**Mixed Movements Official Data**

**Darien Province, Panama-Colombia Border**

**July 2023**

### Context

Darien is Panama’s largest and poorest province. Bordering Colombia, the province hosts a 60-mile-deep jungle, the only breaking point of the Pan-American highway, linking the continent from south to north. Despite being one of the most dangerous jungles in the world, Darien is a transit location for thousands of refugees and migrants, most of them coming from Haiti, Venezuela, Cuba, and African and South Asian nations. According to official statistics of the National Migration Service (SNM), from 2010 to 2020, some 120,000 people crossed through this area. Panama has been facing an unprecedented mixed movement crisis in the last two years, with nearly 400,000 people making this perilous journey through the jungle. In 2022, a total of 248,284 people entered the country irregularly through Darien.

### Key Figures

- **Total entries in 2023:** 196,371
- **Total entries in June 2023:** 29,722
- **65%** Men
- **35%** Women
- **80%** Adult
- **20%** Children

UNHCR Data Collection

UNHCR, the UN Refugee Agency, collects monthly information on the characteristics, vulnerabilities, and protection needs of refugees and migrants who enter Panama through the province of Darien at the southern border with Colombia. The information is compiled through individual interviews conducted in Panama’s Darien and Chiriquí provinces. The preliminary results presented here are indicative only. They should not be interpreted as representative of the total population of refugees and migrants crossing the border through the Darien jungle.

Demography

Sex of interviewed individuals

- 50% Men
- 50% Women

Average age

- 31 Years

Travel group composition

- 56% Entire family
- 8% Friends
- 1% Unrelated companions
- 21% Part of the family
- 16% Alone

Nationality of interviewed individuals

- 75% Colombia
- 11% Ecuador
- 4% Colombia
- 3% Haiti
- 8% Other

Other nationalities include: Afghanistan, Burkina Faso, Cameroon, and Togo.

Country of residence in the last year

- 45% Colombia
- 24% Ecuador
- 16% Peru
- 12% Chile
- 2% Argentina
- 2% Brazil

Documents carried by the family

- 63% Birth Certificate
- 17% National ID
- 14% Passport
- 11% Expired Passport
- 3% None
- 3% Other
Three quarters of interviewed refugees and migrants were from Venezuela (75%). Nearly half of interviewed Venezuelans (45%) were coming directly from Venezuela, followed by the countries in which they reported residing in the last six months, mainly: Colombia (27%), Ecuador (14%), and Peru (9%). A very small proportion (2%) reported still having current documentation from this country of residence.

77% of respondents reported travelling with family, and they were accompanied by an average of three adult family members, and two children. Furthermore, 42% of respondents reported travelling with at least one child under five.

Compared to the previous month, the average reported time for crossing the jungle was lower in July (4 days). In addition to the worsening terrain conditions in the jungle, one-third of interviewed individuals in July reported experiencing theft, scams or fraud in their journey.

78% of interviewed individuals left their country of origin/residence less than four weeks ago.

Most of them are planning to stay less than a month.

1 in 10 of interviewed individuals reported travelling with a survivor of violence in their group (sexual, physical or psychological).

3% of interviewed individuals reported traveling with pregnant or lactating women.

1% of respondents reported traveling with someone with a critical or chronic medical condition.

2% of interviewed individuals reported traveling with unaccompanied children in their group.

3% of interviewed individuals reported traveling with children in their group.

1% of interviewed individuals reported traveling with an elder in their group.

4% of respondents reported traveling with someone with a critical or chronic medical condition.

Most common reasons reported under “Other” includes seeking Protection.

### Main reasons for leaving country of origin

- **Access to employment**: 82%
- **Violence and insecurity**: 65%
- **Access to food**: 16%
- **Attacks, threats or intimidation**: 12%
- **Access to healthcare**: 5%
- **Access to education**: 3%

65% reported risks if they had to return to their country of origin/residence.

68% of Venezuelans that had not resided in other countries reported violence and insecurity as one of the reasons for leaving their country of origin.

### Main reasons for leaving country of residence

- **Access to employment**: 80%
- **Violence and insecurity**: 25%
- **Access to food**: 8%
- **Attacks, threats or intimidation**: 6%
- **Access to healthcare**: 2%
- **Access to education**: 2%

### Reasons for choosing destination country

- **Economic opportunities**: 70%
- **Family reunification**: 33%
- **Friends living there**: 25%
- **Other**: 4%
Followed by Canada (2%), Costa Rica (1%), and Mexico (1%).

Also received information through social networks, mainly Facebook (24%), TikTok (27%) and YouTube (3%).

96% of interviewed individuals reported the United States as their final destination.

6 in 10 interviewed reported receiving information about the journey and making decisions based on the information received from friends and relatives who had already made it.

3 in 4 interviewed reported that if they were unable to reach their country of destination, they would wait until allowed to proceed to said country.

4 days is the average time interviewed individuals crossed the Darien jungle. (Min. 2 days and Max. 9 days).
