Rwanda
GBV Situation Analysis Dashboard
January - December 2023

OVERVIEW

The data for this dashboard was collected and reported by UNHCR and its implementing partners (Save the Children and Plan International) in 2023. Survivors are mainly refugees and asylum seekers. According to available data, women and girls are disproportionately affected by GBV incidents. Additionally, the analysis further identified a significant proportion of children (30%) as GBV survivors.

638
GBV incidents

% of person affected

93% female | 7% male

70% adults | 30% minors
