

Overview

Escalating hostilities across Asia and the Middle East has led to a marked deterioration in the humanitarian situation. The affected areas already host 24.3 million forcibly displaced people, many of whom face significant protection risks and humanitarian needs, alongside vulnerable host communities. With limited funding, many countries are struggling to meet existing needs, making it increasingly difficult to absorb additional pressures and support newly displaced populations.

Against this backdrop, the escalation of hostilities since 28 February 2026 is placing increasing strain on humanitarian capacities and host communities. Protection needs are rising, alongside heightened risk of internal displacement, new cross-border outflows, and onward movements towards neighbouring countries. There is also a risk of increased returns of Afghans from neighbouring countries under adverse conditions. UNHCR is closely monitoring developments and strengthening preparedness efforts to support protection and the delivery of life-saving humanitarian assistance to affected populations across these regions.

Situation Overview

Türkiye estimates, IDPs, Afghan returns' estimates (from Iran & Pakistan) and crossings to Syria (Syrian returns and Lebanese nationals) are as of 24 March.

New IDPs since the start of the crisis

Lebanese & Iranian nationals crossing into neighbouring countries

Individuals crossing into their country of origin

While the number of Lebanese crossing into Syria has increased, the number of Iranians crossing into Türkiye has remained below the levels observed prior to recent developments. In addition, between 3 and 24 March, **over 33,300 Iranian nationals were recorded crossing from Türkiye back into Iran**. For some Iranian nationals entering Türkiye under the visa-free short-term stay regime up to 90 days, movements may reflect routine purposes, such as visits, tourism, or transit to catch a flight, or precautionary or temporary travel while individuals assess developments in Iran.

According to the Government of Iran, between **600,000 to 1 million households** are estimated to have temporarily left their homes to seek safety across the country. Using the average 3.2 family size provided by the most recent national census this amounts to **1.9 to 3.2 million individuals**. Most Iranian households are temporarily fleeing from Tehran and other major urban centres, towards the north of the country and rural areas to seek safety.

Afghan return figures are preliminary and expected to fluctuate upon validation on a weekly basis.

Syrians crossing the border include those who had planned to return before the conflict and others compelled to cross due to current conditions. **46,799** reported intending to return permanently.

Profiles

In **Lebanon**, **35%** of IDPs are estimated to be **children**.⁷

In **Afghanistan**, **73%** of the IDPs are **women and children**. Protection concerns have arisen in displacement sites. Authorities have ordered IDPs in seven displacement sites to return to their areas of origin, with two sites already fully vacated.⁸

In **Pakistan**, IDPs moved to safer areas, where the district administration has established two IDP centers, one in Drosh and another in Akroye. **57%** are **children**, and **28%** are **women**.

66% of **Iranians** crossing into Türkiye are **families**.

Based on the 1,236 interviews conducted by UNHCR with arriving Iranian nationals between 4 and 22 March, the age and gender breakdown was as follows: **55% adult men, 32% adult women, 7% girls, and 6% boys**.

Crossings into Syria are primarily **family-based**, with Syrians comprising the majority of those returning. Among the families interviewed, **females account for approximately 52%**.

Since the start of the crisis, **76%** of **Afghan returnees** assisted by UNHCR were **women and children**, returning from both **Iran and Pakistan**.

UNHCR Preparedness and Coordination

UNHCR is leading cross-regional preparedness and response coordination for potential cross-border refugee movements, working with authorities, UN agencies and humanitarian partners. The Regional Bureaux for Asia and the Pacific, the Middle East and North Africa, and Europe are working closely with country operations to monitor developments and advance preparedness and response planning.

Should a response be required, emergency financial aid would be the primary assistance modality, supported by systems already in place in Afghanistan, Armenia, Iran, Iraq, Pakistan, and Türkiye and through our global stockpiles and UNHCR’s mechanism to reinforce staffing capacity.

Operational Presence

Forcibly displaced persons & returnees in neighbouring & impacted countries in the sub-region in 2025. For more information on Forcibly Displaced definition and methodologies, click [here](#).
