

Uganda

1– 30 June 2022

By the end of June, Uganda hosted **1,529,272** refugees and asylum seekers. The Individual Profiling Exercise (IPE) is still ongoing. By the end of June, 816,142 individuals (192,932 households) have been verified, representing 51% of the Uganda refugee target population. The IPE is planned to be completed by the end of October 2022.

From 28 March, the intensification of the conflict in the DRC triggered an increased influx of refugees from North Kivu and Ituri provinces entering Uganda with over 50,000 new arrivals from DRC in the first six months of 2022.

COVID-19 UPDATE

Cumulatively, as of 30 June 2022, **167,511 COVID-19 cases** were

confirmed in Uganda. Of these **6,563** were and **1,371** humanitarian workers.

Countrywide, **3,621 deaths** were reported since March 2020, including **61 refugees** and **four humanitarian workers**. A total of **280,118 refugees** received the **first dose** while **73,244 refugees** have received the second dose.

KEY FIGURES:

1,529,272*

Number of **refugees** and **asylum seekers** as of 30 June 2022.

1,489,558

Total **refugees** in Uganda as of 30 June 2022

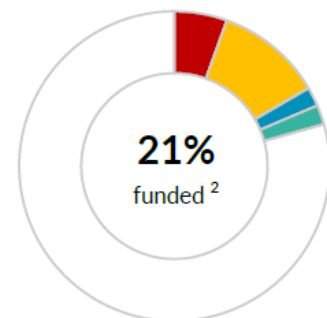

39,714

Total **asylum-seekers** in Uganda as of 30 June 2022.

** The total population figure is provisional and is expected to change following completion of the ongoing verification exercise. Verification absentees will be provided a grace period of 3 months.*

UNHCR'S 2022 financial requirements USD 343.4 million

Contextual and operational highlights

World Refugee Day 2022: The World Refugee Day (WRD) national celebrations were held on 20 June 2022, in Nakivale refugee settlement, Isingiro district under the theme: **“The Right to Safety while protecting and Conserving the Environment.”** The guest of honor was the Minister of State for Relief, Disaster Preparedness and Refugees, Hon. Esther Anyakun. The UNHCR Representative also attended. Other guests included three Members of Parliament, donors, other dignitaries and thousands of refugees. This was the first public gathering for WRD after two years of lock-down due to the COVID-19 pandemic. The event included the participation of refugees from settlements across the country. The Minister reiterated Government’s commitment to maintaining an open-door policy for refugees despite the challenges resulting from the reduction in funding. She also encouraged refugees to protect the environment, which was one of the focus areas 2022 WRD celebration in Uganda. The operation also facilitated a live feed on Facebook and Twitter from Nakivale and Kisoro, a joint Inter-Agency press release, stories publication and national media coverage. Settlement-specific events were also held across the operation.

COVID-19: Since March 2020, a total of 6,563 refugees have tested positive for COVID-19, with 61 deaths. Countrywide 167,511 COVID-19 positive cases were recorded, with 100,401 recoveries and 3,621 deaths. In total, 1,371 humanitarian workers have tested positive for COVID-19 while four have succumbed across the country. The Ministry of Health continues to carry out COVID-19 vaccination for both citizens and refugees. In total, 280,118 refugees; 3,996 health workers; 7,630 teachers, and 9,210 other humanitarian workers received the first dose of the COVID-19 vaccine. Those that have received the second dose include 73,244 refugees, 4,439 teachers, 3,199 health workers and 3,721 humanitarian workers.

Kisoro Emergency: The security situation in Bunagana, Kisoro district, close to the border with the Democratic Republic of Congo (DRC) remains tense and unpredictable. New arrivals continue to be received at the transit centre and holding area. Out of over 50,000 refugees who have crossed from DRC in 2022, an estimated 35,129 new arrivals were received in Kisoro since 28 March. As of 30 June 2022, 12,930 individuals remained at the holding area and transit centre. The cumulative population at Nyakabande holding area registered through non-biometric enrolment is 7,979 Individuals (1,957 households). The holding capacity at Nyakabande Transit centre is overstretched by 75.8% while Kabazana reception centre (receiving new arrivals from Nyakabande transit centre) in Nakivale refugee settlement, is over stretched by 6.1%. Bwera holding centre (Kasese) has been closed.

Verification and Individual Profiling Exercise (IPE): The verification and IPE process is currently ongoing in five settlements. Since the start of the exercise, 816,142 individuals (192,932 households) have been verified, representing 51% of the Uganda refugee target population. In Bidibidi settlement, 87,011 individuals (18,267 households) have been verified, representing 35% of the population. The completion rate in Palorinya settlement is at 64%, which is 81,914 individuals (18,374 households), while in Adjumani settlement, 75,860 individuals (10,851 households) have been verified, representing 31% of the target population. In Rhino Camp settlement, 39,450 individuals (6,438 households) have been verified, representing 29% of the population. The team in Kiryandongo settlement has verified 41,479 individuals (6,797 households), representing 53% of the target population. The estimated completion date for the Verification/ IPE is 31 October 2022.

Government of Uganda and UNHCR visit to European governments and institutions: The Minister of State for Relief, Disaster Preparedness and Refugees, Hon. Esther Anyakun, and the UNHCR Representative, accompanied by two officials, conducted a fundraising mission to Europe. From 5 to 12 June 2022, they met officials in the different capitals, to advocate for additional funding to the refugee response in Uganda. This visit provided the occasion to exchange on how European partners can further support the implementation of the country's Global Compact on Refugees (GCR) commitments towards refugees' socio-economic inclusion in Uganda. The tour started in Denmark and continued to the Hague and Brussels for meetings with European institutions and government representatives.

Minister's Briefing to Ambassadors and Heads of Agencies: The Minister of State for Relief, Disaster Preparedness and Refugees, Hon. Esther Anyakun, and the UNHCR Representative, briefed Ambassadors and Heads of Agencies about their mission to Europe. The meeting registered the participation of Ambassadors, Heads of Cooperation services from European countries and institutions, United States of America, Japan, China, Turkey and South Sudan. The participants recognized that the situation in Uganda remains complex and that the existing response mechanisms were being stretched. Partners also committed to keep Uganda on the agenda in their capitals and to continue supporting the country refugee response despite limited funding and competing priorities.

Bidibidi soap factory Cooperative goes commercial: In June, a Soap production Cooperative made up of the soap factory workers distributed bar soaps costing 5,000 shillings each to shops across Bidibidi. This is the lowest price in Uganda, and the sales were very successful as the cooperative registered a 1.2 million turnover in just one day. The soap factory became operational in

December 2021. It is run by 17 refugees and host community members, with a projected monthly production capacity of 60 tons of certified soap. The Cooperative invited shopkeepers from 13 selling points in five zones of the Bidibidi settlement to sell their soaps. In parallel to its commercial activity, the board of directors decided to support UNHCR by making a donation during the World Refugee Day event in Nakivale.

Menstrual Hygiene Management Kits (MHM) and general soap distribution will be discontinued in July due to funding shortfall: Women and girls across all settlements will no longer receive sanitary pads due to a lack of funding. This will put them at increased risk of school dropout and impact on their self-esteem. UNHCR and UNFPA are exploring possible solutions with a focus on providing reusable sanitary napkins, disposable sanitary pads, underwear and soap. USD 3M is urgently needed to cover all women of reproductive age for the next six months. For the general soap distribution, USD 4M is needed over the same period.

Departure of Country Representative: UNHCR Country Representative in Uganda Joel Boutroue ended his duties on 30 June 2022 and retired after a career with the UN and four years at the helm at the UNHCR operation in Uganda. The new UNHCR Representative, Matthew Crentsil arrived in Uganda at the end of June to take up his assignment from July 2022.

PROTECTION

Achievements and Impact

Burundi Voluntary Repatriation: UNHCR continues supporting the voluntary repatriation of Burundian refugees. Two convoys with 775 individuals (219 households) left Uganda for Burundi, through Tanzania, on 8 and 21 June 2022. Since December 2020, UNHCR and the Government of Uganda have facilitated the voluntary return of 8,522 refugees to Burundi through Tanzania in 22 convoys. There are plans to start voluntary repatriation of Burundian refugees through Rwanda to address the issue of spontaneous returns through this route. Accordingly, UNHCR and the Government of Uganda will use both the Tanzania and Rwanda routes to repatriate Burundian refugees.

Refugee status determination: From 13 to 17 June 2022, the Refugee Eligibility Committee (REC) held a session for Kyaka and adjudicated 943 asylum applications (2,561 individuals from DRC, Burundi, and Rwanda) with an overall recognition rate of 88%. Since January 2022, the REC has held five sessions (three for Kampala, one for Nakivale and one for Kyaka) and adjudicated 10,190 asylum applications (17,857 individuals).

In addition, two Refugee Appeals Board (RAB) sessions were held in the Kyangwali settlement and Kampala to review 58 appeal applications (199 individuals). The board confirmed decisions of REC for 33 cases (123 individuals), set aside 20 cases (50 individuals) and ordered a re-hearing of five cases (13 individuals). Since January 2022, the RAB has held five sessions (three in Kampala and two in Kyangwali) and reviewed 125 appeal cases (416 individuals); confirmed decisions of the REC for 70 appeal cases (238 individuals), set aside 49 appeal cases (159 individuals) and ordered rehearing of six cases (9 individuals). UNHCR participated in REC and RAB sessions as an observer, and provided logistical and technical support to competent authorities.

**HEALTH****Achievements and impact**

Health statistics: In June, 250,966 consultations were registered across the refugee response (24% nationals, 76% refugees) with each clinician seeing on average 63 consultations per day (Standard <50). The major disease burdens were malaria (44%), Upper Respiratory Tract Infection-URTI (11%), skin diseases (4.2%), Lower respiratory Tract Infection-LRTI (8%) in the general population. Among children under five years, malaria was leading at 40%, followed by URTI (15.5%), skin diseases (5%), LRTI (12%), and diarrhea (7.2%).

Mortality: Crude Mortality Rate (CMR): 0.07 deaths / 1,000 population / month against (standard <0.75 deaths / 1,000 population / month), a 12.5% decline from last month. Leading causes were malaria (20%), LRTI (5.1%), and neonatal death (5.1%). Under Under-five mortality rate was at 0.09/ 1,000 population / month (Public health standards < 1.5 deaths / 1,000 population / month) the same as last month. The major causes were malaria at 24%, neonatal death (10%), LRTI (8%) and acute malnutrition (6%). of less than Low respiratory tract infection at 8%, neonatal death at 10% and acute malnutrition at 6%.

Live births: A total of 3,994 live births were registered in June (97% assisted by skilled health workers at health facilities), including 60% of refugees and 40% of nationals.

Child immunization: A total of 6,637 children were vaccinated against measles, and 19,59 received diphtheria and polio vaccines.

HIV prevention, care, and treatment: In June, 12,319 individuals tested for HIV in the settlements, of whom 134 positives cases enrolled into HIV care and treatment. A total of 5,403 mothers attended antenatal care clinics for the first time and were tested for HIV to prevent mother-to-child-transmission. Of the positive, 19,090 cases are currently receiving HIV treatment in the settlements (36% are refugees and 64% nationals).

**ENVIRONMENT AND ACCESS TO ENERGY****Achievements and Impact**

World Environment Day: Commemorative events were organised at different locations for the World Environment Day. These included symbolic tree planting (due to the ongoing drought), radio talk shows, community mobilization and solid waste collection.

Tree planting: The long-awaited delivery of teak stumps in West Nile (Adjumani, Arua, Yumbe and Moyo) was actualized. Arua operation received 36,563 stumps. Planting of other species also continued. This included 18,780 assorted seedlings planted in Adjumani and Lamwo to establish 13.2 hectares of woodlots. In Kyangwali, 6,147 tree seedlings were distributed to individuals from Bujubuli, Buliti, Mukondo Byabakora, host community of Bwiriza and Kakoni Wisdom Primary School. Nsamizi, an environment partner, planted 2,160 bamboo seedlings in Mukarange/ Kavule village for wetland protection through demarcation. In Palorinya, 4.4 hectares of plantations were established with 2.8 hectares of fruit trees and 1.6 hectares of fast-growing woody species planted.

Woodlot maintenance: Owing to the generally dry conditions, especially in the Southwest, most operations shifted focus on maintaining existing woodlots and preparing land for tree planting in anticipation of the rainy season. Oruchinga maintained eight woodlot hectares while Arua maintained 100 hectares established in 2021 and 130 hectares established in 2022, through slashing, strip weeding and pruning. Over 70 hectares of teak plantations were cleaned through weeding in Eria central forest reserve under Moyo operation.

Clean and sustainable energy: Over 200 cookstoves were constructed across the operation. Bio latrines were opened up for use in three primary schools- Kabahinda (Nakivale), Nteziryayo (Rwamwanja) and Bwiriza (Kyaka II). Pupils were oriented on using the facilities.

With active involvement of local leaders, 11 solar streetlights were repaired across Adjumani settlements to improve safety of persons of concern, particularly at night. In addition, 264 solar lanterns were distributed. Arrangements are underway to have five solar streetlights installed at Kyaka II Vocational Training Center.

Challenges and Gaps:

- The prolonged drought affected planting targets.
- In West Nile, the delayed delivery of teak stumps remained a challenge. Delays were also reported for other species.
- Insufficient funding affected energy access.

SHELTER, SETTLEMENTS AND NFI

Achievements and Impact

Overnight structures: In Arua, the construction of three permanent overnight structures at Imvepi reception centre and of two permanent overnight shelters at the Ocea reception centre is 90% completed. The construction of two permanent overnight structures at Kuluba transit centre is complete. At Nyumanzi (Adjumani), the construction of two semi-Permanent structures is 99% complete. In Rwamwanja, the maintenance work at Mahani reception centre is completed. It included kitchen renovation, and the construction of a permanent communal Kitchen, a permanent accommodation shelter and the demolition of two temporary shelters.

Shelter kits: A total of 2,956 new arrivals (1,625 households), from Kisoro, were allocated plots and shelter kits in Nakivale refugee settlement.

Hospital structures: In Arua, the phase I of the Koboko hospital construction is completed while phase II is at 95%. The construction of the pharmaceutical warehouse in Kiryandongo is 90% complete. The construction of the Antiretroviral Therapy (ART) clinic at Rulongo health centre III in Oruchinga was completed and handed over. This replaces the temporary kiosk which was previously used. In Rwamwanja, the health outpost at Mahani was upgraded. This will improve the provision of medical services to the community.

School structures: the construction of two blocks (four units) of staff accommodation, a four stance VIP latrine and bath shelters at Kiryandongo High School is 90% complete. At Palorinya Secondary School, the construction of a three-classroom block is at 90% completion. The upgrading of Valley View Secondary School in Yumbe is 85% complete. The chain link fencing of the vocational training centre in Kyaka II was also completed to provide safety to students and property. The three-classroom block at Nakivale Secondary School and the vocational training centre dining have been renovated.

The construction of semi-permanent classroom blocks at Bukere Primary School, Sweswe Primary School and Bujjubuli Primary School is 60% completed. Once completed, the new structures will increase the study space and decongest overpopulated classrooms and reduce the risk of Covid 19 in schools.

Police accommodation: The construction of a police accommodation block, WASH facilities and holding cells in Tika Rhino camp is 80% completed.

Challenges and Gaps

- Road rehabilitation remains a major challenge throughout the settlements.
- Gap and challenge in provision of shelter across the operation with no consistent shelter partners except UNHCR since 2019.
- Need for physical planning to guide developments within the settlements.
- Solar power supply needed for the protection house at Bijo in Bididbidi refugee settlement.
- Non-compliant contractors affecting the timely completion of some projects (ex. Adjumani).
- Latrines, bath shelter, metallic shelves, and interceptor for motor vehicle workshop in Yumbe.
- Latrines at Women's centres, accommodation for health personnel, Solar power connection for remaining five health facilities, upgrade of Goboro infrastructure in Yumbe
- Repair of roads in Bididbidi refugee settlement.

EDUCATION

Achievements and impact

Enrolment situation and data: In the second term of 2022, the gross enrolment rates (GER) for refugees stands at 43% (36,611 male; 36,168 female) in Early Childhood Education (ECD), 77% (150,228 male; 132,989 female) in primary and 8% (14,705 male and 6,217 female) in secondary education. An additional 115,104 (58,163 male; 56,941 female) host community children are enrolled across as follows: 12,547 in ECD; 93,264 in primary and 9,293 in secondary education. Refugees account for 77% of the enrolment against 23% host community. With 53% of male students and 47% female students, the gender parity is almost reached. Access to education remains uneven and limited in the settlements. Access to ECD and post primary education (secondary) is of particular concern. GER rates reveal that 57% of ECD school going age and 92% of post primary education (secondary) remain out-of-school.

Inclusion: Efforts to improve education data collection and ensure inclusion of refugees in the national Education Management Information Systems (EMIS) and planning are ongoing. The Ministry of Education piloted an EMIS data collection exercise in Kiryandongo refugee settlement in preparation for inclusion of refugees and scale up. The pilot was conducted in three primary schools and three secondary schools. The EMIS pilot was supported by UNHCR through the Education Response Plan (ERP) secretariat and Windle International Uganda (WIU). The official grant-aiding of seven primary schools in Adjumani (Ayilo 1A, Ayilo 1B, Maaji III, Nyumanzi 1, Nyumanzi 2, Pagirinya 2 and Zoka Central) took place in June 2022. As part of the grant aiding process, these schools received government grants on their accounts. The grants were based mainly on enrollment figures of refugees recorded in March 2020, when the initial data capture took place.

Effective 27 June 2022, government supported headteachers were deployed in each of the schools to replace those deployed by UNHCR through WIU. Some of the former headteachers have been re-deployed deputy headteachers in the same schools. This will facilitate a smooth handover and transition process. However, the government is yet to deploy classroom teachers in these schools.

Special training for School Management Committees (SMC's) of the transitioned schools was conducted as capacity building for their new roles in government aided schools. The training had a special focus on basic financial management for government-aided schools.

Emergency response preparedness: In preparation for receiving new arrival learners in Nakivale due to the current Democratic Republic of the Congo (DRC) refugee influx, the Education in Emergencies (EiE) partners conducted a joint education needs assessment with the aim of finding out the key education needs and ascertain readiness of the education institutions in Nakivale to receive and enroll the new arrival learners. Approximately 98% of the children and youth are willing to enroll in school. This therefore implies a great need for education interventions. Critical education needs highlighted included scholastic materials, food for the learners, need for transport and mental wellness support, additional infrastructure, and teachers to address the already glaring efficacy ratios, mental health and psychosocial support services, tuition fees for learners in need of higher education and children with special needs unable to benefit from the inclusive schools due to nature of their complex disabilities. Innovations like double shift school systems and other innovative approaches including inter-sectorial linkages should be leveraged as new schools await establishment. The assessment was led by WIU also involved the participation of OPM, District Local Government, UNHCR, Norwegian Refugee Council, Humanity & Inclusion, War Child, Save the Children, and refugee structures.

Government-led coordination, systems strengthening and monitoring of the ERP: Workshops to validate the Education Response Plan (ERP) end line survey and Covid 19 impact on education survey report were conducted on 13 June 2022. Participation was drawn from the Ministry of Education and other line ministries, District Local Government representatives, OPM, UNHCR, ERP and national / international partners. The reports have subsequently been approved by the ERP steering committee and dissemination is underway.

Return to school for pregnant and child mothers: UNHCR and other education stakeholders continued with efforts to ensure pregnant and child mothers are accorded a second chance to return to schooling. In Kyangwali refugee settlement additional 36 child mothers were mapped out by stakeholders and encouraged to attend primary education. This brought the total to 111 teenage mothers as compared to 72 as registered at the beginning of the term in May. At least five of the child mothers were issued bicycles to ease their movements and ability to attend to their babies and classes in a timely manner.

Tree planting during the celebration of World Refugee Day in Nakivale Settlement, Uganda

Working in partnership with:

Government - Office of the Prime Minister (OPM), District Local Governments (DLGs), Ministry of Agriculture Animal, Industry and Fisheries (MAAIF), Ministry of Education and Sports (MoES), Ministry of Energy and Mineral Development (MEMD), Ministry of Gender Labour and Social Development (MGLSD), Ministry of Health (MoH), Ministry of Local Government (MoLG), Ministry of Trade Industry and Cooperatives (MTIC), Ministry of Water and Environment (MWE).

District authorities in refugee-hosting/receiving districts – Adjumani, Arua, Isingiro, Kampala, Kamwenge, Kanungu, Kikuube, Kiryandongo, Kisoro, Koboko, Kyegegwa, Lamwo, Madi Okollo, Moyo, Ntoroko, Obongi, Terego and Yumbe
