Achievements

Protection

Achievements and Impact

- The State Secretary of the MOI has been designated by the Prime Minister as the overall focal point for the implementation of the 17 point action plan with the EU which was endorsed at the Heads of state summit in Brussels on 25 October.
- The Macedonian customs have started using on an ad hoc basis mobile scanners to scan the luggage of refugees. This has caused a slow down of entry to Vinojug site when used.
- The ticket counter is operational, resulting in trains being less overcrowded. UNHCR advocates for the ticket booths to remain open 24h/7 and not only shortly before scheduled train departures.
- During the reporting period approximately 3,125 children and 1,144 women were provided with emotional and psychosocial assistance in the UNICEF Child Friendly Spaces operated by the NGO La Strada. La Strada identified and assisted 665 vulnerable individuals. The activities are funded by UNICEF, UNHCR, GIZ and People in Need.
- During the reporting period approximately 17,000 persons were offered free legal advice at the Vinojug station by MYLA, who also assisted 8 asylum seekers at the Vizbegovo Reception Center with their asylum procedure. MYLA also ensured prioritization for 207 vulnerable individuals for their registration. The MYLA activities are funded by UNHCR.

Identified Needs and Remaining Gaps

- With the cold nights refugees have lit fires outside and inside the site to keep warm. This has caused some fire hazard concerns. So far the fires have been kept away from other flammable material. When the electricity grid is upgraded by the national electricity company, heaters will be installed at

the site, in the meantime, heaters will be operated using generators.

- Registration remains a challenge with the standard operating procedures proposed by UNHCR still not being discussed by the Ministry of Interior; UNHCR will now organize a high level meeting to discuss on how to address identified challenges.
- Train wagons are too still too crowded and hygiene in the trains is a serious concern. UNHCR is exploring options of having staff present in the trains for monitoring purposes.
