

Child Protection Dashboard

Uganda Refugee Response Plan (RRP) 2019-2020

January - June 2019

Overview

Child Protection partners are continuing to strengthen the case management system, including through emphasis on case prioritization, workforce skills development and the roll-out of the Best Interest Procedures SOP.

Improving alternative care arrangements for unaccompanied children remains a priority, with a focus on training of foster parents and provision of livelihood support. More efforts are needed to further align alternative care procedures for refugees with national alternative care policies. Given the limited capacity of the child protection workforce, strengthening community-based child protection structures remains critical to follow-up on and monitor children in need and to ensure early identification and mitigation of further protection risks.

Children in need were provided with psychosocial support, with a focus on strengthening their resilience and capacities to protect themselves. In order to reduce the risk of teenage pregnancy, early marriage and substance abuse among children, partners continue to provide support for post-primary education, vocational skills training and other targeted interventions.

Key indicators

Target: 339,389

10,499Birth registrations

118
Child friendly spaces

Objective: Adequate and quality child protection services for children, including case management services, are provided in refugee and host communities

657

Actual Target/Standard (*19) Actual against annual target or standard

Open and active individual child protection (CP) cases

- Congolese and other refugees 9,716 4,811

- South Sudanese refugees 34,665 38,015

461

Of which:

Sector contacts:

- Burundian refugees

UASC with open and active CP cases
