Inter-Agency Data Gathering Tool

RCG Meeting 13 June 2018 – Session 3

UNHCR
The UN Refugee Agency

Inter-Agency Data Gathering Tool

Expanding the role of information management

To Cover Activities

To Enhance

Using technology and simple systems

- Collaboration
- Analysis
- Information sharing

To Enable

Information Management (IM) **enables**

- Situational understanding/trends
- Coordination
- Strategic and operational decision making
- Accountability
- Advocacy
- Fundraising
- Service Delivery

Inter-Agency Data Gathering Tool
Objectives

- The piloting of a common Data Gathering Tool aligned to sectoral objectives and performance indicators aims to:
  - Enable a standard approach to how data is created, updated, stored and analysed within the Ethiopia Refugee Response to support collective outcomes.
  - Reinforce joint accountability between all humanitarian partners (IP and OP), and streamline existing monitoring and reporting processes.
  - Contribute to the preparation of a quarterly situational analysis, provide partners (and donors) with a comprehensive overview of trends, progress against targets, to inform response interventions, defining operational gaps and funding needs.

In 2018 for South Sudanese caseload only to support current RRRP minimum reporting requirements (24 partners).

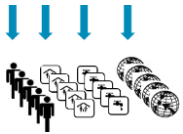
The Analysis Spectrum

Pro-active

DESCRIBE
Who, what, where, when, how?

Summarise



Compare

EXPLAIN
Why?

Why is it like this?

Does it make sense?

How is it compared to pre-crisis situation?

INTERPRET
What does it mean?

What is important and **why?**

Is it plausible?

How sure are you?

So what?

ANTICIPATE
What happens next?

Reactive

Data driven

Concept driven

Workflow and responsibilities

Monitoring - Planning

Country-wide
- Prepare Monitoring Plan
- Identify Population Site and Area of Responsibility by Population Group

Sector Specific
- Update Baseline and Target by PPG, Data Collection Frequency by Indicator
- Accept Indicators Data Collection Planning

Organization
- Subscribe to Objective by Location

Monitoring - Data Collection

Organization
- Collect Indicators Attributes by Organization and Site

Site
- Collect Indicators Attributes by Site

Sector Specific
- Collect Indicators Attributes by Area of Responsibility

Country-wide
- Collect Indicators Attributes by Population Group

Next steps

- **Pilot rollout** for South Sudanese caseload to support current RRRP reporting requirements, as part of 2018 prototyping.
- **One-day field-based training** in Gambella and Assosa for RRRP Partners.
- **Quarterly situational analysis** against RRRP indicators to be compiled ahead of RCG meeting in September.
