The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations. Final boundary between the Republic of Sudan and the Republic of South Sudan has not yet been determined. Final status of the Abyei area is not yet determined.
Points of entry: where people first enter South Sudan. Border/flow monitoring led by RRC, IOM and UNHCR starts here. The response priority is to facilitate onward movement from the border areas which are extremely remote with little infrastructure. UNHCR and partners are providing life-saving assistance and assisting the most vulnerable with transportation to the transit center.

Transit centers: temporary sites in transit locations where the most vulnerable population are assisted with essential services while waiting for onward transportation. Refugees upon identification will be assisted and transported to the existing refugee settlements and camps. As majority of the arrivals are South Sudanese refugee returnees, the focus of UNHCR and partners is to assist the most vulnerable group while supporting the government to decongest the border/transit areas and expand options for onward movement.

This flow from points of entry to transit centers and camps is operational in Upper Nile State. A similar flow and the related service provision is being set up in Unity and Northern Bahr Ghazal States.
South Sudan > New population movements from Sudan

Joda - Point of Entry
Flow Monitoring: HDC, IOM, UNHCR, RRC
Border transportation: UNHCR, IOM
Reception centre site management: ACTED, UNHCR
Health: IMC, RI, UNICEF, UNHCR, WFP
Nutrition: GOAL, UNICEF, UNHCR, WFP
