# **TANZANIA - BURUNDI REFUGEE RESPONSE**

# SITUATION OVERVIEW

The Burundi refugee situation in Tanzania began late April 2015. The months that followed saw significantly high number of persons of concern arriving in Tanzania, mainly through Kagunga, a tiny border village along Lake Tanganyika, and other entry points in Kigoma region.

New arrivals were relocated to Nyarugusu camp, which was already host to 65,000 persons of concern, mainly DR Congolese. The camp quickly ran out of capacity to host DR Congoleses and the new population of Burundians, prompting the opening of a new camp, Nduta, in Kibondo district on 07-Oct-2015. A second camp, Mtendeli was also opened on 14-Jan-2016 to host the continuing new arrivals. Since Mtendeli reached its full capacity of 50,000 in early October 2016, all Burundian new arrivals are hosted in the expanded Nduta camp.

Arrivals from DR Congo and other countries continue to be hosted in Nyarugusu.

The 2015 prima facie declaration for Burundian asylum seekers was revoked on 20-Jan-2017. Burundian asylum seekers arriving since then now undergo status determination processes

### Challenges

**Challenges** 

Nduta camp

Increase sensitization of HH on registration policy to ensure efficiency in the issuance of refugee ration cards

United Nations

TANZANIA

rina as

- Increase awareness raising\sensitation on SGBV at zonal level by providing Transportation to incentive workers
- Scarcity of firewood and other alternative energy sources remain a key risk factor across all camps
- Limited number of T-shelters especially for PSN across all three refugee

Significant inadequacies ranging from

lack of learning spaces to sanitation facilities, as well as teachers, are

challenging to the learning process in

Impact to participation and progress of

With current double shift strategy, a minimum of 625 additional classrooms

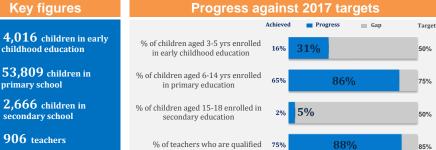

needs to be constructed across the 3

by

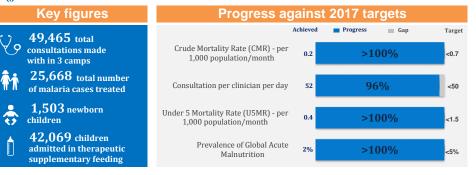

for examination administered NECTA students, due incertainty for them to sit

# **EDUCATION**

### Key figures

# 🧶 HEALTH AND NUTRITION

# **Highlights**

**Highlights** 

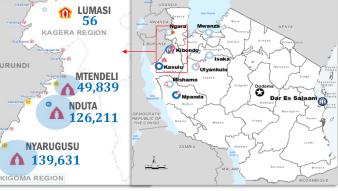

enrolled

- 2 majors causes of hillnesses traited during reporting period: malaria (44.9%), Upper and Lower Respiratory Tract (19%)
- 86 patients referred to secondary and tertiary level referal hospital
- Institutional delivery rate stand at 96% during reporting period
- 782 of MAM cases identified and admitted for treatment, while 19,431 children (24-59mths) received MNP and 21,856 children (6-23mths) benefited from Blanket Supplementary feeding For more information, contact tankb@unhcr.org of

### **Challenges**

camps

- Increasingly high Malaria morbidity (44% of CMR) remain the greatest challenge in the health sector
- ٠ Critical need increase access to health nutrition services through and additional health posts and expansion and renovating of existing health and nutrition facilities in all Camps
- Severe necessity for additional staffing to maintain the equity and quality of access to health care across all camps

CENTRAL

# WASH

- 630 of water taps installed during
- 4,291 of shower stalls constructed during reporting period
- 1,074 of latrine stances constructed
- 158,590 of people reached with hygiene promotion during reporting period

#### **Challenges**

- Lack of water remains a challenge across the camps particularly in Mtendeli Camp which poses more risks to the refugees with the onset of the dry season.
- Increase in the reported cases of watery diarrhea. WASH and Health Sectors are increasing Hygiene promotion to mitigate the issue
- For all households to have latrines in Mtendeli, 6134 are required. NRC has funds for 656, leaving a gap of 5478

# FOOD SECURITY

55%

## **Highlights**

**Highlights** 

100

has been completed

• Current reduction include 304 g/p/d allocation of cereal, maize (80%) while all others commodities are distributed at full ration (100%)

Construction of a vocational training centre for both host community and

refugees at Nyarugusu common market

• CEMDO started a training programme for 120 host community members and

training and provision of tool kits in Nyarugusu refugee camp

refugees on entrepreneurship

#### **Challenges**

- Challenges in ensuring a steady food pipeline for the ASRs across the camps, due to funding constraints.
- The 2nd distribution centre under construction in Nduta camp will ease challenges faced by ASRs to access food distribution points in the camp
- With current double shift strategy, a minimum of 625 additional classrooms needs to be constructed across the 3 camps

# **Challenges**

- Inadequate number of formal in-camp markets poses serious challenges for refugees and asylum-seekers to conduct businesses to generate income
- Large scale funding combined with a strong private sector partner is needed in order to scale up briquette production in an economically viable

# **SHELTER & SITE PLANNING**

Key figures	Progress against 2017 targets					
		Achieved	Progress Gap	Target

UNHCR coordination meetings

(+)

NORWEGIAN CHURCH AID

### Highlights

- 1,070 transitional shelters have been construted during reporting period
- 146 upgradable emergency shelters have been construted during reporting period

### **Challenges**

- Due to limited funding in 2016, 16,724 transitional shelters planned to be constructed are estimated to cover for only about 35% of the total number of households across all camps, i.e. 48,452 HHs. in combination with available funding in 2017, the coverage will only increase up to 42%
- Need for additional funding for Transitional Shelters (67% of ASRs still Need for live in emergency shelters and current funding level cover only 38% of the population

### **Challenges**

Caritas

- Distribution of 250g of soap instead of 400g to each individual could increase health issues in all 3 camps
- Protection concerns due to shortage of solar lamps and blankets since the beginning of March 2017.
- Scarcity of firewood and other alternative energy sources remain a key risk factor across all camps
