Refugee Response Plan/Uganda

National Monthly Conflict Mapping Dashboard | 2025

1/1/2025 — 5/31/2025

Overview: The Uganda National Conflict Mapping Dashboard (May 2025) presents a comprehensive analysis of 2,645 reported conflict related incidents from January 2021 to May 2025 across 7 Refugee settlements and surrounding host communities. The dashboard highlights key trends in conflict types, parties involved, and geographic distribution, with most incidents reported in Palorinya, Rwamwanja and Rhino Camp. Major categories include GBV (30%), crime (27%), and Child Protection (11%), with domestic violence, animal theft, and child neglect being the most reported sub-types. The data sourced primarily from community members and local structures, reveals that refugee-refugee conflicts account for nearly half of all incidents. The dashboard serves as critical tool for humanitarian actors, offering insights into conflict dynamics, casualties (4,548 injuries and 293 fatalities).
