On 3 October, Pakistan’s national Apex Committee endorsed a plan to repatriate over a million foreigners without valid documents, largely Afghans, requiring them to leave the country by 1 November.

Since 15 September, over half a million Afghans have returned to Afghanistan. Most of this movement took place during the month of November, with a significant decrease afterwards, with January and the first half of February registering the lowest numbers. The last two weeks of February show an increase in returns.

Since 15 September, UNHCR has assisted over 81,000 individuals, including 47,000 PoR cardholders, of which 27,300 were assisted via UNHCR voluntary repatriation programme.

Most movements took place through Torkham and Spin Boldak-Chaman official borders, although Badini, Ghulam Khan and Bahramcha are also being used.

The blue figures above correspond to the period 15 September 2023 to 7 March 2024, while the navy figures refer only to those who arrived from 1 November 2023 to 7 March 2024.

Returns assisted by UNHCR Afghanistan by Demographic profile

- 48% of assisted are Women
- 52% of assisted are Men

Gender breakdown of head of households

- 27% are Women
- 73% are Men

---

1 An umbrella term that includes all returns including deportations, assisted Voluntary Repatriation (VolRep) and other returns of Afghans of all statuses such as PoR cardholders, ACC holders, and the undocumented.
2 Return figures from 29 February 2024 onwards may fluctuate till validation process is concluded.
3 Prior to 2023, there was no data collected on the arrest and detention of ACC holders or undocumented Afghan nationals.
Returns assisted by UNHCR Afghanistan

In Afghanistan, UNHCR continued to biometrically process and provide cash assistance to PoR card holders and their nuclear family members, UNHCR slip holders, asylum seeker certificate holders and other Protection referrals. Since 15 September 2023, some 81,400 individuals returning from Pakistan have been provided with cash assistance in Kabul, Kandahar and Jalalabad encashment centres, including over 47,000 PoR cardholders. Out of the assisted, some 2.4% are individuals with disabilities and over 2,900 PoR card holders, UNHCR slip holders and Asylum certificate holders were deported.

At least one in four households assisted are headed by women. 33% of them intend to return to five provincial capitals (Kabul, Jalalabad, Kandahar, Lashkargah and Mazar-e-Sharif).

Top 5 provinces of intended destination

- Nangarhar: 31%
- Kabul: 17%
- Kandahar: 16%
- Kunduz: 7%
- Laghman: 6%

Top 10 occupation of the head of households

- Housewife: 18%
- Refuse Workers and Other Elementary Workers: 14%
- Cleaners and Helpers: 10%
- Sales Workers: 8%
- Labouers in Mining, Construction, Manufacturing and Transport: 7%
- Personal Services Workers: 6%
- Personal Care Workers: 5%
- Street and Related Sales and Services Workers: 5%
- Drivers and Mobile Plant Operators: 4%
- Agricultural, Forestry and Fishery Labourers: 4%
Border Protection Monitoring

UNHCR and its partner Wadan in Afghanistan have scaled up protection activities at the border. Daily presence consists of Border Protection monitoring through interviews with returnees including deportees in order to identify protection concerns and risks, as well as their intended areas of return in Afghanistan. Five help desks have been set up to boost protection screening interviews, identification and referral of individuals to be assisted by UNHCR.

Since 12 November, the most reported problems experienced prior to the cross-border movement have consistently been harassment, waiting long hours at checkpoints and detention. Interrogations has continued to be the least reported issue.

4 Multiple choice questions, may add up to over 100%.
5 Other problems include: confiscation of documents, money extorsion, family separation, interrogations, lease not extended, not being allowed to cross with property or livestock, paid bribe to pass police checkpoints, physical abuse and security incident.
Protection Analysis - using natural language processing

In addition to the border monitoring interviews, returnees who are enrolled and provided with cash assistance are asked to elaborate on topics that they would like to highlight to UNHCR. The descriptive experiences and perceptions shared were analysed with Artificial Intelligence using natural language processing for semantic similarities and patterns. The analysis done with a word count of over 27,559, found 10 detailed clusters shown in the diagram below. These 10 clusters can be broadly categorized into experiences leaving Pakistan, specific vulnerabilities in the household and requests for support to meet needs in Afghanistan. Amongst the 10 clusters, shelter and food needs, support needs out of existing protection services, financial needs, and experiences being arrested were the top four most highlighted, compared to, shelter and food needs, experiences of being arrested, harassment and threats by authorities and requests for financial assistance in mid February. The cluster on financial needs now encompasses households with specific economic vulnerabilities as opposed to previously where only requests for cash support were included.

The top highlighted clusters vary with documentation status. For UNHCR Slip holders specifically, arrests was the most common cluster followed by paying of bribes. For those without documentation, in need of support other than Protection services was the most common.
