The Project 21 is a regional protection monitoring system, launched in 2020 to address gaps in data collection and analysis on protection in West and Central Africa. The inter-agency project mobilizes partners to collect a set of data using harmonized tools and a common methodology to generate joint analysis of the situation, risks, and protection trends. As of 27 September 2023, 5,853 newly arrived refugees have been interviewed in Chad for the Sudanese emergency. This represents a subset of the collected data.
