Context

On 23 February 2025, the Government of Iran announced that headcount slips will not be extended beyond 20 March 2025. After this date, the headcount slip holders are treated as individuals holding the same documentation status as undocumented foreigners and with no access to healthcare, medical services, real estate transactions, and other public services, marking a significant shift from previous policies toward Afghans. However, exemptions apply to certain groups, including mixed-status families (e.g., Amayesh/headcount holders), family members of Amayesh card holders, passport holders with expired visas who can re-enter with a new visa, individuals with work permits or job IDs if they obtain legal residency within the deadline, former Afghan government employees and military personnel referred to international organizations for protection assessment, and individuals who leave Iran and return with a valid passport.

Since 20 March 2025 over 207,800 have returned.

Returns assisted by UNHCR Afghanistan

50% of assisted the are **women & children**
41% are **Female headed households**

Border Protection Monitoring

UNHCR and its border partners WADAN and CHA in Afghanistan have scaled up protection activities at the border (Islam Qala, Zaranj and Abo Nasr Farahi) with Iran. Daily presence consists of Border Protection monitoring through interviews with returnees and deportees in order to identify protection concerns and risks, as well as their intended areas of return in Afghanistan. Help desks have been set up to boost protection screening interviews, identification and referral of individuals to be assisted by UNHCR in the Encashment Centers.
