

Uganda Refugee Response Plan (RRP) 2024-2025

January - March 2024

## Overview

The overall protection objective is to ensure that refugees and asylum-seekers have access to fair and accelerated asylum procedures as well as full enjoyment of their rights as set forth in international and domestic laws. It remains crucial to continue to strengthen the capacity of the protection sector to respond to emergencies, support improvements in registration and the asylum system whilst providing life-saving services, as well as monitoring, mitigating protection risks, building resilience of the forcibly displaced and stateless persons and enhancing durable solutions. Efforts will made to reinforce comprehensive feedback and response mechanisms and accountability to affected populations (AAP). In addition, special focus will be given to the vulnerable groups including persons with specific needs (PSNs) with the objective of ensuring that they have equal access to protection assistance and the opportunity to participate in community self-management and decision-making. Meanwhile, peaceful coexistence among communities as well as the provision of mental health and psychosocial support services (MHPSS) will remain a priority.

## **Product Scope**

This product covers an overview of the sector, key achievements, funding situation including, Registration, Refugee Status Determination (RSD), Community-Based Protection (CBP), Mental Health Psychosocial Support (MHPSS), Legal and Feedback Referral and Resolution Mechanism (FRRM) as part of Protection leaving out CP and GBV which have been analysed in separate dashboards.

## Analysis of achievements of the sector

Refugee Status Determination (RSD): In the first Quarter, the Refugee Eligibility Committee (REC) conducted monitoring to several border points in Southwestern Uganda and met with partners, district, and border authorities to assess arrival patterns, evolving situations in DRC, pendular/secondary movements, and the reception facilities. The team also visited Nyakabande transit centre facilities, i.e. screening and level one registration, health facility and child friendly spaces. The challenges identified include the need for training of stakeholders, high numbers of secondary movers as well as lake of accommodation for security related cases.

Access to Justice: A total of 13,390 individuals (6,585F/ 6,805M) benefited from sensitization on the Ugandan and Refugee Law. While 1,145 individuals (79F / 1,066M) benefited from mobile courts sessions in the settlement, material support, detention monitoring visits and legal representation. In terms of challenges, limited funding for legal representation, inadequate physical infrastructure, and resources for community outreaches and mobile court sessions in the settlements continue to hinder access to justice for refugees and host communities.

Accountability to Affected Populations (AAP): A total of 18,793 complaints have been addressed through effective feedback and response mechanisms including 162 received and addressed from the host community. 48% of the complaints were received through the inter-agency FRRM, while 52% were received through other mechanisms. 8,977 new queries have been received and referred through the inter-agency FRRM helpline in Q1 2024. Through other feedback and response mechanisms including protection/help desks, complaints, and suggestion boxes, 9,816 new queries have been received, referred to, and addressed by partners during the reporting period.

Community-Based Protection (CBP): Throughout the reporting period, partners engaged with Development actors to strengthen Gender Equality and Women Empowerment (GEWE) in the response. A training on the UN Gender Equality Marker has been conducted, targeting UN agencies. Discussions have taken place with civil society organizations including the Charter For Change (C4C) Working Group on the Localization Agenda within the Refugee Response, focusing on the provision of objectives and strategic directions from UNHCR to these organizations. In Q1, partners have been implementing 99 projects targeting peaceful co-existence between the communities across the settlements. The Government and inter-governmental sectors were the main contributors in this area with 43 supported projects.

Support to Persons with Specific Needs (PSNs) including Mental Health and Psychosocial Support (MHPSS): A total of 9,950 PSNs (4,669F/ 3,010M) have been supported by the various partners. This represents 8% of the target which is linked to challenges related to funding affecting the partners across the response. The top 5 of the settlements reached by the interventions includes Kyaka II, Rhino, Imvepi, Rwamwanja and Adjumani. 79,047 persons (45,965F / 33,082M) have been reached by interventions addressing mental health challenges across the 13 settlements. 5,596 host community members have also been supported by MHPSS responders.

## Key indicators

% of refugees in Uganda who are individually registered in proGres with minimum data set Target: 98%

Achievements 71%

% of eligible asylum seekers whose asylum applications have been adjudicated in line with the RSD procedures and standards (Target: 95%)

Community-led projects or community empowerment projects, where peaceful coexistence is the primary project purpose Target: 85

Funding	Ä	\$178M	\$28M	\$150M
