Executive Summary

Overview

As of July 2025, Türkiye hosts around 2.6 million¹ Syrians under temporary protection and approximately 193,000² international protection applicants and status holders from countries such as Afghanistan, Iraq and Iran. Most live alongside the host community in urban areas, with a small number of refugees residing in Temporary Accommodation Centres. Refugees benefit from inclusive access to national services such as education, healthcare, and social services. The consequences of the 2023 earthquakes continue to affect refugees and host communities residing in impacted areas, with residual humanitarian needs persisting while local capacities and resources remain strained.

Since 8 December 2024, gradual voluntary return movements have been observed (316,000³ by July 2025) while the Government of Türkiye has maintained the Temporary Protection Regulation, also indicating that returns to Syria should take place in a voluntary, informed, safe, and dignified manner. Despite economic challenges in Türkiye and shifting conditions in Syria, refugees still access public services, though system capacity remains strained, sometimes creating barriers. Rising living costs and limited livelihoods hinder self-reliance, increasing dependence on aid and the risk of harmful coping strategies.

Strategic Objectives & Response Priorities

3RP partners in Türkiye continue to work towards the following strategic objectives, ensuring a balanced approach that strengthens resilience, promotes self-reliance, and supports self-organized voluntary returns where appropriate:

- 1. Contribute to the protection of Syrians under temporary protection and international protection applicants and status holders;**
- 2. Support inclusion and access to services, including health, education, social services as well as municipal services and local solutions as needed; and**
- 3. Support harmonisation, self-reliance, and durable and other solutions including voluntary returns.**

Partners are guided by the Global Compact on Refugees as well as the Sustainable Development Goals, especially the commitment to 'leave no one behind'. Age, gender, and diversity-sensitive approaches are integrated across programmes.

Across its five sectors, namely Protection, Basic Needs, Education, Health and Economic Empowerment, 3RP partners remain committed to strengthening the resilience of both refugee and host communities, complementing national services where needed, and enhancing coordination with public institutions for sustainable service delivery.

Voluntary Return Context

Planning for voluntary returns of Syrian refugees from Türkiye in 2025 is led by the Government of Türkiye and based on a coordinated inter-agency approach involving all Sectors. The key objective is for self-organized returns to be informed, voluntary, safe, dignified, and sustainable. Initial projections estimate that up to 700,000 individuals may opt to return in 2025. The financial requirements for this process are estimated at around USD 190 million under the 3RP Appeal's Return Addendum, which is included in the total 3RP 2025 appeal of approximately USD 741 million.

Ultimately, the sustainability of the self-organized voluntary returns depends on continued collaboration between the Government of Türkiye and the caretaker authorities in Syria, 3RP and other humanitarian partners, as well as international stakeholders. To avoid any premature returns which are likely unsustainable – resulting in attempts to return to Türkiye or dependence on humanitarian assistance inside Syria – continued support will be required for those who choose to remain under Temporary Protection in Türkiye.

¹ The target figures for Syrians who are under temporary protection, as well as refugees and asylum seekers of other nationalities who are in need and targeted through sector interventions, are all based on official 2024 year-end statistics of PMM. As for members of impacted the host community, the population in need figures were calculated by using the number of host community members who reside in the neighbourhoods that are closed for TP registration, IP registration, residence permit, and city change procedures for foreigners under IP, TP, and residence permit holders. It should also be noted that citizens of the Republic of Türkiye who are residing in the four provinces (Hatay, Malatya, Adiyaman and Kahramanmaraş) that are most affected by the earthquakes are not considered as "hosting communities" since the impacts of the earthquakes still affects populations and services in the affected provinces while some families and individuals remain displaced. The residual humanitarian needs of the affected individuals should be covered by partners who are assisting the affected refugee population. In line with this approach, an estimation of the people in need in these four provinces is based on the latest data and estimates from humanitarian partners active in responding to the earthquakes as well as government provided data. The target population figures for the host community are based on the number of Turkish nationals reached in previous years, and it is assumed that systems-strengthening efforts and multi-layered capacity development support to public institutions will also benefit the host community (although this is difficult to quantify).

Since 2023, the sector meetings have been held jointly and issues covering both the livelihoods and Food Security and Agriculture (FSA) have been discussed. In terms of reporting, the indicators of the FSA and the Livelihoods Sector have been merged into one reporting framework. The merger will strengthen the design and implementation of the response in a more effective and comprehensive manner. UNDP and FAO, the respective leads of the Livelihoods and FSA sectors, will continue co-leading the Economic Empowerment Sector (EES) and both Livelihoods and FSA components are presented below as one integrated chapter.
