

# **AAP Task Force**

MOLDOVA, 2022

# Quick update: Winterization

The joint Inter-Agency Winterization Strategy objective is to ensure refugees, TCNs and hosting families can access targeted winter support, while complimenting the government response by supporting the most vulnerable Moldovans households.

The services available in the country will change during winter, as well as the flow of information. In addition, recent assessments and interactions with refugees and local actors, revealed that most of the time people don't access a service because they didn't know about them and/or how to do it.

**RRP Participation.** All organizations must be formally registered in Moldova to be able to submit project to the RRP.

# Local mapping consultations

- Improve the humanitarian response by having reliable information for key decision-making process in the context of the 2023 Refugee Response Plan planning process.
- Identification of local needs and proposed solutions directly from relevant stakeholders, including community leaders from refugees and hosting communities.
- Mapping neighbourhoods with high concentration of refugees, as well as the obstacles in those areas for people to access basic services.

# TEMPORARY PROTECTION
