

UNHCR SERBIA UPDATE

HIGHLIGHTS AND STATISTICS

- On 15 October, 4,275 new refugees, asylum-seekers and migrants were counted in Serbia, of which 3,855 were
 housed in 18 governmental centres (below chart as well as our <u>Joint Assessment of Government Centres</u> refer).
- Authorities made further excellent progress in school-enrolment: Some 85% of 7-14 year old refugee, asylumseeking and migrant children attended classes, of which 430 attended public primary schools while some 70 were schooled inside the Transit Centres (TCs) of Sombor, Subotica or Kikinda. Some efforts are also being made to enrol children over 14 years of age into secondary schools.
- During the week, the authorities closed all remaining temporary emergency shelters (rub-halls and tents) in the TCs of Adasevci, Principovac, Sombor and Kikinda, and relocated all men and boys who had been accommodated therein into more solid long-term shelters. Additionally, they transferred some 50 unaccompanied and separated boys, who had been accommodated in Adasevci TC, to Krnjaca Asylum Centre (AC) and 112 men and boys who were camping outside centres near Sid to the Presevo Reception Centre (RC).
- UNHCR and partners continued assisting high numbers of 244 newly arrived asylum-seekers (compared to 272 last week). Sample profiling of a group of 118 new arrivals in Belgrade, showed that 40% were women and children and 60% men, that most fled Iraq (29%) or Afghanistan (24%) only one-three weeks ago and reached Serbia through Bulgaria (59%) and/or fYR Macedonia (35%).
- On 10 October, on the occasion of the World Mental Health Day, UNHCR partner Psychosocial Innovation Network (PIN) presented its *Study on mental health of refugees in Serbia* to partners and the media (for more details please see <u>PIN's FB post</u>.)
- UNHCR and partners collected testimonies of 104 collective expulsions from Romania, 98 from Hungary and 73 from Croatia, with many alleging to have been denied due access to asylum procedures there and some maltreatment by authorities of these EUMS.
