### NEEDS ANALYSIS:

In 2015 and 2016, the focus from the international community will be to support the Government in maintaining appropriate conditions in the camps and in ensuring sustainability of the interventions. Although the total number of people in camps remains fairly stable, new arrivals are transferred whenever space becomes available. As most of refugees have lived in the camps for over two years, maintenance and improvement of services remain critical. The Government estimates that 2.1 million refugees will be living within communities by the end of 2015. The vast majority of them have exhausted their resources while struggling to make ends meet. Therefore, there is a need to provide support to the most vulnerable refugees, who will be identified according to comprehensive and protection sensitive criteria, ensuring equitable access for all refugees to available support.

#### The main priorities in the basic needs sector include:

- Bedding, kitchen sets and hygiene materials in particular in camps and for new arrivals in communities through systematic standard operating procedures, ensuring equitable access for all groups;
- Shelter and NFIs to meet the needs of vulnerable persons, based on referral from local authorities and partners, whose capacity will be built to identify vulnerabilities according to comprehensive criteria and standard operating procedures, ensuring equitable access;
- The increase of cash-based assistance in partnership with the authorities and partners and the identification of the most vulnerable persons of concern;
- The provision of support to the Government in providing shelter solutions (in and outside of camps);
- The provision of winter clothes for newly arriving Syrian refugees; The maintenance of WASH services in the camps and technical support to the municipalities to enhance these services in urban areas;
- The personal hygiene needs of women and girls;
- The increase of local service delivery capacity for Syrians and host communities.
