

OPERATIONAL PRESENCE OF CLUSTER PARTNERS

2.1 MILLION +

1.1m people newly displaced in Somalia since January 2017

General update

- In February, CCCM cluster partners reached 487,855 displaced people in nine different districts. Partners' activities included coordination and information management, improving and maintaining sites, working with communities to support information, feedback and community self-management.

Camp Management

- In Dolow, CCCM conducted a five-days operation to create an address system in Qansaxlay to give each household a unique number. The address system will improve beneficiary identification and site management.
- CCCM partners in Baidoa relocated 150 HHs in Yaarabi IDP settlement that were given an eviction notice. They were relocated to communal land and the camp management team mobilized neighbouring displaced communities to facilitate their integration into existing settlements.
- Introduction to CCCM Trainings was conducted for Community Leaders in Kismayo. CCCM partners in Kismayo conducted a series of 4 "Introduction to CCCM" training sessions, one for each of the 4 site clusters around Kismayo town: Galbeet, Fanole, Central, Dalxiska. The purpose of each training session was to explain to the community leaders what CCCM activities will be implemented in all the Kismayo sites, and also to give the leadership some basic skills training on best practices of camp management.

Sub Clusters

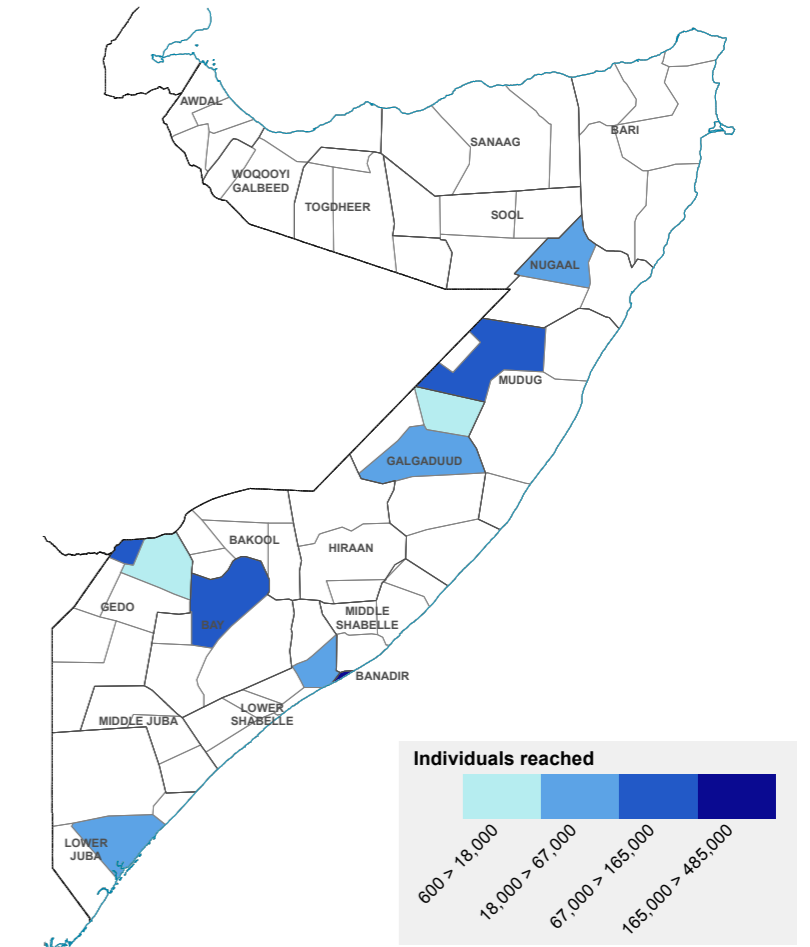

- The Kismayo CCCM sub-cluster led a joint verification exercise in February and verified 145 IDP sites grouped into 4 clusters: Galbeet Cluster, Dalxiska Cluster, Fanole Cluster and Central Cluster. The sub-cluster will conduct this type of exercise quarterly, ensuring the IDP sites list of Kismayo is kept up to date as well as the site locations.
- Service mapping was updated in Garowe. This informs on which partners provide key services at sites and allows CCCM partners to flag duplication in activities and gaps in services. The service mapping can be found on the CCCM cluster Somalia WebPortal: https://data2.unhcr.org/en/situations/cccm_somalia

IM

- To compliment the Detailed Site Assessment, the CCCM cluster has developed a new tool to improve site level data. The Comprehensive Site Assessment aims at collecting data at household level in IDP sites as well as mapping district level infrastructure in partnership with the Shelter Cluster. The tool has been reviewed by clusters to ensure relevant data is collected at sectorial level and will be launched in the coming weeks.

Cluster Coordination	IOM, UNHCR
Communication with Communities	ACTED, DRC, IOM
Construction of community spaces	AVORD, NRC
Coordination and monitoring of service delivery	ACTED, IOM
Conducting Detailed Site Assessments	CRS, NRC, REACH, UNHCR
Integrated CCCM/ Shelter/Protection Projects	AVORD, DRC, DKH, NRC, SYPD, UNHCR
Site planning and improvement	AVORD, DKH, IOM, NRC, SYPD
Training and capacity building of camp committees	AVORD, DKH, DRC, IOM, NRC, UNHCR

BENEFICIARIES REACHED AS OF FEBRUARY

STRATEGIC INDICATORS

Overall indicator	Number of IDP reached by CCCM partners	Target 1.5M	Achieved 487,855
CO1 #1	# of sites with established CCCM mechanisms	Target: 1,600* sites;	Achieved: 439 sites
	Displaced People in Sites 1.6 M	Displaced People reached 983,000	<i>*Based on an estimated 2,000 sites in Somalia, targeting 80%</i>
CO2 #2	# of sites covered by the Detailed Site Assessment	Target: 89 Districts	Achieved: 24 Districts
CO1 #1	# of sites with established community participation structures	Target: 1,600	Achieved: 1,289
CO2 #2	# of displaced people with access to information about humanitarian services	Target: 1.5 M	Achieved: 1.1 M
