

## Monthly Record of Information from DRC program locations in Rakhine State June 2014

The Monthly record represents a snapshot of the week's situation in the camps and villages where DRC works and aims to capture the issues relevant for DRC operations. This record does not presume to provide a comprehensive picture of the progress and challenges for every sector in each location.

Existing protection referral pathways and the CCCM complaints response mechanism form the foundation of this report. DRC seeks to verify concerns reported to the extent possible and share information with the relevant sectors/agencies for further action.

Please note the Document Map in the left tab of the document allows jumping directly to each relevant site without having to scroll through the entire document. If you do not see it, you might need to activate it.
