

IASC GENDER MARKER—FREQUENTLY ASKED QUESTIONS

Why do we need a Gender Marker in CAPs, CERFs and pooled funds?

There is universal acceptance that humanitarian assistance must meet the distinct needs of women, girls, boys and men to generate positive and sustainable outcomes. However, evaluations of humanitarian effectiveness show that gender equality results are weak. Reports of the UN Secretary-General call for tracking of gender-related allocations. Security Council resolutions require it. The reality is that advancing gender equality requires focused action. The Gender Marker was launched by the Sub-working Groups on Gender and on the Consolidated Appeal Process (CAP) to improve humanitarian programming and make humanitarian response more efficient. It builds on the roll-out of a Gender Marker by several UN agencies.

The IASC Gender Marker (GM) is required in all Consolidated Appeals Processes (CAPs) and other humanitarian appeals and funding mechanisms. Cluster Leads should support their partners in the use of the GM so that all projects in an appeal routinely ensure that ALL segments of the affected population have equal access to protection and assistance and that targeted support to advance gender equality is based on a gender analysis. This makes humanitarian activities more effective. By uploading gender codes onto the global Online Project System (OPS) and Financial Tracking System (FTS), donors are better placed to identify and fund high quality, gender-informed projects.

What is the Gender Marker?

The IASC Gender Marker is a tool that codes, on a 2-0 scale, whether or not a humanitarian project is designed well enough to ensure that women/girls and men/boys will benefit equally from it or that it will advance gender equality in another way. If the project has the potential to contribute to gender equality, the marker predicts whether the results are likely to be limited or significant.

IASC GENDER MARKER	
<p style="text-align: center;">GENDER CODE 2A – GENDER MAINSTREAMING</p> <p style="text-align: center;"><i>Potential to contribute significantly to gender equality</i></p> <p>A gender and age analysis is included in the project’s needs assessment and is reflected in one or more of the project’s activities and one or more of the project outcomes.</p>	<p style="text-align: center;">GENDER CODE 2B – TARGETED ACTION</p> <p style="text-align: center;"><i>Project’s principal purpose is to advance gender equality</i></p> <p>The gender analysis in the needs assessment justifies this project in which all activities and all outcomes advance gender equality. Targeted actions are projects responding to the disadvantage, discrimination or special needs of women, girls, boys or men.</p> <p style="text-align: center;">All targeted actions are based on gender and age analysis.</p>
<p>CODE 1</p> <p><i>Potential to contribute in some limited way to gender equality</i></p> <p><i>There are gender dimensions in only one or two components of the project sheet: i.e. in needs assessment, activities and outcomes*. The project does not have all three: i.e. gender and age analysis in the needs assessment, which leads to gender and age-responsive activities and related gender and age outcomes</i></p> <p><i>*Where gender and age appear in outcomes only, the project is still considered gender-blind.</i></p>	
<p>CODE 0</p> <p><i>No visible potential to contribute to gender equality</i></p> <p><i>Gender and age are not reflected anywhere in the project sheet or only appear in the outcomes. There is risk that the project will unintentionally fail to meet the needs of some population groups and possibly even do some harm. These projects are considered gender-blind.</i></p>	
<p>CODE N/A - NOT APPLICABLE</p> <p><i>This project does not have direct contact with affected populations, and does not directly affect or determine the selection or use of resources, goods or services accessed by affected populations.</i></p>	
<p>CODE NOT SPECIFIED</p> <p><i>This project is still in development and the Gender Marker code is temporarily not specified.</i></p>	

Who will use the Gender Marker?

The key users of the Gender Marker are the clusters and their project teams. Clusters should make gender equality a priority in their Cluster Response Plans, which will guide project partners in designing projects that meet the distinct needs of women, girls, boys and men equally. Clusters should orient and support project partners in the implementation of the Gender Marker. Project teams will be encouraged to strive for a good code. Cluster vetting teams will have the final say on the gender code for each project. The gender code will be inserted in the project sheet on the online project system (OPS). The gender codes will then appear in the Financial Tracking System (FTS) and donors that are interested in investing in gender-responsive projects can use the OPS/FTS to identify which projects are designed well enough to advance gender equality.

Who is responsible for implementing the Gender Marker?

Cluster Leads and Heads of Agencies are responsible for ensuring that all cluster partners engage proactively in the Gender Marker. While not delegating responsibility, it might be useful for Cluster Leads to appoint a Focal Point to support cluster partners in implementing the Gender Marker. Whenever possible, the participation of gender specialists – including interagency GenCap Advisors - is encouraged. In addition, experience from implementation of the Gender Marker since its pilot in 2009 shows clearly that the active support of the Humanitarian Coordinator and the Head of OCHA is vital in engaging humanitarian actors to engage in the process and, accordingly, on the results.

Where will the Gender Marker be used in 2014?

Country Level: The Gender Marker is used by clusters/sectors at the country level. Humanitarian Country Teams are encouraged to create a fertile environment for advancing gender equality in the Common Humanitarian Action Plans (CHAPs); to integrate gender equality into their needs assessments, strategic priorities, sector-specific response plans and monitoring frameworks.

Global Level: At the global level, the Gender Marker is being integrated into; training programmes for Humanitarian Coordinators, Cluster Leads, CAP and CERF training of trainers; the CAP and CERF guidance notes; and a special field for the gender code on the OPS.

Donors: Donors are encouraged to track use of the marker in the FTS and integrate the implementation of their own gender equality policies into monitoring.

Are there tools available to assist Clusters in implementing the Gender Marker?

The Gender Marker Toolkit provides cluster-specific Tip Sheets that clusters can use to help their partners integrate gender issues into their projects. Using these Tip Sheets will assist project teams to identify and respond better to the distinct needs of male and female beneficiaries. In so doing, their projects will have the best chance of integrating gender issues well and achieving a good code. The majority of all humanitarian projects should mainstream gender (code 2a). There should also be a selected number of targeted actions (code 2b) that address discrimination and/or special needs. Tip Sheets for the CCCM, Child Protection, Coordination, Education, Food Security, Health, GBV, Mine Action, Nutrition, Protection, Early Recovery, Shelter & NFIs and WASH sectors, a two-page Gender Marker Overview, and a one-page guide on the newly launched N/A 'not applicable' code to assist project vetting teams to code projects are available at <http://gencap.onerresponse.info>.
