

As the conflict in Sudan continues and in light of the number of people having already fled to Chad, the Chadian Government estimates that up to **600,000*** refugees and returnees could arrive in Chad by the end of 2023

Context

Since the beginning of the conflict in Sudan on April 15, 2023, the CNARR, UNHCR and IOM have noted an **influx of people forced to flee including Sudanese refugees and Chadian returnees** who arrived spontaneously in Chad through over 32 border entry points in the three provinces of Ouaddai, Sila and Wadi-Fira in Eastern Chad. From the onset of the influx, humanitarian teams are working in support of the Chadian Government and local authorities to provide **life saving assistance and a set of Protection services both in spontaneous sites and also in the extension as well as the newly established settlements.** As of date under the leadership of the Government and UNHCR 40.4% of refugees have been relocated from the spontaneous arrival sites to both the extension and newly established settlements where refugees and host communities benefit from the services delivered by the humanitarian teams.

450,636** Fixed new arrivals
130,935 Households

35 Host villages

Fixed new arrivals per province

Individual biometric registration

(Gaga, Farchana, Abéché, Oure Cassoni, Iridimi, Ourang, Adré, Touloum & Kounougou refugees settlements)

90,506 Registered
25,916 Households

85% registered are women & children
17% registered have specific needs

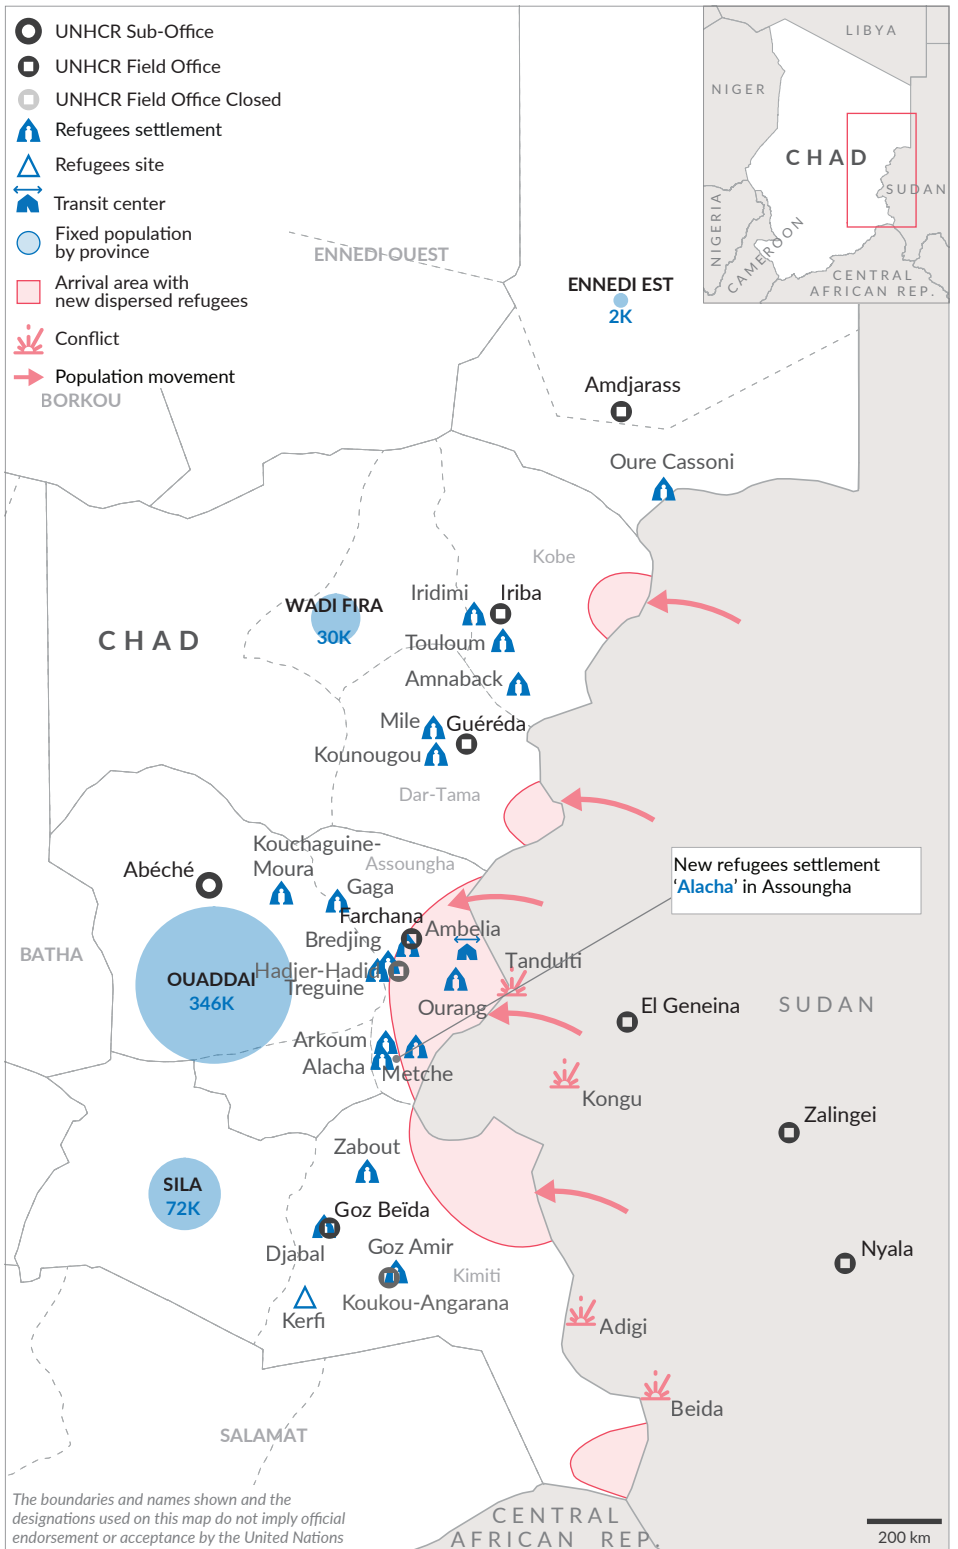

Age and gender breakdown of registered persons

Registered persons with specific needs

80,986*** Migrants Returnees arrivals (Estimated)
93% Returnees are women & children

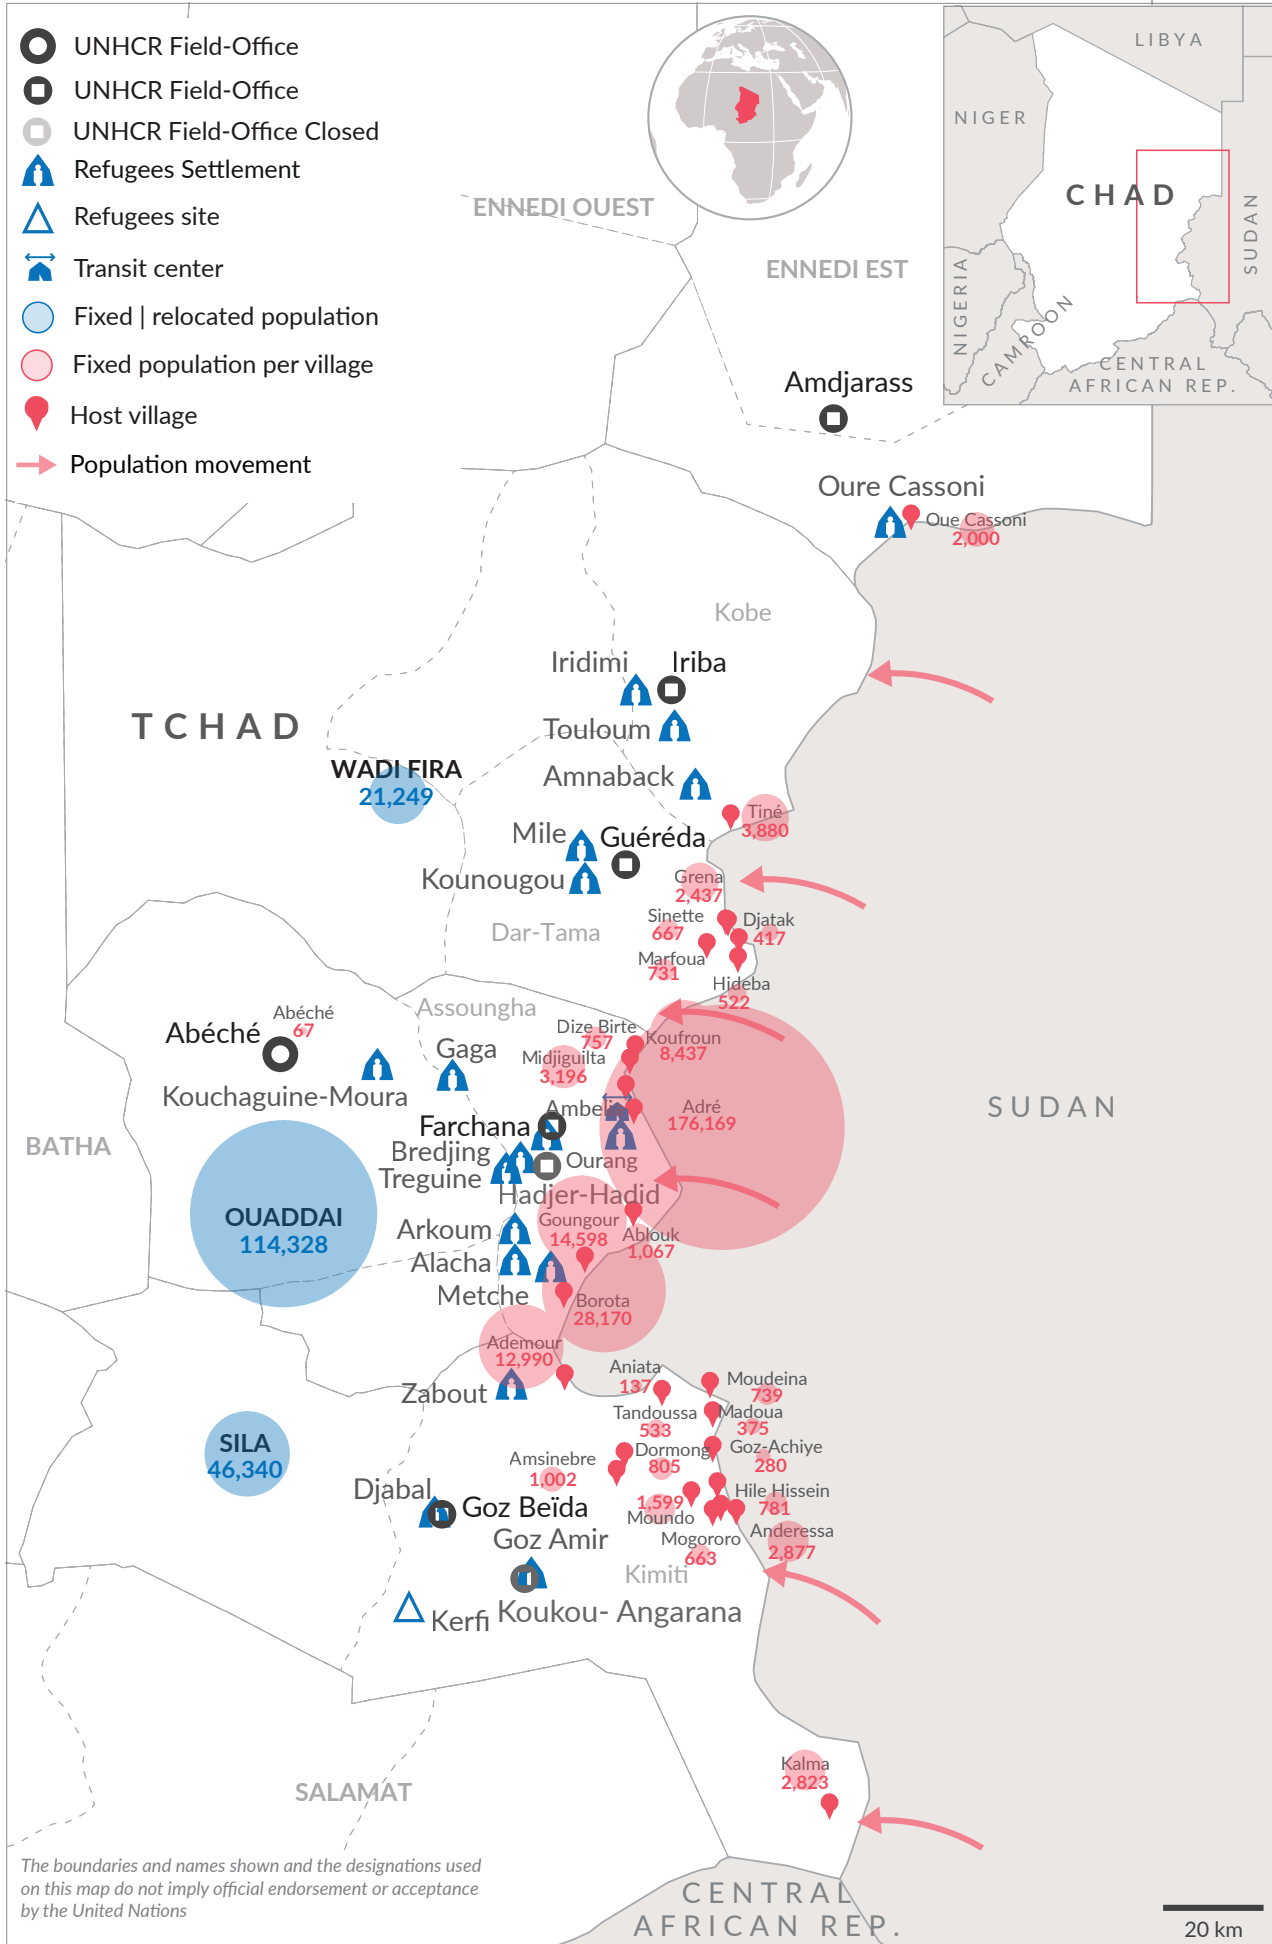

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations

*Source: Estimation by the Chadian government

**Based on border monitoring, observations during first counting activities and protection activities during refugee relocation, we have reasons to believe that this figure could experience a reduction by about 20%. The completion of the relocation process and individual biometric registration, which will take place in the Refugees settlement, will confirm precise refugee figures.

ACCESS TO TERRITORY AND ASYLUM

What types of identified dangers or threats are you exposed to?

DOCUMENTATION

What type of individual document do you possess?

BASIC NEEDS AND ESSENTIAL SERVICES

What category of items does your family need the most?

COMMUNITY ENGAGEMENT

What type of information would you like to receive from humanitarian workers and authorities?

GENDER BASED VIOLENCE

Are there specific places in the host community where you do not feel safe?

The Project 21 is a regional protection monitoring system, launched in 2020 to address gaps in data collection and analysis on protection in West and Central Africa. The inter-agency project mobilizes partners to collect a set of data using harmonized tools and a common methodology to generate joint analysis of the situation, risks, and protection trends. As of 30 October 2023, 6,094 newly arrived refugees have been interviewed in Chad for the Sudanese emergency. This represents a subset of the collected data.
