Context

History

Since May 2013, Southeastern Niger (Diffa region) has witnessed an influx of tens of thousands displaced persons from Northern Nigeria following the declaration of the state of emergency in Borno, Yobe and Adamawa States in Nigeria on 14 May 2013. The displaced population is seeking shelter in the families and villages of Niger. In December 2014, due to the violent attacks by insurgents in Bosso and the lake Chad region, the increased influx gave precedence to construct the Kablewa camp. The camp has a capacity to host 10,000 people extendable to 20,000. The majority of camp residents are nationals of Niger
