

# 2025-2026 Moldova Refugee Response Plan Snapshot

## What is the Refugee Response Plan?

An RRP is an inter-agency planning, coordination and fundraising tool that supports host governments in providing protection and assistance to refugees and communities hosting them. RRP's build on approaches and capacities of host governments, engaging a diverse range of actors including refugees and host communities.

## 2025-2026 Moldova RCF Coordination Structure

In 2025 the Refugee Coordination Forum structure has been furtherly aligned with development frameworks to progressively integrate into the national development coordination system, upholding the principle of government ownership and encouraging stronger engagement by development partners, which is key to support the ongoing transition towards an inclusive, solution-oriented, and sustainable response. For instance, the Inclusion and Solutions Working Group has been established with the objective of strengthening links between the refugee response and development initiatives - especially those focusing on social protection - whether under the auspices of the government or international development actors, and providing technical guidance to development actors at the country level to ensure effective, coherent, and predictable interventions that support government efforts to address the inclusion challenges and solutions needs of refugees.
