

POPULATION

**44,628** registered in Minawao camp by UNHCR

**512** in the transit center

**10,000** estimated refugees out of camp

(joint UNHCR / IOM profiling)

HIGHLIGHTS

- During the month of July 1,495 individuals arrived spontaneously and were registered in Minawao camp. 85% of them were already present in the country since 2014, but decided to approach the camps due to decision of government to deport undocumented foreigners living in Cameroon, specially in the Far North. 62 % of them are children and 54 % of them are female.
- Opening of transit center in the far north and beginning of profiling phase two exercise for IDPs, refugees out of camps and host communities. 116 Nigerians awaiting registration moved from Minawao camps to the transit center
- Several incidents of forced expulsions of Nigerian Nationals from border areas in Cameroon back to Nigeria have been reported.
- Deteriorating security situation in the far north

FUNDING

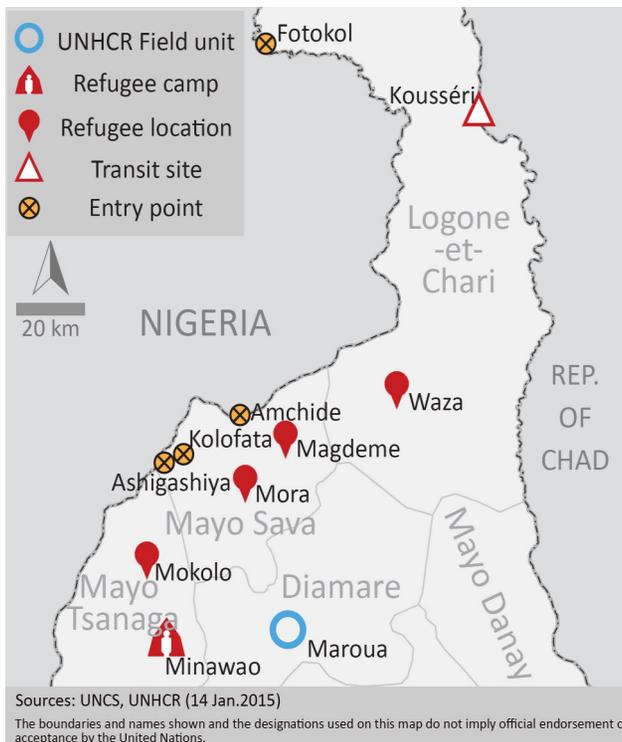

42%\*

USD 62,799,052 RRP Financial requirements

PRIORITIES

- Find a second site to place all the new arrivals but also decongest the camp and move some residents to the new site.
- Improvement of water supply system and health infrastructure within the camp.
- Ensure the inclusion of the profiles of IDP communities in a protection analysis/strategy.
- Strengthening of security measures within the camp.
- Enrolment of children in primary school
- Improve psycho-social support

Joint UNHCR and Government's protection screening ongoing before registration of new arrivals; Protection and Border monitoring organized by Protection.

Network of community health workers established, vaccination of new arrivals resumed and Outbreak control interventions being are in place. Lack of nutritional prevalence information in the camps.

40,637 refugees received food rations in July 2015. A Blanket feeding session was organized for children between 6 and 59 months, pregnant and nursing women. Two mills to crush were offered to refugees by UNHCR based on ONU Femmes funding.

Standards in camp not yet reached; ratio is 17 l/ind/day. A four-months long awareness raising campaign against diarrheal diseases is being prepared. Water trucking provides 58% of the water supply. 2,425 emergency latrines are operational

The camp has 7,236 family shelters. 3,760 people are living in community shelters or in the transit center, which requires construction of 752 family shelters to fill the gap.

Only 50% of primary school-aged children are enrolled in school due to lack of classrooms (24 classrooms for 18,000 children), lack of teachers and non-enrolment in country of origin. UNHCR plans to build more schools.

2,795 women and men including from host communities will benefit in 2015 from livelihood activities and vocational training.

\* Funds received by UNHCR as of 23th July.
