Waste Management Support

2013	Project budget: \$33,000	Total beneficiaries: 566,700	Completed
------	--------------------------	------------------------------	-----------

The Tripoli Municipality received two machines for solid waste management, allowing the Municipality to collect solid waste from more residents and clear solid waste from public areas.

Implemented by Oxfam

Zahrieh • Road Rehabilitation

2013	Project budget: \$5,800	Total beneficiaries: 15,000	Completed
------	-------------------------	-----------------------------	-----------

A frequently-trafficked road in Zahrieh was rehabilitated, ensuring that the road remains usable for all residents. UNHCR, in partnership with DRC, completed sewage and plumbing works, painted walls and installed new lighting.

Implemented by the Danish Refugee Council (DRC)

Zgharta • Two Trucks and New Garbage Bins

2013	Project budget: \$100,000	Total beneficiaries: 40,000	Completed
------	---------------------------	-----------------------------	-----------

Previously, the Zgharta Municipalities were unable to collect solid waste from all residents, and many areas were highly littered. With two new trucks, a garbage compactor and new garbage bins, the federation of municipalities is now able to collect more waste and ensure that public spaces stay clean and safe for all residents.

Implemented by the United Nations Development Programme (UNDP)

Mount Lebanon and Beirut

Aanout, Baasir, Barja, Daraya, Dalhoun, Jieh, Katermaya and Rmeileh • Water Pumps

2013	Project budget: \$269,554	Total beneficiaries: 33,000	Completed
------	---------------------------	-----------------------------	-----------

New water pumps are providing more Lebanese and Syrian residents with access to clean water.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Ain Dara, Beit Mery, Daichounieh, Debieh and Qornet El Hamra • Water Pumps

2013	Project budget: \$120,000	Water establishment funding: \$3,000	Total beneficiaries: 120,000	Completed
------	---------------------------	--------------------------------------	------------------------------	-----------

Previously, the municipality did not have the capacity to consistently pump water to all residents. The municipality received new water pumps and can now pump clean water to more residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Mount Lebanon and Beirut

Aley, Baabda, El Metn and Keserouane • Generators for Water Pump

2013

Project budget: \$282,986

Total beneficiaries: 900,000

Completed

More Syrian refugee and Lebanese families in Aley, Baabda, El Metn and Keserouane now have access to clean water. The municipality received sixteen new water pumps and can now pump water more consistently and for longer hours.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Baasir • Ground Water Reservoirs

2014

Project budget: \$181,521

Total beneficiaries: 3,500

Ongoing

New ground water reservoirs are bringing clean drinking water to more residents in Baasir.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Barja • Ground Water Reservoirs

2014	Project budget: \$212,969	Total beneficiaries: 1,500	Ongoing
------	---------------------------	----------------------------	---------

New ground water reservoirs in Barja are proving more residents with access to clean drinking water.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Batloun, Bedghan, Beirut, Botchay, Joun, Qobaii and Werhenyieh • Generators for Water Pumps

2013	Project budget: \$217,412	Total beneficiaries: 300,000	Completed
------	---------------------------	------------------------------	-----------

Previously, the municipality did not have enough power to pump water consistently to all residents. UNHCR, in partnership with UN-HABITAT, provided the municipality with eight new generators. Water is now pumped more consistently and for longer hours.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Borjein • Ground Water Reservoirs

2014	Project budget: \$196,102	Total beneficiaries: 2,250	Ongoing
------	---------------------------	----------------------------	---------

New ground water reservoirs in Barja are providing more residents with clean drinking water.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Chhime • Ground Water Reservoirs

2014	Project budget: \$178,939	Total beneficiaries: 17,500	Ongoing
------	---------------------------	-----------------------------	---------

New ground water reservoirs in Chhime are providing more residents with access to clean drinking water.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Mount Lebanon and Beirut

Chhime, Mghayriyeh, Siblin and Wardaniyeh • Generators for Water Pumps

2013

Project budget: \$125,000

Total beneficiaries: 21,000

Completed

Previously, the municipality did not have the capacity to pump water consistently to all residents. UNHCR, in partnership with Global Communities Partners for Good, provided new generators. Now more residents have consistent access to clean drinking water.

Implemented by Global Communities Partners for Good (formerly CHF-Lebanon)

Chhime • Bobcat and Truck

2013

Project budget: \$60,000

Municipal funding: \$5,000

Total beneficiaries: 40,000

Completed

Previously, Chhime Municipality did not have the capacity to collect waste from all residents, and solid waste blocked the narrow side streets of the town. UNHCR, in partnership with UN-HABITAT, provided a bobcat and pickup truck, which the municipality now uses to collect waste from residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Chouf • Sewage Collection Truck and Spare Parts

2013

Project budget: \$112,545

Total beneficiaries: 25,000

Completed

Previously, sewage frequently clogged sanitation lines, and the municipality did not have the equipment to quickly clear blockages. The municipality now uses a new sewage vacuum collection truck to clear sewage lines and improve sanitation for Lebanese and Syrian residents.

Implemented by the United Nations Refugee Agency (UNHCR)

Chouf and Keserouane • Two Snowploughs

2013

Project budget: \$88,000

Total beneficiaries: 315,000

Completed

The municipality uses two new snowploughs to clear the streets of snow during the winter, ensuring that Syrian refugees and Lebanese residents are not isolated by heavy snowfall.

Implemented by Terre Des Hommes

El Benay and Hay Al Shawi • Generator and Filter for Water Tank

2013	Project budget: \$42,000	Total beneficiaries: 3,000	Completed
------	--------------------------	----------------------------	-----------

More residents now have access to clean water, provided by a new generator and water filter.

Implemented by Terre Des Hommes

Jadra • Generators for Water Pumps

2013	Project budget: \$21,214	Municipal funding: \$2,000	Total beneficiaries: 15,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

The municipality and UNHCR co-funded the purchase of a generator and the municipality is now able to pump clean water to more residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Jbeil • Garbage Truck

2013	Project budget: \$82,000	Total beneficiaries: 33,000	Completed
------	--------------------------	-----------------------------	-----------

Jbeil Municipality now collects solid waste from more residents using two new garbage trucks, ensuring that public areas remain clean and safe for all residents.

Implemented by Terre Des Hommes

Mount Lebanon and Beirut

Rmeileh • Ground Water Reservoirs

2014	Project budget: \$201,863	Total beneficiaries: 2,400	Ongoing
------	---------------------------	----------------------------	---------

In 2014, new ground water reservoirs will bring clean drinking water to more residents in Rmeileh.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Sibline • Ground Water Reservoirs

2014	Project budget: \$329,696	Total beneficiaries: 11,000	Ongoing
------	---------------------------	-----------------------------	---------

More residents now have access to clean water, thanks to the construction of ground water reservoirs in Sibline.

Implemented by the Agency for Technical Cooperation and Development (ACTED)

Ain Kfarzabad • Solid Waste Truck

2013	Project budget: \$25,000	Municipal funding: \$5,000	Total beneficiaries: 6,000	Completed
------	--------------------------	----------------------------	----------------------------	-----------

The municipality is now able to collect solid waste from more residents in a timely manner, ensuring that garbage does not collect in public spaces and block narrow streets. UNHCR, in partnership with UNDP, provided a solid waste truck to Ain Kfarzabad Municipality in order to increase capacity and allow the municipality to respond to the needs of a larger population.

Implemented by the United Nations Development Programme (UNDP)

Bar Elias • Bobcat and Garbage Truck

2013	Project budget: \$70,000	Municipal funding: \$10,000	Total beneficiaries: 75,000	Completed
------	--------------------------	-----------------------------	-----------------------------	-----------

Bar Elias Municipality expanded and repaired the water and sanitation system using a bobcat and excavator. Lebanese and Syrian residents now have access to potable water and improved sanitation.

Implemented by the United Nations Development Programme (UNDP)

Bar Elias • Tractor with Rear Water Tank

2013	Project budget: \$15,000	Total beneficiaries: 10,000	Completed
------	--------------------------	-----------------------------	-----------

The municipality uses a new agriculture tractor with a rear wagon and water tank to make improvements to the municipality and deliver potable water to residents.

Implemented by the United Nations Development Programme (UNDP)

Bednayel • Generator

2013	Project budget: \$32,000	Total beneficiaries: 500	Completed
------	--------------------------	--------------------------	-----------

More Lebanese and Syrian residents in Mdoukha Municipality now have access to electricity, provided by a new generator.

Implemented by the Danish Refugee Council (DRC)

El Marj • Unblocking Sewage Lines

2013	Project budget: \$20,000	Total beneficiaries: 42,000	Completed
------	--------------------------	-----------------------------	-----------

Due to an increase in population, sewage lines in Al-Marj Municipality were often blocked, and the municipality did not have the equipment to clear lines in a timely manner. UNHCR, in partnership with UNDP, provided a gulley sucker truck, and septic waste is now removed in a timely manner.

Implemented by the United Nations Development Programme (UNDP)

El Marj • Bobcat

2013	Project budget: \$38,000	Municipal funding: \$6,000	Total beneficiaries: 16,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Al-Marj Municipality has repaired and expanded water and sanitation systems in the area, bringing potable water to more residents and using a new bobcat.

Implemented by the Danish Refugee Council (DRC)

Bekaa

El Marj • Garbage Barrels

2013	Project budget: \$5,000	Total beneficiaries: 20,000	Completed
------	-------------------------	-----------------------------	-----------

Previously, the municipality did not have enough garbage barrels to store solid waste, and garbage collected on public streets, blocking walkways and posing a safety hazard. UNHCR, in partnership with UNDP, provided the municipality with 685 200-litre garbage collection barrels, enabling the municipality to collect solid waste in a timely manner.

Implemented by the United Nations Development Programme (UNDP)

El Souwairi • New Agricultural Truck and Trailer

2013	Project budget: \$4,000	Total beneficiaries: 30,000	Completed
------	-------------------------	-----------------------------	-----------

The municipality uses a new agriculture truck and trailer to make structured improvements and collect solid waste.

Implemented by the United Nations Development Programme (UNDP)

Ghazzeh • Rehabilitation of a Parking Area

2013	Project budget: \$10,000	Total beneficiaries: 2,500	Completed
------	--------------------------	----------------------------	-----------

The municipality requested the rehabilitation of a parking lot in order to establish a distribution centre for Syrian refugees. Lebanese residents were hired to rehabilitate the area, and Syrian refugees now receive food and core relief items at the lot.

Implemented by the United Nations Development Programme (UNDP)

Haouche-el-Harimeh • Garbage Barrels

2013	Project budget: \$3,000	Total beneficiaries: 5,000	Completed
------	-------------------------	----------------------------	-----------

Residents in a highly-littered area received 300 200-litre garbage collection barrels. The municipality is now able to ensure that solid waste is collected from public areas in a timely manner.

Implemented by the United Nations Development Programme (UNDP)

Houch Harimeh, Ghazzeh, Khyara and Mansourah • Connecting Homes to Sewage Network

2013	Project budget: \$300,000	Municipal funding: \$50,000	Total beneficiaries: 18,500	Completed
------	---------------------------	-----------------------------	-----------------------------	-----------

2,500 more homes are now connected to the sanitation network and residents can now safely dispose of waste. To complete this project, UNHCR, in partnership with UNDP, temporarily employed 8,000 Lebanese and Syrian workers.

Implemented by the United Nations Development Programme (UNDP)

Joub Jannine • Expanding the Water Network

2013	Project budget: \$7,000	Total beneficiaries: 25,000	Completed
------	-------------------------	-----------------------------	-----------

UNHCR, in partnership with UNDP, installed one kilometre of pipe, expanding the water network and connecting more homes to potable water. More homes now have direct access to water and have decreased their reliance on expensive private sources of water.

Implemented by the United Nations Development Programme (UNDP)

Joub Jannine • Collection Trucks, Waste Bins and Truck

2013	Project budget: \$325,000	Union funding: \$75,000	Total beneficiaries: 164,000	Completed
------	---------------------------	-------------------------	------------------------------	-----------

Solid waste was collecting on the streets of Joub Jannine, blocking narrow roads and threatening the health of residents. In partnership with the El Bouhaira Union, UNHCR, in partnership with UNDP, provided a six-ton garbage collection trucks, 200 200-litre waste bins, and one pickup truck. This equipment has allowed the municipality to collect solid waste from more residents, improving the health and well-being of Syrian refugees and Lebanese in Joub Jannine.

Implemented by the United Nations Development Programme (UNDP)

Majdel Anjar • Bobcat

2013	Project budget: \$32,000	Total beneficiaries: 22,000	Completed
------	--------------------------	-----------------------------	-----------

Majdel Anjar Municipality uses a new bobcat provided to maintain and expand water and sewage systems in the area, improving sanitation and bringing potable water to Syrian refugee and Lebanese residents.

Implemented by the Danish Refugee Council (DRC)

Majdel Anjar • Rehabilitation of School Water System and Toilets

2012	Project budget: \$2,126	Total beneficiaries: 350	Completed
------	-------------------------	--------------------------	-----------

Lebanese and Syrian children at Majdal Secondary School now have access to functioning bathrooms, and their classrooms have been repaired. Repairs to the water system prevent future water damage to classrooms.

Implemented by the Danish Refugee Council (DRC)

Majdel Anjar • Garbage Barrels

2013	Project budget: \$5,000	Total beneficiaries: 23,300	Completed
------	-------------------------	-----------------------------	-----------

Residents in a highly-littered area received 500 200-litre garbage collection barrels. The municipality now collects solid waste from more residents in a timely manner.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Mansoura • Solid Waste Management Support

2013	Project budget: \$35,000	Municipal funding: \$3,000	Total beneficiaries: 3,000	Completed
------	--------------------------	----------------------------	----------------------------	-----------

Mansoura Municipality is now able to collect solid waste from more residents in a timely manner, using a garbage truck provided by UNHCR in partnership with DRC.

Implemented by the Danish Refugee Council (DRC)

Mdoukha • Providing Power for Water Pumps

2013	Project budget: \$40,000	Municipal funding: \$8,000	Total beneficiaries: 3,000	Completed
------	--------------------------	----------------------------	----------------------------	-----------

More residents now have reliable access to clean drinking water. The deep well pump that supplies the area with water now has a reliable source of electricity, running with an electrical booster and voltage regulator.

Implemented by the United Nations Development Programme (UNDP)

Midane Zahle • Solid Waste Management Support

2013	Project budget: \$20,000	Total beneficiaries: 91,000	Completed
------	--------------------------	-----------------------------	-----------

The Union of East Zahle uses a new bobcat provided by UNHCR to collect solid waste from refugee settlements and the surrounding area, improving health and sanitation conditions.

Implemented by the United Nations Development Programme (UNDP)

Rashaya • Bobcat

2013	Project budget: \$56,000	Municipal funding: \$24,000	Total beneficiaries: 40,000	Completed
------	--------------------------	-----------------------------	-----------------------------	-----------

As population increased, it became clear that more equipment would be needed during the winter to ensure the safety of Lebanese and Syrian residents. The municipality now uses a new bobcat to clear roads after heavy snowfall and to reforest the area.

Implemented by the Danish Refugee Council (DRC)

Taalbaya • Cistern

2013	Project budget: \$30,000	Total beneficiaries: 100,000	Completed
------	--------------------------	------------------------------	-----------

Syrian refugee and Lebanese residents now receive clean drinking water from a cistern provided to Taalabeya Municipality.

Implemented by the United Nations Development Programme (UNDP)

Terbol • Garbage Truck

2013	Project budget: \$55,000	Municipal funding: \$23,000	Total beneficiaries: 15,000	Completed
------	--------------------------	-----------------------------	-----------------------------	-----------

The municipality is now able to collect solid waste from more residents in a timely manner using a new garbage truck.

Implemented by the Danish Refugee Council (DRC)

Al Fekha • Garbage Truck

2013	Project budget: \$55,000	Municipal funding: \$23,000	Total beneficiaries: 17,000	Completed
------	--------------------------	-----------------------------	-----------------------------	-----------

Al Fekha Municipality is now able to collect solid waste from more residents using a new solid waste truck.

Implemented by the Danish Refugee Council (DRC)

Arsal • Garbage Truck

2013	Project budget: \$35,000	Total beneficiaries: 85,000	Completed
------	--------------------------	-----------------------------	-----------

Arsal is now able to collect garbage from more residents, using a new garbage truck provided by UNHCR in partnership with UNDP.

Implemented by the United Nations Development Programme (UNDP)

Arsal • Truck for Sewage Management

2013	Project budget: \$25,000	Total beneficiaries: 30,000	Completed
------	--------------------------	-----------------------------	-----------

Previously, the municipality lacked the capacity to remove septic waste from all homes in the area. To build capacity, UNHCR, in partnership with UNDP, provided a truck, which is used to dispose of septic waste. Sanitation conditions in the area have improved.

Implemented by the United Nations Development Programme (UNDP)

Arsal • Garbage Bins in a Highly-Littered Area

2012	Project budget: \$8,460	Total beneficiaries: 33,000	Completed
------	-------------------------	-----------------------------	-----------

Residents in a highly-littered area received 15 200-litre garbage collection barrels. Sanitation in the area has improved, and the municipality now has the capacity to safely store and dispose of solid waste.

Implemented by the Danish Refugee Council (DRC)

Baalbek City, Douris, Etaat and Houch Tal Safeh • Connecting Homes to the Sewage Network

2013	Project budget: \$300,000	Municipal funding: \$50,000	Total beneficiaries: 18,500	Completed
------	---------------------------	-----------------------------	-----------------------------	-----------

More homes in Baalbek were connected to the sanitation network, and residents can now safely dispose of waste.

Implemented by the United Nations Development Programme (UNDP)

Baalbek • Truck for Water Disbursement

2013	Project budget: \$15,000	Total beneficiaries: 125,000	Completed
------	--------------------------	------------------------------	-----------

The municipality is now able to make improvements to public services and collect waste from public areas using a new pick-up truck.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Baalbek • Solid Waste Management Support

2013	Project budget: \$10,000	Total beneficiaries: 30,000	Completed
------	--------------------------	-----------------------------	-----------

Previously, the municipality did not have enough garbage barrels to store solid waste, and garbage accumulated on public streets, blocking walkways and posing a safety hazard. The municipality received 1,000 200-litre garbage collection barrels to ensure that public areas remain safe and clean for all residents.

Implemented by the United Nations Development Programme (UNDP)

Baalbek • Garbage Truck

2013	Project budget: \$35,000	Municipal funding: \$5,000	Total beneficiaries: 114,300	Completed
------	--------------------------	----------------------------	------------------------------	-----------

Previously, the Baalbek municipalities did not have enough garbage trucks to collect solid waste from the streets in a timely manner. The Baalbek Federation of Municipalities received a solid waste truck, and garbage no longer collects in public areas.

Implemented by the United Nations Development Programme (UNDP)

Baalbek • Bobcat and Agriculture Truck with Rear Wagon

2013	Project budget: \$35,000	Municipal funding: \$5,000	Total beneficiaries: 504,000	Completed
------	--------------------------	----------------------------	------------------------------	-----------

Water and sanitation systems in the Baalbek Federation of Municipalities were in need of repair, but the Federation lacked the necessary equipment. UNHCR, in partnership with UNDP, provided the Federation with a bobcat, an agriculture truck with a rear wagon, a water tank and a sprayer. The Federation has rehabilitated the system, ensuring that clean water is delivered to Syrian refugee and Lebanese residents.

Implemented by the United Nations Development Programme (UNDP)

Bednayeel • Bobcat, Jackhammer and Snowblower

2013	Project budget: \$38,000	Municipal funding: \$6,000	Total beneficiaries: 16,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Bednayeel Municipality now clears snow from roads using a bobcat, jackhammer, and snowblower. This equipment was purchased by the municipality with support from UNHCR and DRC. Bednayeel residents are now safer during harsh winters and less likely to be isolated by heavy snowfall.

Implemented by the Danish Refugee Council (DRC)

Brital • Solid Waste Truck

2013	Project budget: \$35,000	Municipal funding: \$5,000	Total beneficiaries: 46,800	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Sanitation has improved in the Brital Municipality; garbage is now collected from more residents and disposed of by the municipality, thanks to a new garbage truck provided by UNHCR in partnership with UNDP.

Implemented by the United Nations Development Programme (UNDP)

Chaat • Truck for Municipal Maintenance

2013	Project budget: \$15,000	Total beneficiaries: 15,000	Completed
------	--------------------------	-----------------------------	-----------

Solid waste is now collected from more residents in a timely manner, using a new truck. The municipality uses the vehicle to make improvements to public services and dispose of solid waste.

Implemented by the United Nations Development Programme (UNDP)

Deir El Ahmar • Garbage Barrels

2013	Project budget: \$18,000	Total beneficiaries: 1,500	Completed
------	--------------------------	----------------------------	-----------

Previously, garbage blocked narrow public streets in Deir El Ahmar because there were not enough garbage barrels for all residents. The municipality was provided with garbage barrels to ensure that public spaces remain clean and safe for Lebanese and Syrian residents.

Implemented by the Danish Refugee Council (DRC)

El Hermel • Solid Waste Truck

2013	Project budget: \$38,000	Municipal funding: \$8,000	Total beneficiaries: 85,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Previously, garbage collected on the streets of the municipality, blocking public streets, because the municipality lacked the capacity to collect waste from all residents in a timely manner. UNHCR, in partnership with UNDP, provided the municipality with a garbage truck to ensure that public spaces remain clean and safe for Lebanese and Syrian residents.

Implemented by the United Nations Development Programme (UNDP)

El Khoder, El Khreybe, Janta, Maaraboun, Nabi Sheet, Sarhin El Fawka and Sarhin El Tahta • Solid Waste Truck

2013	Project budget: \$35,000	Municipal funding: \$5,000	Total beneficiaries: 78,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Previously, garbage accumulated on the streets of the municipalities, blocking public streets because the municipality lacked the capacity to collect waste from all residents in a timely manner. The municipalities received a garbage truck to ensure that public spaces remain clean and safe.

Implemented by the United Nations Development Programme (UNDP)

Labweh • Garbage Truck with Rear Water Tank

2013	Project budget: \$20,000	Total beneficiaries: 23,600	Completed
------	--------------------------	-----------------------------	-----------

More residents now enjoy clean public streets and sidewalks. The municipality collects solid waste from more residents and cleans streets using a solid waste truck with a rear water tank provided by UNHCR in partnership with UNDP.

Implemented by the United Nations Development Programme (UNDP)

Nabi Sheet • Garbage Barrels

2013	Project budget: \$1,000	Total beneficiaries: 12,000	Completed
------	-------------------------	-----------------------------	-----------

Residents in a highly-littered area now are able to dispose of their garbage in 200-litre garbage collection barrels. The municipality received 108 barrels and is now able to collect waste from more residents.

Implemented by the United Nations Development Programme (UNDP)

Baalbek-El Hermel

Multiple Locations in Baalbek-El Hermel • Garbage Barrels

2013

Project budget: \$10,000

Total beneficiaries: 200,000

Completed

Previously, municipalities did not have enough garbage barrels to store solid waste, and garbage collected on public streets, blocking walkways and posing a safety hazard. UNHCR, in partnership with UNDP, provided 1,000 200-litre garbage collection barrels to the municipality in order to ensure that public areas remain safe and clean for all municipality residents.

Implemented by the United Nations Development Programme (UNDP)

Multiple Locations in Northern Baalbek • Solid Waste Truck

2013

Project budget: \$35,000

Municipal funding: \$5,000

Total beneficiaries: 76,000

Completed

Residents in the North Baalbek Municipalities now have access to garbage removal services. The municipalities collect solid waste from more residents using a garbage truck.

Implemented by the United Nations Development Programme (UNDP)

El Nabatieh

Alkalaa, Bint Jbeil, Eklim El Tofah, El Arkoub, El Chkeif, El Hasbane, Jabl El Rihan, Jabl Amel, Jezzine, Sehel El Zehrane, Sour • 29 Machines

2013

Project budget: \$723,060

Total beneficiaries: 1,030,000

Completed

Twelve communities received machines and equipment for the maintenance and construction on public roads and waste management systems. UNHCR, in partnership with UN-HABITAT, provided twenty-nine machines in total. These included sweeper trucks, skid steer loaders, pick up tippers, trucks with cranes, back hoe loaders, and other machines. Municipalities are using these machines to improve their communities and bring public services to more residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

El Nabatieh

Bent Jbeil • Solar Light System

2013	Project budget: \$18,000	Municipal funding: \$2,000	Total beneficiaries: 10,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

The Qaem Maqam office in Bent Jbeil is now lit by a solar-powered system, which staff have been trained to operate and maintain.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Bourj el Mlouk, Deir Mimas, Kfarkela and Klayaa • Generator

2013	Project budget: \$125,000	Municipal funding: \$5,000	Total beneficiaries: 8,000	Completed
------	---------------------------	----------------------------	----------------------------	-----------

More residents now have access to a low-cost source of electricity, thanks to an additional generator, which has increased the capacity of the municipalities' electrical system.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Chebaa • Snowplough

2013	Project budget: \$80,000	Total beneficiaries: 40,000	Completed
------	--------------------------	-----------------------------	-----------

As population increased, it became clear that more equipment would be needed during the winter to ensure the safety of Lebanese and Syrian residents. The municipality now uses a new snowplough to clear roads after heavy snowfall.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Chebaa • Garbage Truck

2013	Project budget: \$30,090	Total beneficiaries: 40,000	Completed
------	--------------------------	-----------------------------	-----------

Chebaa Municipality is using a new garbage truck to clear trash from the public streets and improve sanitation in the area.

Implemented by the United Nations Development Programme (UNDP)

El Nabatieh • Water Pump and Filter

2013	Project budget: \$49,000	Municipal funding: \$4,000	Total beneficiaries: 20,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

A new water pump and filter are bringing clean water to more Lebanese and Syrian residents in Kfarreman Municipality.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

El Nabatieh • Sweeper Truck

2013	Project budget: \$25,000	Total beneficiaries: 30,000	Completed
------	--------------------------	-----------------------------	-----------

The municipality is using a new sweeper truck to clear roads of trash and improve sanitation conditions in the area.

Implemented by Social, Humanitarian, Economical Intervention for Local Development (SHIELD)

El Nabatieh

Hibbariyeh • Garbage Truck

2013	Project budget: \$20,000	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

The municipality is now able to collect solid waste from more residents using a new solid waste truck. Garbage no longer burns on the streets, and sanitation in the area has improved.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Kfarchouba • Garbage Truck

2013	Project budget: \$28,000	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

Previously, the municipality did not have enough garbage trucks to offer trash collection service to all residents, and garbage collected on public streets, posing a safety hazard. Kfarchouba Municipality is now using a new garbage truck to collect solid waste from more residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Tebin • Water Filtration System

2013	Project budget: \$10,000	Total beneficiaries: 25,000	Completed
------	--------------------------	-----------------------------	-----------

More residents have access to clean drinking water in the Tebnin area. New water filters for the Ain Elwarde well ensure that water is safe for all residents. This improvement has decreased the need for private sources of water.

Implemented by the Social, Humanitarian , Economical Intervention for Local Development (SHEILD)

South

Aakbiyeh and Baisariyeh • Garbage Bins

2013	Project budget: \$10,000	Total beneficiaries: 100,000	Completed
------	--------------------------	------------------------------	-----------

Residents in a highly-littered area received 20 garbage containers. Solid waste is now collected from more residents, and sanitation in the area has improved.

Implemented by Première Urgence - Aide Médicale Internationale (PU-AMI)

South

Ain Baal • Garbage Truck

2013	Project budget: \$135,000	Municipal funding: \$11,800	Total beneficiaries: 27,000	Completed
------	---------------------------	-----------------------------	-----------------------------	-----------

Hasbaya and Ain Baal Municipalities received new garbage trucks. More residents now benefit from trash collection services, and public areas are no longer polluted by trash.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Ain Baal • Garbage Bins

2013	Project budget: \$30,000	Total beneficiaries: 20,000	Completed
------	--------------------------	-----------------------------	-----------

Residents in a highly-littered area of Ain Baal received garbage bins and are now able to dispose of solid waste, improving sanitation in the area.

Implemented by the United Nations Development Programme (UNDP)

Jezzine • Solar Public Lights

2013	Project budget: \$236,000	Municipal funding: \$12,000	Total beneficiaries: 62,000	Completed
------	---------------------------	-----------------------------	-----------------------------	-----------

A solar-powered system now lights the streets of Rihan, Aramta, and Tyre Municipalities. The new public lights have made the streets safer for all residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Kawthariyet Seyyed • Water Truck

2013	Project budget: \$49,400	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

Kawthariyet Seyyed Municipality is able to distribute water to more Lebanese and Syrian residents using a new water reservoir truck.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

South

Mount Rihan • Solid Waste Truck with Sweeper

2013	Project budget: \$35,200	Total beneficiaries: 49,000	Completed
------	--------------------------	-----------------------------	-----------

More Syrian refugee and Lebanese residents have access to trash collection service in the Mount Rihan area. The Municipality is using a new sweeper truck to collect solid waste and improve sanitation conditions in the area.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Saida • Water Supply Management

2013	Project budget: \$100,000	Municipal funding: \$10,000	Total beneficiaries: 100,000	Completed
------	---------------------------	-----------------------------	------------------------------	-----------

The Union of Municipalities of Sahel Zahrani received equipment and materials, which are used to repair and expand the water network. More Lebanese and Syrian residents now have access to clean water at a low cost.

Implemented by the United Nations Development Programme (UNDP)

Saida • Garbage Barrels

2013	Project budget: \$25,000	Total beneficiaries: 70,000	Completed
------	--------------------------	-----------------------------	-----------

Saida Municipality received 50 garbage bins, enabling the municipality to collect and dispose of garbage safely and efficiently. Sanitation in the municipality has improved.

Implemented by the United Nations Development Programme (UNDP)

Tyre • Garbage Bins

2013	Project budget: \$31,000	Municipal funding: \$3,000	Total beneficiaries: 70,000	Completed
------	--------------------------	----------------------------	-----------------------------	-----------

Residents in Ain Baal Municipalities received plastic and steel garbage bins. The municipality is now able to collect solid waste from more residents in a timely manner, ensuring that public areas remain free of trash.

Implemented by the United Nations Development Programme (UNDP)

Tyre • Garbage Bins

2013	Project budget: \$28,000	Total beneficiaries: 50,000	Completed
------	--------------------------	-----------------------------	-----------

Previously, the municipality did not have enough garbage barrels to store solid waste, and garbage collected on public streets, blocking walkways and posing a safety hazard. The municipality received 1,000 200-litre garbage collection barrels in order to ensure that public areas remain safe and clean for all residents.

Implemented by the United Nations Human Settlements Programme (UN-HABITAT)

Zahrani • Water Network Maintenance Centre

2013	Project budget: \$78,266	Total beneficiaries: 100,000	Completed
------	--------------------------	------------------------------	-----------

A new water network maintenance centre is working to solve problems with the water and sewage network. UNHCR, in partnership with UNDP, established the centre to ensure that Lebanese and Syrian residents are able to access sanitation services and clean water.

Implemented by the United Nations Development Programme (UNDP)

Zahrani • Garbage Truck

2013	Project budget: \$30,091	Total beneficiaries: 100,000	Completed
------	--------------------------	------------------------------	-----------

More residents in the Zahrani area now have access to garbage removal services, and sanitation in the area has improved. The municipalities collect solid waste from more residents using a garbage truck.

Implemented by the United Nations Development Programme (UNDP)

Social Cohesion Projects

Creating community spaces for Lebanese and Syrians

UNHCR and partners are creating opportunities for Lebanese and Syrian families to relax, learn, and play together. Community centres across Lebanon are receiving new equipment and rehabilitation through social cohesion CSPs. These projects create opportunities for Lebanese and Syrians to meet as neighbours and friends.

In Brief

64
projects

\$7,883,000
investment

1,159,000
beneficiaries*

THE NEED

Tension may naturally arise as communities adjust to sharing resources. Lebanese and Syrians need opportunities to build positive relationships in order to defuse conflict.

INTERVENTIONS

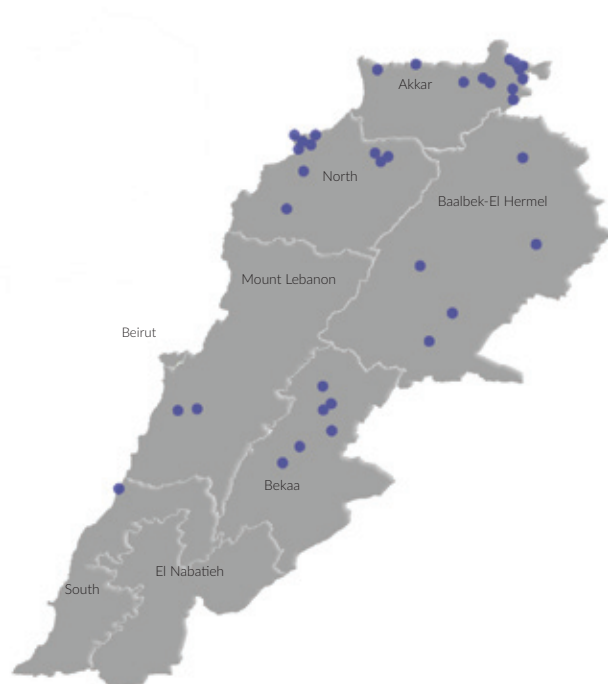

- Rehabilitating community centres and Social Development Centres (SDCs)
- Providing sporting equipment, computers, and other resources to public facilities
- Hosting community activities
- Ensuring that community spaces are accessible for all residents

IMPACT

More Lebanese and Syrians have access to running water, electricity and sanitation services. Municipalities are better equipped to maintain public services.

Completed and Ongoing Projects

Governorate	# Projects	Investment
Akkar	15	\$200,000
North	17	\$477,000
Beirut & Mount Lebanon	4	\$94,000
Bekaa	10	\$432,000
Baalbek-El Hermel	15	\$139,000
South	3	\$56,000
El Nabatieh	-	-
Total	64	\$1,398,000

Cumulative Investment in Social Cohesion CSPs

Multiple locations in Akkar • Sporting Equipment

2013

Project budget: \$35,596

Total beneficiaries: 59,000

Completed

The local community centre is full of children and teenagers, eagerly chattering about upcoming games and kicking a football. Both Lebanese and Syrians participate on a football team, and three times a week, they gather together to practice and to play games.

The football team, as part of a youth empowerment programme created by a joint partnership between UNHCR and the Danish Refugee Council (DRC), has created a friendly environment for Lebanese and Syrians to enjoy a common love for the game. With new sporting equipment, the players can now participate in more games and build more rapport between the different communities, pleasing their supportive fans in both Syria and Lebanon.

Implemented by Right To Play

Aidamoun • Library Renovation

2011	Project budget: \$8,600	Total beneficiaries: 5,700	Completed
------	-------------------------	----------------------------	-----------

More residents are able to use the newly renovated public library. The library received new furniture, a projector, a screen and new computers.

Implemented by the Danish Refugee Council (DRC)

Anadekt • Community Centre Renovation

2012	Project budget: \$4,150	Total beneficiaries: 8,100	Completed
------	-------------------------	----------------------------	-----------

Lebanese and Syrian residents have access to new bathroom facilities at the community centre and public garden. The centre serves as a gathering place for Lebanese and Syrian families. With new bathrooms, the centre is accessible to more families.

Implemented by the Danish Refugee Council (DRC)

Bani Sakher • Equipment for Bani Sakher Mosque

2013	Project budget: \$16,368	Total beneficiaries: 800	Completed
------	--------------------------	--------------------------	-----------

Lebanese and Syrian families often gather at the Bani Sakher mosque to relax, socialize and enjoy community events. Now more families can attend events at the mosque, which was provided new equipment and furniture.

Implemented by the Danish Refugee Council (DRC)

El Aaboudiye • Equipment of Mosque Hall

2012	Project budget: \$8,830	Total beneficiaries: 7,900	Completed
------	-------------------------	----------------------------	-----------

More Lebanese and Syrian families are now able to attend community events at the El Aaboudiye Mosque Hall, which received new equipment, including furniture.

Implemented by the Danish Refugee Council (DRC)

El Bire • Support for Mosque Hall

2012	Project budget: \$6,500	Total beneficiaries: 8,500	Completed
------	-------------------------	----------------------------	-----------

Lebanese and Syrian families enjoy community events at the El Bire mosque, which now has a reliable source of electricity provided by a generator.

Implemented by the Danish Refugee Council (DRC)

El Kneisse • Equipment for a Mosque Hall

2012	Project budget: \$11,335	Total beneficiaries: 2,000	Completed
------	--------------------------	----------------------------	-----------

The Kneisse Mosque Hall serves as a central gathering point for Lebanese and Syrian families in the area. Now more community members can enjoy community events at the mosque, which was provided new furniture.

Implemented by the Danish Refugee Council (DRC)

Jabal Akroum • Rehabilitation of a City Hall

2013	Project budget: \$42,905	Total beneficiaries: 2,000	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian families enjoy recreation and community events at the newly-renovated city hall.

Implemented by the Danish Refugee Council (DRC)

Machta Hamoud • Support for a Community Centre

2011	Project budget: \$4,500	Total beneficiaries: 2,100	Completed
------	-------------------------	----------------------------	-----------

Lebanese and Syrian families now meet for recreation and community events at the newly-constructed community centre and public garden.

Implemented by the Danish Refugee Council (DRC)

Mouanse • Rehabilitation of the City Hall

2012	Project budget: \$13,400	Total beneficiaries: 1,600	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian families enjoy recreation and community events at the newly-rehabilitated community centre.

Implemented by the Danish Refugee Council (DRC)

Mqaible • Rehabilitation of Community Centre Grounds

2012	Project budget: \$4,841	Total beneficiaries: 2,100	Completed
------	-------------------------	----------------------------	-----------

In partnership with local NGOs and DRC, UNHCR rehabilitated the grounds of the public park, allowing more residents to enjoy recreation and community events at the centre.

Implemented by the Danish Refugee Council (DRC)

Rama • Creation of a Playground

2012	Project budget: \$18,500	Total beneficiaries: 4,000	Completed
------	--------------------------	----------------------------	-----------

Families in the community have a new safe space for their children to play- a new gated play area at the community centre. At the Rama public garden, Lebanese and Syrian children have access to a new football field and playground equipment.

Implemented by the Danish Refugee Council (DRC)

Wadi Khaled • Support for a Cinema Club

2011	Project budget: \$8,200	Total beneficiaries: 3,200	Completed
------	-------------------------	----------------------------	-----------

Lebanese and Syrian youth attend a new cinema club at the Tripoli Centre for Youth, which was provided with audio-visual equipment and training.

Implemented by the Danish Refugee Council (DRC)

Wadi Khaled • Support to a Community Centre

2012	Project budget: \$9,300	Total beneficiaries: 3,700	Completed
------	-------------------------	----------------------------	-----------

Lebanese and Syrian families now enjoy recreation and community events at the newly-rehabilitated Al Amayer Social Development Centre. The Centre received pathways, benches, tables and other improvements.

Implemented by the Danish Refugee Council (DRC)

Wadi Khaled • Sporting Equipment

2013	Project budget: \$29,500	Total beneficiaries: 3,500	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian youth enjoy a new football playground in Hisheh. UNHCR, in partnership with UNDP, laid sand, built new fences, and provided nets and lighting to create a new public space where Syrian and Lebanese youth can play together.

North

Bakhoun • Equipment for Computer Centre

2013	Project budget: \$19,926	Total beneficiaries: 600	Completed
------	--------------------------	--------------------------	-----------

Lebanese and Syrian residents build professional skills and study using new computers provided to the local community centre in Bakhoun.

Implemented by International Relief and Development (IRD)

Btoutartij • Creation of a Public Park

2014	Project budget: \$69,725	Municipal funding: \$28,725	Total beneficiaries: 4,000	Ongoing
------	--------------------------	-----------------------------	----------------------------	---------

In 2014, Lebanese and Syrian families in Btoutartij will have access to a new public park, equipped with playground equipment for children. The park will provide a new space for community gatherings.

Implemented by Save the Children

El Beddaoui • Youth Sports Centre Rehabilitation

2013	Project budget: \$15,670	Total beneficiaries: 90,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian youth exercise and play sports using new equipment at the newly-rehabilitated community sports centre in El Beddaoui.

Implemented by International Relief and Development (IRD)

El Beddaoui • Community Centre Rehabilitation

2013	Project budget: \$20,000	Total beneficiaries: 90,000	Completed
------	--------------------------	-----------------------------	-----------

The El Beddaoui community centre and public garden is a popular gathering place for Lebanese and Syrian families. Families now enjoy new equipment and rehabilitated latrines.

Implemented by International Relief and Development (IRD)

North

El Sfire • Equipment and Support for a Football Stadium

2013

Project budget: \$18,600

Total beneficiaries: 15,000

Completed

Lebanese and Syrian youth enjoy a new football stadium and equipment provided by UNHCR in partnership with IRD.

Implemented by International Relief and Development (IRD)

Dahr El Megher • Renovation of a Cultural Centre

2013

Project budget: \$7,000

Total beneficiaries: 9,400

Completed

Lebanese and Syrians now enjoy new equipment, furniture, and kitchen supplies at the newly-renovated Dahr El Megher Centre. Families gather at the community centre to relax, study and celebrate community events.

Implemented by the Danish Refugee Council (DRC)

Dam Wal Farz • Creation of a Public Garden

2013	Project budget: \$29,842	Total beneficiaries: 15,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian families enjoy recreation and community events at a new public garden in Dam Wal Farz.

Implemented by the United Nations Development Programme (UNDP)

Dar Baachtar • Environmental Protection

2014	Project budget: \$63,802	Total beneficiaries: 5,700	Ongoing
------	--------------------------	----------------------------	---------

Environmental management and awareness campaigns are encouraging Lebanese and Syrian residents in Dar Baachtar to prevent deforestation and dumping.

Implemented by Cooperazione Internazionale (COOPI)

Mina • Rehabilitation of a Public Garden

2013	Project budget: \$45,110	Total beneficiaries: 88,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian families enjoy recreation and community events at the newly-renovated public garden.

Implemented by the Danish Refugee Council (DRC)

North

Mina • Football Field Rehabilitation

2013	Project budget: \$29,360	Total beneficiaries: 100	Completed
------	--------------------------	--------------------------	-----------

Lebanese and Syrian youth now play football together at a newly-rehabilitated playground in Mina.

Implemented by the Danish Refugee Council (DRC)

Ras Meska • Creation of a Basketball Court

2013	Project budget: \$81,000	Municipal funding: \$42,323	Total beneficiaries: 5,000	Completed
------	--------------------------	-----------------------------	----------------------------	-----------

Implemented by the Danish Refugee Council (DRC)

Syr • Equipment for a Public Library

2013	Project budget: \$8,186	Total beneficiaries: 8,200	Completed
------	-------------------------	----------------------------	-----------

Lebanese and Syrian residents use new computers at the public library to study, work, and learn new skills. The library is now offering free computer classes for children and adults.

Implemented by International Relief and Development (IRD)

Tripoli • Wheelchair Lift for a Community Centre

2013	Project budget: \$31,500	Total beneficiaries: 1,000	Completed
------	--------------------------	----------------------------	-----------

The Tripoli Nawfal Cultural Centre is now accessible to more Lebanese and Syrian community members. Lebanese and Syrians with limited mobility are now able to use the Centre using a new wheelchair lift.

Tripoli • Training for Teachers and School Administrators

2013	Project budget: \$20,570	Total beneficiaries: 110	Completed
------	--------------------------	--------------------------	-----------

Teachers and school administrators benefit from capacity-building and sensitization trainings, which focus on peace-building in classrooms.

Implemented by the United Nations Development Programme (UNDP)

Multiple Locations in Tripoli Governorate • Disabled Access for Community Spaces

2013	Project budget: \$18,000	Total beneficiaries: 1,000	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian residents with limited mobility can now access the downtown areas of al-Tal, the Mina and Nini boulevards, Port Said Street and the Corniche in El Mina, where public pavement was renovated.

Implemented by the Danish Refugee Council (DRC)

Multiple Locations in Tripoli Governorate • Equipment for Youth Sport Activities

2013	Project budget: \$35,596	Total beneficiaries: 50,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian youth now have access to new sporting equipment provided at a local community centre.

Implemented by Right To Play

Mount Lebanon and Beirut

Baysour • Creation of a Public Park

2013

Project budget: \$18,000

Total beneficiaries: 6,300

Completed

In Baysour, the nearest public park or community centre was in Beirut, nearly an hour's drive away. Children and families needed a safe space to play.

In 2013, UNHCR, in partnership with Terre des Hommes, rehabilitated public space, establishing a free play area with tables, benches and playground equipment. Now, laughter and conversations fill the park, a popular spot for both Lebanese and Syrian families. Students at the Baysour School enjoy breaks between classes at the park, and teachers bring their classes to learn outside. The park has become a haven for students and families.

"The rehabilitation of this park was important for both Lebanese children and Syrian refugees, not only at the level of Baysour but the surrounding villages," says Mr Mazen Malaeb, director of Baysour School. "The park has benefited parents and their children, and it has become essential for students. Learning in a pleasant environment has increased kids' willingness to learn."

"With the rehabilitation of this park, Lebanese families no longer had to take their children to Beirut for entertainment... The park has become essential for the recreational activities for both Lebanese and Syrian students."

-Mr Mazen Malaeb, director of Baysour School

Implemented by Terre Des Hommes

Aramoun and Chhime • Promotion of Social Cohesion and Solidarity

2013

Project budget: \$20,000

Total beneficiaries: 800

Completed

Syrian refugees and Lebanese residents benefit from social cohesion programmes, which provide participants with an opportunity to discuss community issues and resolve conflict.

Implemented by Terre Des Hommes

Multiple Locations in Mount Lebanon • Sporting Equipment for Youth

2013

Project budget: \$36,324

Total beneficiaries: 250

Completed

Lebanese and Syrian youth enjoy new sporting equipment provided at the local community centres.

Implemented by Right to Play

Multiple Locations in Mount Lebanon and Beirut • Sporting Equipment

2013

Project budget: \$20,060

Total beneficiaries: 600

Completed

Children and coaches have been provided with equipment, shoes, and sweatshirts for basketball games.

Implemented by Right to Play

Bekaa

“I have been in the Bekaa since the early months of the crisis and am constantly impressed by the extraordinary generosity of Lebanese communities in hosting refugees. Community support projects are a way for us to support Lebanese communities and are critical to joint humanitarian efforts in the region.”

-Maeve Murphy, Head of Office, UNHCR Zahle

Arsal, El Hermel, Joub Jannine, Rachaiye and Zahle • Reforestation

2013	Project budget: \$250,000	Municipal funding: \$90,000	Total beneficiaries: 578,000	Completed
------	---------------------------	-----------------------------	------------------------------	-----------

During the winter months, many Lebanese and Syrian families could not afford fuel for their homes, and they relied on firewood from the local forest. To offset this use, UNHCR, in partnership with UNDP, planted 40,000 trees, reforesting 500 dunams (50 hectares) of land.

Implemented by the United Nations Development Programme (UNDP)

Arsal • Computers and Equipment for Community Centre

2013	Project budget: \$12,260	Total beneficiaries: 240	Completed
------	--------------------------	--------------------------	-----------

Syrian refugees and Lebanese now have access to public computers, sporting equipment and supplies for crafts and language classes at the Nahda Association's community centre.

Implemented by the Danish Refugee Council (DRC)

Arsal • Support for a Community Kitchen

2013	Project budget: \$7,314	Total beneficiaries: 120	Completed
------	-------------------------	--------------------------	-----------

Syrian and vulnerable Lebanese families now have access to cooking equipment at the Arsal Community Centre.

Implemented by the Danish Refugee Council (DRC)

Arsal • Cinema Club

2012	Project budget: \$2,575	Total beneficiaries: 51,500	Completed
------	-------------------------	-----------------------------	-----------

Lebanese and Syrian youth attend a new cinema club at the Al Jousour Organization, which has been equipped with a LCD TV, DVDs and chairs.

Implemented by the Danish Refugee Council (DRC)

Bar Elias • Theatre Programme

2013	Project budget: \$15,000	Total beneficiaries: 20	Completed
------	--------------------------	-------------------------	-----------

Lebanese and Syrian community members benefited from acting classes and a new theatre programme at the local community centre.

Implemented by the Danish Refugee Council (DRC)

Bekaa

Bar Elias • Playground Equipment

2012	Project budget: \$10,000	Total beneficiaries: 1,000	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian children enjoy a new basketball court at the Bar Elias Playground. This project supports the Sports Unite and Don't Divide Us programme, which brings together Lebanese and Syrian youth for sporting events.

Implemented by the Danish Refugee Council (DRC)

El Marj • Refurbishment of a Community Centre and Public Garden

2013	Project budget: \$14,700	Total beneficiaries: 4,550	Completed
------	--------------------------	----------------------------	-----------

Lebanese and Syrian residents now enjoy a rehabilitated public garden and community centre. The centre's bathrooms, cafeteria and theatre were repaired, and lights and wooden banks were installed in the garden. Families come to the garden to relax, play and attend community events.

Implemented by the Danish Refugee Council (DRC)

Ghazze • Renovation of a Community Theatre

2013	Project budget: \$15,000	Total beneficiaries: 11,000	Completed
------	--------------------------	-----------------------------	-----------

Lebanese and Syrian families are now able to enjoy performances in an open theatre at the community park. The theatre was rehabilitated, receiving a new roof.

Implemented by the United Nations Development Programme (UNDP)

Joub Jannine • Football Field Rehabilitation

2013	Project budget: \$13,564	Total beneficiaries: 55	Completed
------	--------------------------	-------------------------	-----------

Lebanese and Syrian children enjoy a renovated football field. This project supports the Sports Unite and Don't Divide Us programme, which brings together Lebanese and Syrian youth for sporting events.

Implemented by the Danish Refugee Council (DRC)

Majdel Anjar • Computers for a Computer Lab

2012	Project budget: \$8,264	Total beneficiaries: 280	Completed
------	-------------------------	--------------------------	-----------

Lebanese and Syrian residents have access to eight new computers at the Al Houdoud Club. Community members use the computer lab to work, study and develop new skills.

Implemented by the Danish Refugee Council (DRC)

Majdel Anjar • Rehabilitation of a Community Centre

2013	Project budget: \$70,000	Municipal funding: \$10,000	Total beneficiaries: 55,700	Completed
------	--------------------------	-----------------------------	-----------------------------	-----------

Syrian refugees and Lebanese enjoy the newly-renovated Majdal Anjar's public garden, where families can relax, play and attend community events. The garden's cafeteria, toilets, concierge room, parking area, and outdoor area were renovated, and the garden received new benches.

Implemented by the United Nations Development Programme (UNDP)

Saadnayel • Basketball Equipment

2012	Project budget: \$10,000	Total beneficiaries: 70	Completed
------	--------------------------	-------------------------	-----------

Lebanese and Syrian families enjoy new basketball equipment at the local community centre, which is a popular gathering place for local families.

Implemented by the Danish Refugee Council (DRC)

Multiple Locations in the Bekaa • Sporting Equipment

2013	Project budget: \$35,596	Total beneficiaries: 5,000	Completed
------	--------------------------	----------------------------	-----------

New sporting equipment allows Lebanese and Syrian students to practice sports together.

Implemented by Right to Play

Baalbek-El Hermel

Baalbek • Sporting Equipment

2013	Project budget: \$6,000	Total beneficiaries: 150	Completed
------	-------------------------	--------------------------	-----------

More Lebanese and Syrian families are able to exercise and play at the Al Shams Sports Club, a community centre in the Bekaa. The club received new sporting equipment and board games.

Implemented by the Danish Refugee Council (DRC)

Baalbek-El Hermel

Baalbek • Educational Activities

2013	Project budget: \$13,855	Total beneficiaries: 100	Completed
------	--------------------------	--------------------------	-----------

Syrian refugees and Lebanese residents attended educational events about human rights, health and freedom at a local community centre. These events provided participants with the opportunity to discuss community concerns and resolve conflict.

Implemented by the Danish Refugee Council (DRC)

Baalbek • Equipment for Community Theatre

2013	Project budget: \$6,000	Total beneficiaries: 650	Completed
------	-------------------------	--------------------------	-----------

Lebanese and Syrian families now enjoy events at the community theatre. In collaboration with DRC and Al Fidaa Association, a local NGO, UNHCR provided equipment, including a sound system.

Implemented by the Danish Refugee Council (DRC)

Baalbek • Art Classes at a Cultural Centre

2013	Project budget: \$11,600	Total beneficiaries: 40	Completed
------	--------------------------	-------------------------	-----------

Syrian refugees and Lebanese youth received music lessons and poetry classes. Participants developed new skills and showcased their talents in a recital.

Implemented by the Danish Refugee Council (DRC)
