Child Protection	<ul style="list-style-type: none"> Support to identified unaccompanied & separated children ● Child-friendly spaces ● Psychosocial support to children ●
Food Security	<ul style="list-style-type: none"> Food - for 14 days ● Cooking fuel options ● Functioning market ● Transportation to reach the market ●
Site Planning & Maintenance:	<ul style="list-style-type: none"> Public electricity ● Elevation of critical infrastructure above flood levels ● Functional drainage system ● Lighting of outdoor areas ● Lighting inside shelters ● Roads and pathways ● Signage and wayfinding systems ● Fire safety ●
Water, Sanitation, and Hygiene (WASH)	<ul style="list-style-type: none"> Clean water per person per day ● Water supply accessibility ● Gender disaggregated latrines and showers ● Number of latrines available ● Number of showers available ● Lighting inside latrines and showers ● Hygiene promotion messaging ● WASH NFIs ● Waste disposal ●
Nutrition	<ul style="list-style-type: none"> Malnutrition treatment programs ● Malnutrition prevention programs ● Supplementary nutrition services ●
Health	<ul style="list-style-type: none"> Primary healthcare ● Vaccination for children ● Secondary healthcare ● Transportation/ambulance ● Essential medicines and medical supplies ● Preparedness for disease outbreaks ● Care to individuals with severe mental health conditions ● Mobility devices for persons with physical disabilities ●

Transit Center two (TC2), also known as the extension Site, was opened in January 2, 2024 to ease congestion in Transit Center one (TC1) in Renk. The transit center, with a capacity of 2,695 individuals, is now accommodating 11,274 refugees and returnees, which is 418% of its intended capacity and the population continued to grow. In addition, 3 communal shelters in the site and were allocated to vulnerable families and upgrading of the existing 22 communal shelter improving the living condition of families.

While most services are relatively consolidated, however mainly linked with the protracted situation of the site, associated protection risks are noted due to the overcrowded tap stands, insufficient lighting in WASH facilities (showers, latrines), limited food assistance and lack of dignified spaces/overcrowded shelters for both men and women. Concurrently nutritional status of the population is deteriorating evident through the number of children diagnosed weekly.

Existing Gaps

- **Safety & Security:** while it has been noticed an increase in shelters with internal lighting, most latrines and showers are completely dark.
- **Health:** The two centers have only one ambulance to cater to a population of roughly 12,000 refugees and returnees.
- **Hazard:** The risk of fire is imminent as dry season started with densely packed, flammable makeshift shelters, however, fire warden were trained, assembly point mapped and security unit in coordination with CCCM is working to put up guidance message displaying what to do to prevent fire and what to do if fire incident happens and exploring available resources to put in place local fire extinguisher to address a potential fire incidents.
- **WASH:** Even though the number of latrines by end of December increased compared to November it was observed that the ratio of persons/ latrine has increased mainly due to increase in population. Plans are underway to put up additional latrines
- **Disability Inclusion:** There is a limited availability of mobility aids and equipment for people with disabilities.
