## 2. Phwe Yar Gone IDP Camp

Population: approx. 2,400 IDPs

<p><b>Highlights</b></p> <ul style="list-style-type: none"> <li>- Death of a baby from diarrhoea.</li> <li>- Difficulties in the access to latrines by PWSNs due to the lack of handrails to support their access.</li> <li>• <b>Other update on activities and issues</b></li> </ul> <p><b>CAMP MANAGEMENT:</b> DRC full range of activities on-going, focus on access to services monitoring and referral, shelter maintenance monitoring, and integration of camp representatives into camp coordination meetings. A rapid risk assessment for the safety and security of IDPs, especially children, was conducted. Furthermore, DRC conducted meeting with the CMC regarding the introduction of household cards in coming months. Field Office Assistant and volunteers attended WASH monitoring training and collected data on WASH services in the camp, including indicators relating to water points, latrines, drainages, and solid waste management. CCCM staffs and shelter engineer did shelter infrastructure maintenance. As for Community Service Activities, basic Myanmar language classes for women concluded after two months while library sessions continue for two days each week. Further activities included snack making and cane ball. Furthermore, a visibility sign board for cane ball matches was set up.</p> <p>➤ <b>SHELTER:</b> Some of the shelters' walls and floors are damaged and need to be repaired. IDPs used metal tape for their roof, but some bigger holes could not be fixed with the tape, so there were still some complains about leaks. DRC (CCCM) staffs, the DRC shelter engineer, the Field Office Assistant, and the volunteers did shelter maintenance monitoring regarding the most damaged parts. IDPs complained about the condition of their shelters' roofs, walls and floors. <a href="#">Assessment for walls and floor for 15 out of 40</a></p>	<ul style="list-style-type: none"> <li>• <b>Follow up, challenges and advocacy</b></li> </ul> <p>DRC (CM) in coordination with Shelter cluster to address IDP's needs for walling and flooring temporary solutions.</p>
---	---

shelter, flooring 60% replacement and wall 15% replacing.

- **PROTECTION:** Protection monitoring, activities with the women's group, and identification of PWSNs for IPAs are ongoing. Cases of domestic violence were reported to DRC Protection staff. The Protection Team observed that latrines in the camps are very high particularly for children, elderly and pregnant women. There are not handrails that can assist PWSNs to have access to latrines. A baby died from diarrhoea as access to health services became a challenge for the parents. The baby was taken to Thet Kay Pyin Clinic and Da Paing Clinic but unfortunately the baby was only provided paracetamol and ORS when the two clinics were open (only weekdays).
- **WASH:** Regular activities by DRC on cleaning of latrines, drainages, and camp area are taking place daily. Desludging has been completed in October. 35 repairs have been completed but 46 require major repairs. The Latrines are 2 years old and showing signs of degradation that will result in significant repairs over the coming year. WASH rooms are in poor repair and not used by most inhabitants. The structures have been removed for use as firewood. Solar lighting has been distributed to each household but post monitoring has shown that many have already been sold. The current refuse pits are not in use with evidence that the current disposal system is not effective.
- **HEALTH:** No major health issues reported, but skin infection was more common than before. Furthermore, IDPs reported that diarrhoea is more of an issue now, especially for children. IDPs mentioned the lack of health facility in PYG as an issue.
- **FOOD:** Regular activity of WFP food distribution for the month of October completed by week 2. MRF and Government distributed additional food items, including rice for increased households.
- **EDUCATION:** SCI and UNICEF activities were on-going, but UNICEF handed over to Plan International during this month. As the TLS of UNICEF needs rebuilding as it collapsed, now the students of this TLS are learning in a modular house as a temporary solution. Government supplied text books and UNICEF distributed 100 books for grade 1, 150 books grade 2, 50 books grade 3, 40 books for grade 4, and 25 books for grade 5. Furthermore, SCI recruited four new volunteers.
- **NON-FOOD ITEM:** No agencies supported NFI kits in the camp, the residents are in need of mosquito nets, cooking pots, and other kitchen utensils.
- **PROTECTION:** DRC (Protection) activities by DRC are on-going, focus on protection monitoring, IPA, and following up an incident case. Furthermore, NFI Kits were provided to 5 widows.
- **NUTRITION:** SCI regular activities are on-going, focussing on mother-to-mother sessions, behaviour change communication, health education session, and individual counselling. Furthermore, SCI did MUAC for children under five years, cooking demonstration, diarrhoea counselling session, and did joined screening with ACF on malnourished children under five years. MHAA did MEC children under five years as well.
- **CHILD PROTECTION:** Regular activities of SCI are on-going and the CFSs are running regularly. Activities focussed on recreational activities for children such as handicraft and painting training as well as a painting competition.
- **LIVELIHOOD:** Provision of Cash Grants under processing. It would be the same as in pilot villages. But it has more number of beneficiaries than in other villages. IPAs are

The DRC Protection Team continues to monitor the situation in the camp as well as unhindered access to basic services by all IDPs.

Cases of domestic violence will be referred to the relevant GBV actors working in the camp.

The case of the death of the baby was referred by DRC CCCM to DRC Protection. The Protection Team gathered further information on the case which was shared with the WASH Cluster and DRC CCCM. The Protection Team is monitoring deaths of infants in camps and villages to identify causes as well as any problems in the access to health services by the IDPs in camps.

<p>started to identify.</p> <p><b>OTHER ISSUES:</b> IRC (WPE) held Focus Group Discussions with both women and men.
