Mixed Movements Official Data
Darien Province, Panama-Colombia Border

Context

Darien is Panama’s largest and poorest province. Bordering Colombia, the province hosts a 60-mile-deep jungle, the only breaking point of the Pan-American highway, linking the continent from south to north. Despite being one of the most dangerous jungles in the world, Darien is a transit location for thousands of refugees and migrants, most of them coming from Haiti, Venezuela, Cuba, and African and South Asian nations. According to official statistics of the National Migration Service (SNM), from 2010 to 2020, some 120,000 people crossed through this area. Panama has been facing an unprecedented mixed movement crisis in the last two years, with nearly 400,000 people making this perilous journey through the jungle. In 2022, a total of 248,284 people entered the country irregularly through Darien.

Key Figures

- Total entries in 2023: 251,758
- Total entries in July 2023: 55,387
- Men: 65%
- Women: 35%
- Adult: 79%
- Children: 21%

Source: Panama National Migration Service
UNHCR, the UN Refugee Agency, collects monthly information on the characteristics, vulnerabilities, and protection needs of refugees and migrants who enter Panama through the province of Darien at the southern border with Colombia. The information is compiled through individual interviews conducted in Panama’s Darien and Chiriquí provinces. The preliminary results presented here are indicative only. They should not be interpreted as representative of the total population of refugees and migrants crossing the border through the Darien jungle.

### UNHCR Data Collection

**107 Interviews in August 2023**

- **San Vicente**: 10 interviews
- **Darien Province**: 87 interviews
- **Chiriquí Province**: 10 interviews

**COSTA RICA**

- ETRM Lajas Blancas: 87 interviews

**COLOMBIA**

- **ETRM San Vicente**: 10 interviews

---

**Demography**

**Sex of interviewed individuals**

- **53%** Men
- **47%** Women

**Average age**

- **32** Years

**Travel group composition**

- **67%** Entire family
- **7%** Friends
- **6%** Unrelated companions
- **17%** Part of the family
- **9%** Alone

**Nationality of interviewed individuals**
