# EMERGENCY SITUATION IN CHAD Update on arrivals from Sudan

of 26 august 2024

Given the persistence of conflicts in Sudan and the constant influx of new refugees and returnees, the Chadian government estimates that the number of refugees and returnees could reach **910,000**<sup>\*</sup> in Chad by the end of **2024**.

178.528

#### Context

Since the beginning of the conflict in Sudan on April 15, 2023, the CNARR, UNHCR and IOM have noted an influx of people forced to flee including Sudanese refugees and Chadian returnees who arrived spontaneously in Chad through over 32 border entry points mainly in the provinces of Ouaddai, Sila, Wadi-Fira and Ennedi Est in Eastern Chad. From the onset of the influx, humanitarian workers are supporting the Chadian Government

and local authorities to provide life saving assistance and a set of Protection services both in spontaneous sites ; in the extension of old settlements as well as the newly established settlements. As of date under the leadership of the Government and UNHCR 49% of refugees have been relocated from the spontaneous arrival sites to both the extension and newly established settlements where refugees and host communities benefit from the services delivered by the humanitarian teams.

Source: Estimation by the Chadian government

\*Around 26,000 new arrivals have been reported, but not yet fixed

Based on border monitoring, observations during first counting activities and protection activities during refugee relocation, we have reasons to believe that this figure could experience a reduction by about 20%. The completion of the relocation process and individual biometric registration, which will take place in the

Refugees settlement, will confirm precise refugee figures. \*\*\*Source: OIM/DTM, Chad – Sudan crisis response: Situation update 39 (06 August 2024)

### DOCUMENTATION

What type of individual document do you possess?

#### **COMMUNITY ENGAGEMENT**

What type of information would you like to receive from humanitarian workers and authorities?

#### **EDUCATION**

Are there any school-age children in your family?

The Project 21 is a regional protection monitoring system, launched in 2020 to address gaps in data collection and analysis on protection in West and Central Africa. The inter-agency project mobilizes partners to collect a set of data using harmonized tools and a common methodology to generate joint analysis of the situation, risks, and protection trends.

As of 21 July 2024, more than 17,851 newly arrived refugees have been interviewed in Chad for the Sudanese emergency. This represents a subset of the collected data.
