---	--

Transit center one (TC1) was set up in April 25, 2023, to host the first new arrivals. It serves as a temporary center for refugees and returnees. The transit center, originally designed for 1,437 individuals, is now accommodating 4,934 refugees and returnees, exceeding its capacity by 339%. This situation necessitates the construction of 103 communal shelters.

**Existing gaps**

- **Safety & Security:** There is a total lack of internal lighting in shelters and latrines, with 70% of outdoor areas also experiencing darkness.
- **Health:** The center has only one ambulance to cater to a population of 18,000 refugees and returnees.
- **Hazard:** The risk of fire is increased due to densely packed, flammable shelters and the absence of fire breaks/extinguishers. Similarly, the transit center is highly vulnerable to flooding, lacking raised shelters or a proper drainage system.
- **Food Security:** Ongoing food insecurity poses a threat to refugees and returnees residing at the transit center for extended periods.
- **WASH:** The ratio of access to showers is 113:1, exceeding the minimum standards of 50 people per shower stance.
- **Disability inclusion:** There is a limited availability of mobility aids and equipment for people with disabilities.
